## Highlights in 2005

- Almost 39% of West Virginia's recent medical school graduates are staying in the state after completing residency training.
- Retention of state medical school graduates who complete residency training in West Virginia is even higher 79% in primary care fields such as family practice.
- In the past 9 years, the greatest change has been in retention of medical graduates in primary care fields. Their numbers have increased from 168 to 293, a gain of 74%.
- Compared to medicine, there is greater fluctuation in the retention of dental and pharmacy graduates. This year, 22 (51%) of West Virginia's dental graduates are staying in the state, compared to 27 (73%) the previous year. The retention of pharmacy graduates increased to 48 (67%), compared to 35 (54%) the previous year.
- The Health Sciences & Technology Academy (HSTA), a health career pathway program, is active in 26 counties. The college-going rate for HSTA graduates is 94%. The majority of HSTA graduates are still in college; 55 have gone on to graduate or professional school; and ten are currently in medical school.
- The Rural Health Education Partnerships (RHEP) completed mergers and consolidations that resulted in 8 training consortia, compared to 13 in 1995. These changes are designed to achieve greater efficiencies while maintaining program quality.
- This year RHEP provided 70,513 community service contacts, including health fairs, health screenings, tobacco awareness, immunization clinics, and oral hygiene. In addition, faculty and students provided services to Hurricane Katrina evacuees at Camp Dawson.
- This year RHEP dental and dental hygiene students provided 11,769 clinical procedures and 290 outreach activities. RHEP dental sites provided \$2.6 million in uncompensated care.
- The CARDIAC program expanded to all 55 counties. Since 1998, the program has screened over 30,000 children and some parents. New this year is CARDIAC Two, a screening program for second graders conducted in partnership with the WV Department of Education to meet a legislative mandate of the Healthy Lifestyles Act of 2005.
- In 1991 West Virginia began developing rural training sites for health professions students. Since then, 738 graduates in health fields, including 187 physicians, began and are continuing to practice in rural West Virginia. Other fields include nurse practitioners, physician assistants, dentists, and pharmacists.
- State scholarships and loan repayment are helping to recruit rural providers 40% of the physicians, 45% of the nurse practitioners, and 45% of the physician assistants recruited since 1991 are currently practicing in rural West Virginia.
- In the past 7 years, the number of physicians who participated in the RHEP program and are now in rural practice increased from 88 to 187, an increase of 113%, or an average annual rate of 13.4%.

# Number of Examinees/Number Passing US Medical Licensing Exam, Step 3

	2000-01	2001-02	2002-03	2003-04	2004-05
West Virginia University	83/81 (98%)	65/65 (100%)	69/65 (94%)	71/68 (96%)	69/68 (99%)
Marshall University	43/40 (93%)	50/47 (94%)	39/33 (85%)	46/43 (93%)	41/35 (85%)

All data are for first-time test takers. Data for MD students are based on the US Medical Licensing Exam (USMLE), Step 3. Data for MD students become available two years after graduation, i.e., results for 2002 graduates are shown in 2004-05. The national average for this cohort was 96%.

#### Number of Examinees/Number Passing COMLEX-Level 3

	2000-01	2001-02	2002-03	2003-04	2004-05
WV School of Osteopathic Medicine	59/54 (92%)	56/55 (98%)	51/50 (98%)	73/67 (92%)	72/70 (97%)

All data are for first-time test takers. Data for DO students are based on the Comprehensive Osteopathic Medicine Licensing Examination (COMLEX), Level 3. Results are for 2005 graduates. The national average for this cohort was 89%.

#### Medical School Graduates Choosing Primary Care Residencies\*

	2000-01	2001-02	2002-03	2003-04	2004-05**
West Virginia University	54 (58%)	39 (48%)	46 (48%)	32 (46%)	46 (61%)
Marshall University	34 (67%)	34 (72%)	32 (68%)	29 (73%)	29 (66%)
WV School of Osteopathic Medicine	39 (64%)	40 (63%)	48 (67%)	40 (56%)	N/A***
TOTAL	127	106	126	101	

<sup>\*</sup>Primary care includes family medicine, internal medicine, pediatrics, internal medicine/pediatrics, and obstetrics/gynecology.

<sup>\*\*\*</sup>Osteopathic students enter a one-year rotating internship after graduation. Thus, their test data lag one year behind the allopathic graduates. In 2004, 40 (56%) of WVSOM 2003 graduates chose primary care residencies. The national average is not available.

<sup>\*\*</sup>In 2005, the national average for choice of primary care residencies was 48.7% for all allopathic graduates.

# Medical School Graduates in West Virginia (MD and DO), 1995-2000

		Graduates with Completed Training			
Institutions	Total Number of Graduates	Total Number	Number in Practice in WV	Primary Care in	Number in Practice in Non- Urban Areas in WV **
West Virginia University	490	458	187 (40.8%)	115 (25.1%)	30 (6.5%)
Marshall University	281	270	102 (37.7%)	71 (26.2%)	25 (9.2%)
WV School of Osteopathic Medicine	321	321	118 (36.7%)	107 (33.3%)	64 (19.9%)
TOTAL	1,092	1,049	407 (38.7%)	293 (27.9%)	119 (11.3%)

Note: Excludes SREB contract students at WVSOM who have a contractual obligation to return to their home state following graduation.

\*Primary Care is defined as family medicine, internal medicine, pediatrics, internal medicine/pediatrics, and obstetrics/gynecology.

\*\*Non-urban areas exclude graduates practicing in: Beckley, Charleston (including South Charleston, Dunbar, Nitro, Institute, etc.), Clarksburg, Fairmont, Huntington (including Barboursville), Hurricane, Martinsburg, Morgantown (including Star City and Westover), Parkersburg (including Vienna), Weirton, and Wheeling.

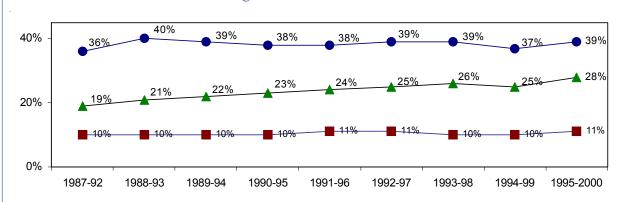

MMFNTARY

A total of 1,049 students who graduated from the state's three medical schools between 1995 and 2000 have completed residency training. Of these graduates, 39% are practicing in West Virginia. Over 11% are practicing in rural areas. In tracking the retention of graduates, this report factors in the additional 3 to 5 years of residency training that physicians complete in their specialty before beginning practice. The table, charts, and maps on pages 5-9 present data on graduates from 1995-2000.

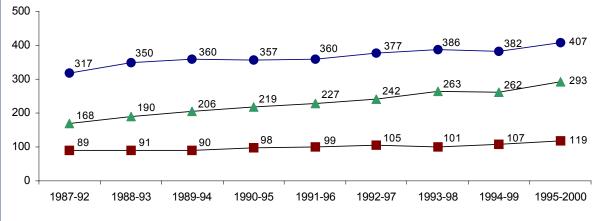

#### West Virginia Medical School Graduates

Percent of Total Practicing in WV

#### Total Number Practicing in WV

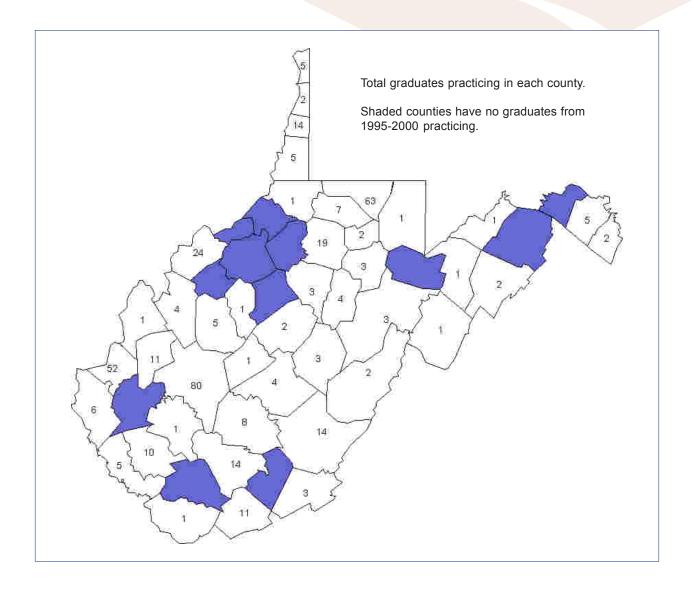

◆ Practicing in WV All Specialties → Practicing in WV Primary Care → Practicing in WV Non-Urban Areas

Retention is tracked annually for a 6-year cohort of medical school graduates who have completed residency training. The greatest change has been in retention of graduates in primary care fields. In the past 9 years, their numbers have increased by 74%, from 168 to 293. At the same time, the percentage of graduates retained in primary care increased from 19% to 28% of the total medical school graduates retained.

OMMENTARY

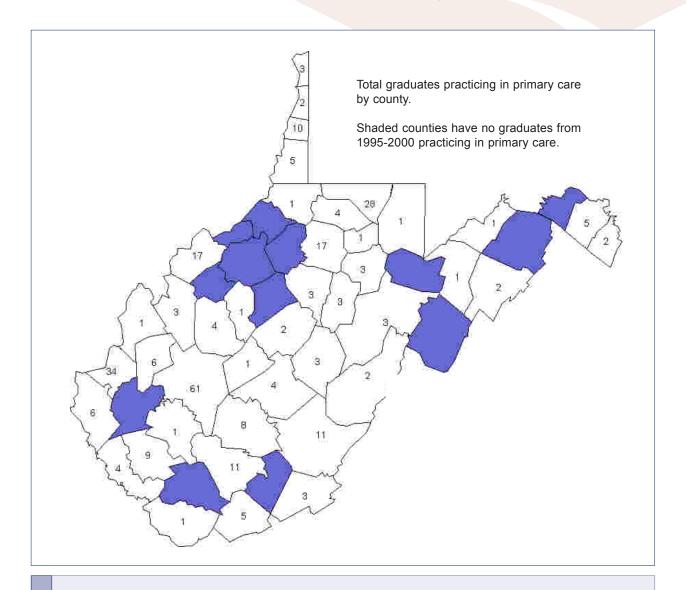

## WV Medical Graduates, 1995-2000, in All Specialties

### WV Medical Graduates, 1995-2000, in Primary Care

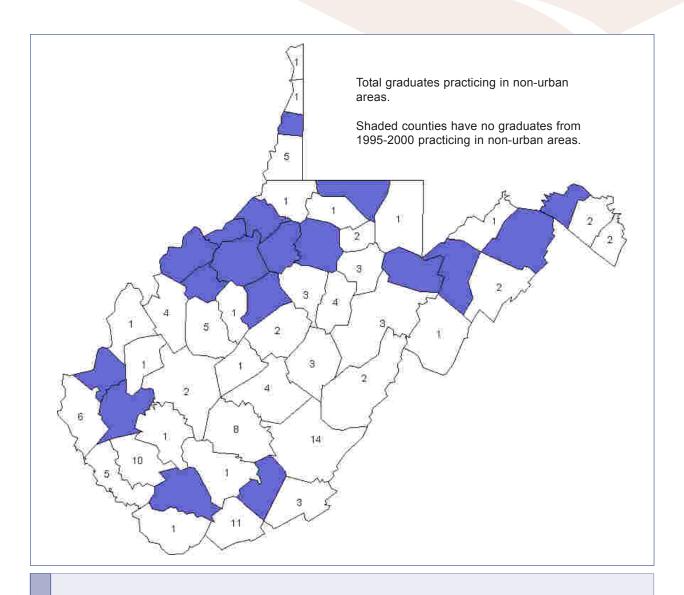

Primary care is defined as family medicine, internal medicine, pediatrics, internal medicine/pediatrics, and obstetrics/gynecology.

**MMENTARY** 

#### WV Medical Graduates, 1995-2000, in Non-Urban Areas

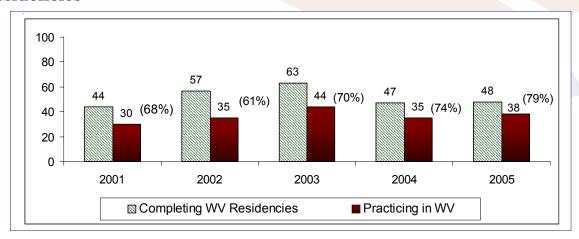

The map excludes graduates practicing in Beckley, Charleston (including South Charleston, Dunbar, Nitro, Institute, etc.), Clarksburg, Fairmont, Huntington (including Barboursville), Hurricane, Martinsburg, Morgantown (including Star City and Westover), Parkersburg (including Vienna), Weirton, and Wheeling.

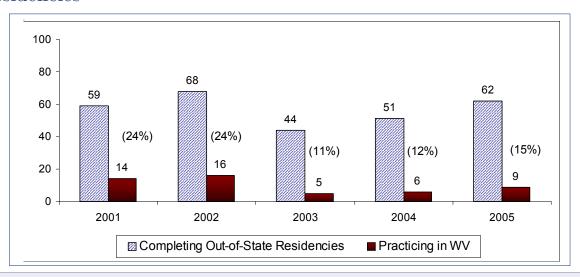

**OMMENTARY** 

#### WV Medical Graduates Completing WV Primary Care Residencies

#### WV Medical Graduates Completing Out-Of-State Primary Care Residencies

Medical school graduates begin practice after completing 3 to 5 years of residency training in a given specialty. Two factors are important in tracking their retention: (1) specialty choice, because primary care fields are most needed in rural West Virginia; and (2) location of the residency, because graduates who complete residencies in West Virginia are more likely to practice in the state.

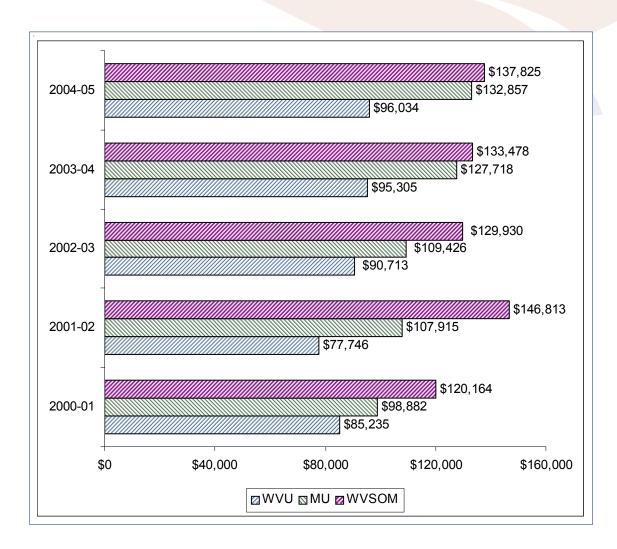

## Health Sciences Graduates, 2001-2005

	2001	2002	2003	2004	2005

# **Scholarships and Loans**

#### Health Sciences Scholarship Participants Practicing in Rural WV

The Health Sciences Scholarship Program provides an incentive for students to practice in underserved areas of West Virginia. Medical students receive a \$20,000 award for a two-year service commitment. Other disciplines receive a \$10,000 award. Nurse educators became eligible in 2003. The chart shows graduates who are fulfilling their service obligation.

#### Medical Student Loan Program

	2000-01	2001-02	2002-03	2003-04	2004-05
Loans Awarded	370	283	289	291	306
Total Amount Awarded	\$1,189,500	\$1,225,000	\$1,246,500	\$1,354,228	\$ 1,586,700
Amount of Unexpended Funds	\$995,697	\$1,498,494	\$2,039,706	\$2,296,022	\$ 2,609,608
Loan Forgiveness	10	20	13	21	21
Default Rate on Previous Awards	2.7%	2.9%	2.5%	2.5%	3.3%

The Medical Student Loan Program, a component of the Health Education Student Loan Program, is a need-based program to assist state medical students. It is funded from medical student fees, and borrowers may earn loan forgiveness for practicing in an underserved area or in a medical shortage field in West Virginia. The unexpended funds include loan repayments. In 2005, the Legislature approved a rule change to allow the schools to increase loans from \$5,000 to \$10,000 so that these funds will be utilized.

# **Health Career Pathway**

#### Health Sciences and Technology Academy

Number of Students Currently Served	Number of Teachers Participating	Number of High School Graduates to Date, 1998-2004	High School Graduates to	Percent to major in Health Sciences & Technology in College
814	80	714	94%	58%

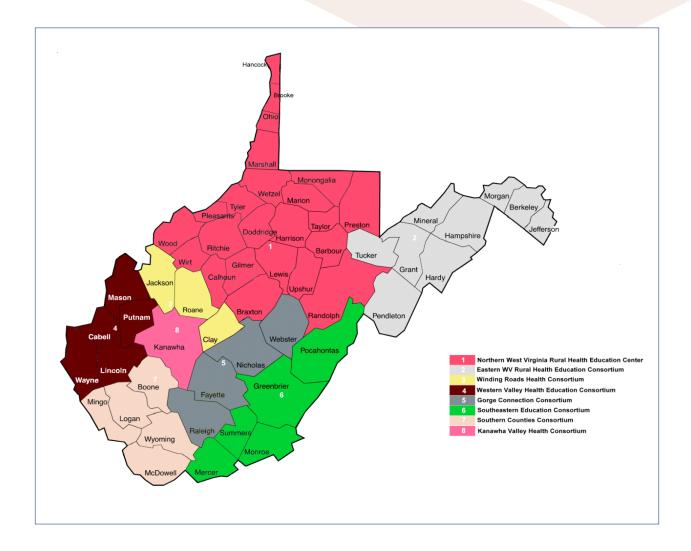

### **Program Outcomes**

- The majority of the 714 HSTA graduates are still in college.
- 55 HSTA Scholars (23% of the first 4 cohorts) have gone on to graduate or professional school. Of that number, 27 HSTA Scholars (49%) have enrolled in health science graduate programs or professional school.
- 10 HSTA students are currently in medical school.

The Health Sciences and Technology Academy (HSTA) reaches out to minority and disadvantaged students in 26 counties and helps them prepare for higher education and health care careers. Students from the 9th-12th grade progress through four years of training with local teachers and campus-based faculty.

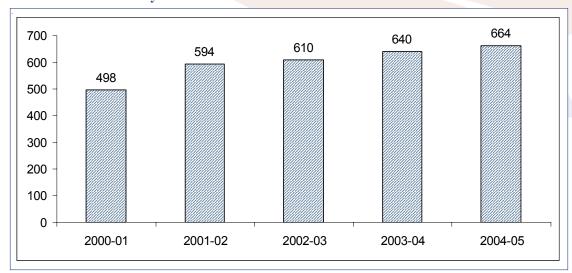

In 2004-05, the West Virginia RHEP completed mergers and consolidations resulting in 8 consortia, compared to 13 in 1995. These changes are designed to achieve greater efficiencies while maintaining the quality of educational experiences for trainees. The program has formed a partnership with the federally funded West Virginia Area Health Education Centers (AHEC) to provide community-based education and training in all counties of the state. The RHEP program focuses on rural underserved areas, while the AHEC serves all areas of the state.

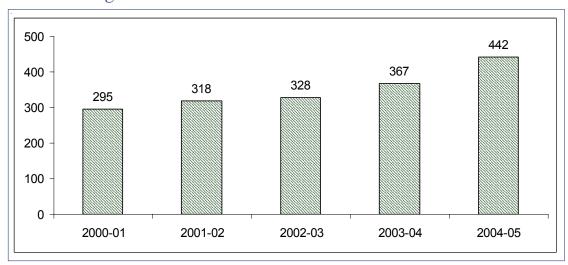

COMMENTARY

#### RHEP Field Faculty

### **RHEP Training Sites**

West Virginia RHEP field faculty are active rural practitioners who also teach students. In 2005, the Faculty Development Conference was held jointly with Area Health Education Centers and the Mountain State Geriatric Education Center. The theme was "Advancing Quality in Community-Based Health Professions Training." A total of 70 field faculty, institutional staff and others attended.

In the past year, West Virginia RHEP reduced the number of training consortia from 11 to 8 through mergers and consolidations. A map of the 8 consortia is on page 15, and information on name changes is on pages 17 and 18.

\*Indirect service expenses include site administration, administrative travel, office expense, and fiscal management.

RHEP provides a wide variety of community services, such as health fairs, health screenings, tobacco awareness, walking programs, immunization clinics, emergency preparedness presentations, diabetes programs, and oral hygiene presentations for all age groups. Faculty and students provided services to Hurricane Katrina evacuees at Camp Dawson. The quality of services has increased with the incorporation of linkages to Healthy People 2010 objectives and statewide projects such as the Coronary Artery Detection in Appalachian Communities (CARDIAC) Project.

The CARDIAC program has expanded to all 55 counties. The overall objective is to reduce heart disease mortality. Since 1998, the program has screened over 30,000 children and some of their parents. In the past two years, 1,057 children participated in the CARDIAC Kinder Project, which involved screenings, parental questionnaires and a pedometer study. Children were screened for height, weight and body mass index. The CARDIAC Teen Project has, in two years, screened nearly 400 9th graders in two counties. Both programs will be expanding in the coming year. New this year is CARDIAC Two, a screening program for 2nd graders initiated at the request of the WV Department of Education. The Department is partnering with CARDIAC and RHEP in order to fulfill a legislative mandate to screen school-age children (Healthy Lifestyles Act of 2005). The CARDIAC program has received national and state awards.

In 2004-05, RHEP dental and dental hygiene students provided 11,769 clinical procedures. Students and faculty participated in 290 outreach activities serving more than 24,190 West Virginians. RHEP dental sites, including dentists and students, provided \$2.6 million in uncompensated care.

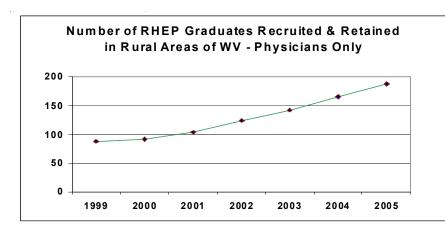

#### West Virginia Trained Health Professionals in Practice in Rural Areas of the State

Discipline I	Number in Rural Practice	Number who Received Financial Incentives
Physicians		
(1991-2002 graduates)	187	74 (40%)
Nurse Practitioners/Nurse Educate	ors 78	35 (45%)
Physician Assistants	105	47 (45%)
Nurses	73	·
Dentists	79	1 (1%)
Dental Hygienists	17	· -
Pharmacists	150	-
Physical Therapists	41	-
Psychologist	1	-
Occupational Therapist	1	-
Medical Technologists	5	-
Masters in Public Health	1	-
TOTAL	738	157 (21%) *

Methodology: Data on physicians include graduates from 1991-2002 who have completed residency training. Data on all other disciplines include graduates from 1991-2005.

Each of the medical (DO & MD) graduates is reverified annually so the count each year reflects the loss of some rural practitioners to urban and out-of-state practice. Despite this expected loss, the number of medical graduates in rural practice has increased 113% in the past 7 years at an average annual rate of 13.4%.

\*The RHEP Recruitment and Retention Committee coordinates state recruitment efforts, including financial incentives, as a companion strategy to rural training. Two hundred nineteen (219) incentives were awarded to these 157 rural practitioners:

#### **West Virginia Higher Education Policy Commission**

Health Sciences Scholarship Program - 69 Awards

#### **West Virginia Rural Health Education Partnerships**

SEARCH Training Stipends - 43 Awards
Community Scholarship Program - 7 Awards

#### Bureau for Public Health, Division of Recruitment

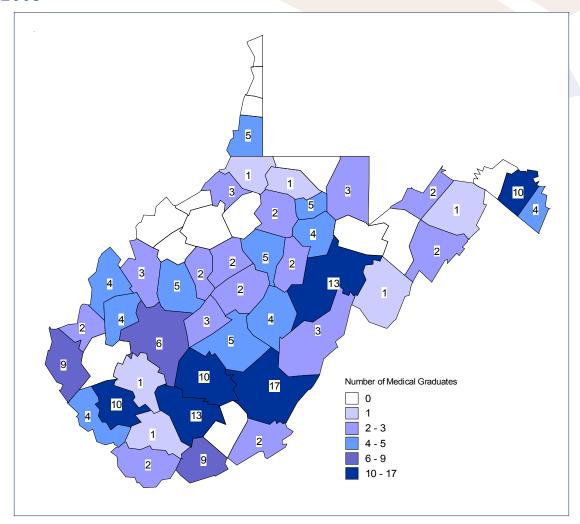

Recruitment & Retention Community Project - 77 Awards State Loan Repayment Program - 23 Awards

**JAMENTARY** 

Recruitment

# Recent WV Medical Graduates Practicing in Rural Areas in 2005

One hundred eighty seven (187) West Virginia trained physicians were practicing in rural areas of the state in 2005. They include graduates from 1991-2002. Seventy-four (40%) of these physicians received state financial incentives.

Recruitment data on pages 26 and 27 were provided by the HEPC, WVDHHR, medical schools, and RHEP staff.
