MEMORANDUM

TO: Legislative Oversight Commission on Education Accountability
FROM: Paul L. Hill
DATE: November 30, 2013
RE: High School Readiness Report

The High School Readiness Report satisfies West Virginia code requirement 18B-1-1e concerning the assessment of student postsecondary readiness. In accordance with the requirement, this report will discuss “the number of graduates from the public schools in the state by high schools who were accepted in the last calendar year for enrollment at each of the state institutions of higher education within one year of graduation, and whose knowledge, skill and competency were below the minimum expected levels for full preparation as defined by the governing boards.” This information is disaggregated by area of academic deficiency, postsecondary institution and sector, and secondary county and high school.

The West Virginia Higher Education Policy Commission (HEPC) and the West Virginia Community and Technical College System (CTCS) are committed to postsecondary access and providing a quality educational experience at their respective institutions. In addition to internal efforts, both systems have recently collaborated with the West Virginia Department of Education to create programs that help secondary students prepare for the academic rigor of college-level coursework. These efforts include the implementation of high school senior transition courses in English and math, providing support and sector alignment for the new K-12 statewide Next Generation Standards and Smarter Balanced Assessment, the development of a definition of college and career readiness, and ongoing work on the state’s new P-20 data system. Through increased cooperation with the Department of Education, both the two- and four-year postsecondary systems seek to strengthen the state’s P-20 education pipeline, ultimately leading to seamless education pathways and increased student success at the postsecondary level.

Although positive progress has been made to improve the student transition to West Virginia’s public institutions, challenges remain. This report focuses specifically on student preparation and college success indicators concerning the critical transition period from high school to college. The
data reported is for students who graduated from West Virginia high schools and went on to attend two- and four-year public institutions in the state the fall after graduation. It provides for the 2012 cohort of West Virginia freshmen at each postsecondary institution: fall GPA and retention to spring by high school GPA and whether or not students took developmental education; the percent of students requiring developmental education in different subjects; and the average ACT composite and subject scores and percent meeting the ACT college readiness benchmarks. It provides for each county and high school: the average composite ACT score and the percent of students requiring developmental education in different subjects. As with previous readiness reports, this document provides a means for state education stakeholders to view academic progress and determine how to best allocate vital resources to match readiness and completion objectives. The following observations highlight the academic readiness of the 2012 fall cohort of first-time freshmen:

- Students with a high school GPA of 3.0 or above earned an average GPA of 2.89 their first semester of college. Students with a high school GPA of 2.9 or below earned an average GPA of 1.79;
- 93.6 percent of students with a high school GPA of 3.0 or above were retained to the spring semester of their freshmen year, compared to only 77.8 percent of students with a high school GPA of 2.9 or below;
- 70 percent of West Virginia high school graduates attending a community college for the first time took at least one developmental education course, compared to 25.7 percent of students attending a public four-year college or university;
- Of the 7,758 West Virginia high school graduates who began college at one of the two- or four-year public institutions in 2012, 32.1 percent (2,490 students) enrolled in a developmental math course, and 16.5 percent (1,280 students) enrolled in an English/writing developmental course;
- At two-year institutions, students who were not enrolled in developmental courses were retained to the spring at a rate of 79.2 percent, with a fall GPA of 2.49, compared to a retention rate of 80.3 percent for students enrolled in developmental education courses, with a fall GPA of 2.10;
- At four-year institutions, students not enrolled in developmental education courses were retained at a retention rate of 92.8 percent, with a fall GPA of 2.79, compared to those enrolled in developmental education that were retained at a rate of 86.5 percent, with a fall GPA of 2.19;
- 38 percent of West Virginia first-time freshmen attending public institutions scored at or above the ACT math college readiness benchmark of 22, 77.4 percent of freshmen scored at or above the ACT English benchmark of 18, 39.9 percent of students scored at or above the ACT Science benchmark of 23; and 52.4 percent of students scored at or above the ACT Reading benchmark of 22;
- Of all West Virginia high school students enrolled in public postsecondary institutions who took the ACT, only 24.9 percent scored at or above ACT benchmarks on all four subject tests.
