Subject: WV HEPC Funding Formula Model

Chancellor Hill:
I appreciate the opportunity to have reviewed the presentation to the leadership of the West Virginia House and Senate on a more equitable and results driven funding formula. It is difficult to understand and accept the current funding formula as it appears to be a patchwork of funding without a clear objective. As a West Virginia taxpayer I strongly believe our limited education dollars should be spent on students from West Virginia and with a results and needs based component. Your proposed funding formula achieves that goal. While I would prefer it weigh our states students population needs more aggressively, I think this approach results in a more equitable and results based formula. I would strongly urge its adoption.

Subject: Comments on Proposed New Funding Model

Importance: High

Chancellor Hill:

Please include this email in the compiled comments regarding the proposed new funding formula for West Virginia's public four year colleges and universities.

My name is Eric Lewis. I have the honor of serving as an appointed member of the Shepherd University Board of Governors. I have previously served on the West Virginia School Building authority and I am a practicing Certified Public Accountant. I understand state funding of both K-12 and colleges & universities. I also happen to be a very proud graduate of Shepherd University.

First please allow me to thank you and the HEPC staff for working so thoroughly and diligently on this report and this proposed reconfiguration of the funding mechanism. It is long overdue and very much needed for the vast majority of our colleges and universities.

I have been researching the state's financial support for colleges and universities since before Governor Tomblin appointed me to Shepherd's Board of Governors. I have known for quite some time that the funding is completely unfair to Shepherd University and many of the other smaller schools.

It is now plainly obvious, as per your report, that what we have been saying for many years is 100% true: Shepherd University (and the majority of the smaller schools) has been getting short-changed on its annual funding appropriation in a big way. The current formula makes no logical sense and is, frankly, completely indefensible. It is basically a "who was your delegate or senator, how powerful were they and what was your funding last year?" formula. That is completely unacceptable and not fair to the taxpayers of the schools that are underfunded. No where is that more true than at Shepherd University, where we have consistently been 10th of out 10 in funding per FTE. The numbers don't lie: the current formula is completely unfair to taxpayers in the areas served by these underfunded schools.

This proposed plan fixes that disparity. Shepherd University is situated in Jefferson County – directly adjacent to one of the wealthiest and fastest growing counties in the United States (Loudoun County, VA) and within a 1.5 hour drive of millions of potential students in the DC/Baltimore Metro areas. We are positioned to be a shining star of higher education in West Virginia. Shepherd is located at the Eastern Gateway to the state, where hundreds of

thousands of visitors enter the state each year for tourism activities (Jefferson County represents a full 20% of the total tourism spend in the entire state). It is the most fertile ground for growth and prosperity in Jefferson County and generates tax dollars and economic benefit that reaches all 55 counties.

Where else should we focus state dollars but on the areas most likely to yield the greatest return? In fact, an economic study shows that Shepherd has the third highest regional economic impact of any four year school (behind only WVU and Marshall). We need to support and encourage that economic boost and leverage Shepherd's location to help move our entire state forward.

Of course, WVU is going to fight this. Under this plan, after year three, they start to see a decrease in their funding. However, this decrease is just a small percentage of their overall budget while the increase to Shepherd is a game changer at over 35%. The programs we could initiate with over $3,000,000 more coming from the state would be amazing and I can't stress that enough. Relative to our FTE population, we have been struggling for years with unfair funding (compared to Fairmont State, WVU-Tech, etc). It is long past time to fix that disparity. WVU can very easily absorb this funding correction. We absolutely can't let them bully the HEPC into shelving this proposal. It would be a travesty of epic proportions if WVU is allowed to control this process. It would be incredibly unfair to 7 of the 10 schools and wrongly beneficial to the three who would lose funding, because, frankly, they have been overfunded (relative to the others) for far too long.

This plan is, above all else, ***fair***.

Please see it through and encourage the West Virginia Legislature and the Governor to pass it into law at the soonest possible opportunity. Please don't let West Virginia University control this and push this report to the back-burner. It would be so plainly obvious that their reasoning in doing so is self-serving and detrimental to the small schools throughout the state.

Best,

Subject: Your Proposal to do Great Damage to WVU

Dear Chancellor Hill,

I am writing to express my very strong opposition to your proposal to greatly reduce funding appropriations to our state's, by far, best educational resource. That is absolutely insane. Please consider the following:

WVU is the only academic doctoral level institution of national stature in our state, offering dozens of PhD level opportunities to our state's residents. No other institution is even remotely close to WVU in that regard.

West Virginia University is our state's only nationally recognized research institution, being in the Top 115 of the country in that regard. No other institution is even close to being in the Top 500.

It is WVU that carries our state's banner to the world. The Flying WV is known throughout the nation, and the high profile accomplishments of the school's research and athletic programs help to promote our state in a positive manner on a consistent basis.

The fact that WVU is also successful in attracting residents of other states to attend the university is a testament to the high regard for the school found through the country, even throughout the world. Marshall University has a lengthy list of tuition discounts for out of state residents to try to entice them to attend Marshall, but achieves little success in that regard. WVU puts an emphasis on quality that is not found elsewhere in our state's higher education system.

When students from out of state, and foreign students attend WVU, they spend lots of money in West Virginia, and in addition to spreading the good word about our state elsewhere, the money they spend and taxes they pay provide value to our state that exceeds the tuition they pay to attend the school.

WVU maintains a presence in every county in our state. It is the only institution to do that. People young and old, from every corner of our state benefit from that presence. There is a whole lot more to WVU than simply the number of in state students attending classes. No other institution in our state is in that position. To intentionally harm WVU by reducing appropriations damages not only the school, it also damages the people of this state. To reduce funding for WVU Beckley during the formative years there is also counter productive, and threatens to ruin the opportunities provided the people of that area to participate in quality higher education.

I find it difficult to understand how you want to damage WVU, when our state

has probably the most inefficient higher education system in the country. With a teachers college virtually every other Interstate exit ... two within 11 miles of each other in Bluefield State and Concord, it is amazing that you are not proposing reductions there or consolidations to reduce waste, instead of damaging cuts to the very best offerings.

I urge you to reject your proposed cuts to WVU and WVU - Beckley's state appropriations.

Sincerely,

Paul Garvin

Subject: support new funding model for Shepherd University

Dear Chancellor Hill:

I serve on the Shepherd University Board of Governors, as the elected representative of classified employees. I strongly support the much overdue new funding model proposed by the West Virginia Higher Education Policy Commission (HEPC) on March 23, 2018.

I understand that the "Student Focused Funding for West Virginia Public Higher Education" model could benefit Shepherd University by adding $3.4 million to the university's operating budget for FY 20, a 36.4 percent increase from the FY 18 budget (a total of $12,765,130 in FY20, up from FY18's base budget of $9,360,954).

As you and other members of the HEPC are aware, Shepherd University has historically been underfunded for more than two decades, compared to every other state institution.

As of the 2016-17 fiscal year, Shepherd University, received the lowest state appropriation of all the two- and four-year West Virginia state institutions, dead-last among eleven institutions with only $2,960 allocated per student annualized FTE.

Even though the new funding model will almost entirely exclude out-of-state students, Shepherd is so poorly funded right now that the model produces a higher proportionate increase for Shepherd than for any other institution. The new funding model would greatly benefit our students, as well as recognize and reward Shepherd's efforts to train the next generation of leaders and model citizens.

Thank you for the provisions in the model that demand and reward educational accountability. The legislatively mandated funding model sets benchmarks and uses a formula to assess the effectiveness of each state institution. The model rewards those institutions that make good use of state taxpayer dollars to educate state residents. Colleges and universities that do not meet those benchmarks will have their state funding reduced. Shepherd is committed to meeting and exceeding these benchmarks.

In addition to rewarding schools that educate West Virginia residents, the proposed funding model rewards institutions that help students finish their degrees on time. Shepherd University's Board of Governors is very committed to timely graduation and closely monitors graduation rates.

Finally, our board members support efforts to provide training in high demand fields such as healthcare, education and engineering. The Board routinely works with the University's leadership to discuss the degrees and credentials offered by the University, with a focus on those fields that are in high demand now and in the future.

Our entire board strongly supports the proposed model. Thank you for the opportunity to provide input about this important process, and thank you for your leadership in these efforts to create a more equitable appropriation process and greater accountability among our State's institutions of higher education.

Thank you for your efforts to reward performance among the institutions of higher education in our State.

Sincerely,

Ramona Kissel

Subject: Please implement the Commission's new Student Focused Funding for WV Public Higher Education

Dear Chancellor Hill,

As a former member of the board of trustees of Shepherd University and a former member, and chair, of the West Virginia Higher Education Policy Commission, I am aware of the very long standing inequality of funding for Shepherd University. And I know that the legislature and Commission have tried a number of funding mechanisms over the years.

Therefore, I was very interested to learn that the Commission has recently announced its new model for state funding based on a thoughtful and well researched inquiry into fair and effective use of public funds. I have briefly reviewed the detailed power point presentation from your March 23, 2018 meeting. I agree it is good to begin with and adhere to the list of principles on page 4 of 51 under "New Formula Must...".

Upon application of the new model Shepherd University stands to gain 3.4 million additional dollars in its base budget. It appears to me that basic fairness requires that Shepherd University receive these additional funds. That result wold address historical inequality. Such an allocation would also signal the Commission's intention to actually base its funding recommendations on the student focused values set fourth in the presentation.

Shepherd University has complied with the bench marks, criteria and standards underlying the new funding model. It is good public policy to reward those institutions, such as Shepherd University, that have made good use of state taxpayer dollars.

Thank you for your consideration of this request.

Sincerely,

Mary Clare Eros

Subject: West Virginia Funding

Dear Chancellor,

I am writing to weigh in on the new funding model presented to the West Virginia Higher Education Policy Commission. I think the proposal at hand that redistributes appropriations within the system based on new models is quite fair and will best serve the state. Working in Higher Education for over 20 years and growing up in a "college town" I understand the challenges this creates for some institutions and primarily for West Virginia University. I know that WVU is very ambitious in aspiring to grow their academic profile. As a West Virginian I support and encourage that endeavor. However, as a graduate of Virginia Tech I know WVU's funding per FTE is higher than many of their regional peers. As a state flagship and Research I institution I would encourage them to take the liberating step to become more entrepreneurial in seeking external funds to support future growth. As a state flagship and "destination" institution they are much advantaged in their ability to attract out of state students that further fund the institution. Simply put, WVU has revenue growth opportunities beyond state appropriations and opportunities that are not necessarily available to other state institutions.

The new funding model would be transformational to institutions such as Shepherd, Concord, and West Liberty and thus transformational in their ability to serve their students and perhaps more importantly their surrounding communities and the state. I know WVU can rise to the challenge and may end up being a better research institution in the end. Virginia Tech has improved its profile dramatically over the past twenty years through entrepreneurial programs such as their Corporate Research Center. Many of these successful strategic initiatives became necessary in the face of declining state funding yet ultimately helped to raise the academic profile of the institution through the research partnerships created.

In summation I would ask that we encourage WVU to become the entrepreneurial engine a state flagship and land grant institution should be and allow for state appropriations to flow to the majority of the smaller intuitions that are really on the front line of transforming the lives of West Virginians at the local level.

Thanks so much for your consideration.

Subject: Support the new higher education funding model.

Chancellor Paul Hill, West Virginia Higher Education Planning Commission

Dear Chancellor Hill,

I write in support of the new higher education funding model that would benefit my alma mater, Shepherd University, and other West Virginia campuses by bringing greater fairness to the distribution of state funding to West Virginia colleges and universities. These are difficult times for public universities around the country and for West Virginia universities the stress is even greater. My father served as Shepherd President for more than two decades. His hopes and dreams for the campus continue to take shape and are touching the lives of thousands of students. This great work deserves equitable support.

All of us believe Shepherd University and other campuses should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to Shepherd's budget provided by the new funding model will greatly benefit Shepherd students by funding Shepherd University at the proposed fair and competitive rate.

Thank you for your consideration and thank you for supporting access to quality higher education in West Virginia. As a Shepherd graduate ('56), my years at Shepherd gave me the foundation on which to build a great career and a wonderful life. I hope these same opportunities remain open for students in the future.

Subject: Formula Funding Feedback

Here are my comments with respect to the new funding model:

The WV legislature is to be commended for taking on the topic of formula funding. However, in order for this to work, I would propose that we consider convening all the institutions for collective discussions to work out any issues that some may have. There needs to be a united front of support of the formula.

Having been in a state that has a funding formula, I have seen first-hand how difficult it is to implement a funding formula and avoid supporters from individual institutions going to the legislature and getting special consideration for their individual campuses. If all of the institutions in a system don't support and sign on to the concept, it is destined to fail. As I understand the situation today, there is not universal support.

To gain more support for the formula, I think that out-of-state students should be given some credit in the formula, in the range of 0.25 to 0.50. If we had a high school population base that was increasing rather than declining, I could see that the argument could be used to exclude out-of-state students.

If we change the out-of-state issue and get support of all institutions, I will be fully behind the formula.

Subject: I Support The New Funding Model

Dear Chancellor Hill:

Please allow me to express my support for the new higher education funding model as both a proud member of the Concord University Staff and a 2001 CU Graduate. I strongly believe that public institutions of higher learning in WV, especially Concord University, should be rewarded for meeting the criteria established by the proposed funding model. The $2.2 million addition to the Concord budget provided by the new funding model would greatly benefit our entire campus. In light of the many years of appropriation decreases and budget cuts, WV higher education staff have lived in fear of losing their jobs. This fear is very real for the hundreds of staff members who work tirelessly to support the missions of not only our schools, but also of our state. Our Classified Staff Council fundraises annually to assist children of staff members to be able to attend Concord and we look forward to being able to continue that tradition well into the future. However, with the current fiscal realities of our economy, the need has never been more great.

This model would help to secure staff positions and allow Concord to invest in services that help both our staff and our students succeed. This model will begin to allow schools like Concord to look for additional opportunities to help retain citizens in WV. As the rising costs of living, transportation, textbooks and tuition and fees grow, WV students are all too often faced with critical decisions that time and again result in their inability to attend college. This new formula would help to increase access for those students seeking a degree who currently cannot meet the financial challenges of attending.

WV must reinvest in education in order to see any substantial improvement in all areas of life in the Mountain State. Education is the anchor of hope for our future and will be the only way we can begin to overcome some of the significant issues we face such as the opioid crisis. Without an educated population, West Virginia will continue to be plagued by high levels of poverty, unemployment, and annual budget shortfalls. We will continue to see a decline in the numbers of individuals moving into the state, as well as, the number of companies willing to invest here. More and more of our citizens are leaving WV to seek a more prosperous life. We must show our citizens and the rest of the country that West Virginia is worth fighting for and it will again be “almost heaven” to live, learn, work and raise a family here.

Thank you for the opportunity to express my support for this funding model.

Subject: Funding Fairness

Thank you in advance for your consideration in sending comments to the HEPC Chancellor in support of fairness and equity in adjusting Shepherd's state appropriations based on the new funding model.

I am sadden to see this in-equality continue. When I was a student, 1988-1992, at Shepherd College, there existed a large funding gap between show boat, couch burning, sports oriented schools like WVU and lowly Shepherd. I strongly feel the funding per student should be the same across all WV Colleges and Universities. These are my tax dollars at work. Because of this type of inequality, my son decided to go out of state to a university. In addition to myself, both of my parents went back to school in the 90's along with my brother. All are proud graduates of Shepherd.

As a proud Alum of Shepherd Class of 92, I would strongly encourage a change in the status quo.

Thank you for your time and consideration in this matter.

Paul L. Hill, Ph.D.
Chancellor
West Virginia Higher Education Policy Commission
1018 Kanawha Boulevard East
Charleston, WV 25301

Dear Chancellor Hill:

Please accept the following on behalf of West Liberty University as a letter of support and endorsement of the proposed funding formula for higher education in West Virginia.

As you are aware, the current funding model (based on the previous year's allocation) is non-functional for several reasons. It is a tired and clearly out-of-date funding allocation system. As an example, West Liberty University has experienced enrollment growth during last two years. However, based on the current funding formula, West Liberty University currently receives $900 less per student than a higher education institution just twelve miles away with declining enrollment. Essentially, the State of West Virginia is rewarding higher education institutions with declining enrollment, while penalizing those who are increasing the number of West Virginian's enrolled in college.

The proposed funding formula is like one I became acquainted with while serving as president in another state. That formula was performance based and successfully funded institutions equitably based on key performance metrics. The proposed 70-5-25 percent funding formula is a proven model that compensates institutions for success, while encouraging all institutions to excel.

As a native West Virginian, I would like to see the day when we, as a collective body of colleges and universities, are deemed a model of higher education. A performance-based funding model is the first step.

Sincerely,

Stephen G. Greiner

Subject: "Student-Focused" Funding

Dear HEPC Committee Members:

Were it not for an article in the student newspaper of the state's flagship institution, WVU, I would not be aware of the ill-conceived funding model proposed by your committee, cutting funding *AGAIN* to this institution. While I understand the good intentions behind financially rewarding proportionally larger in-state student enrollments, there are a myriad of other factors which set WVU apart from other state universities, and which should be taken into consideration.

The foremost of these considerations should be how much the individual institutions contribute back to the state. Because of its size, WVU contributes substantially to the tax base of the state of West Virginia, due to the number of people it employs, and brings into the state. The state's funding of WVU has already been cut several times over the past few years, because of WV budget shortfalls. The primary result of these cuts is job elimination - i.e. reducing the tax base because jobs are disappearing. Out-of-state and international students move to West Virginia and live here from two to six years. During that time, they pay rent and spend money on living expenses, and have jobs, thus contributing even more to the tax base. Often, these students stay after they graduate and begin their careers, buy homes, have children, etc. They become RESIDENTS, (to the first point in your "formula.") Our state population is ageing and decreasing, which is part of the reason for the receding tax base and budget shortfalls. Why would policies be proposed that exacerbate this situation?

WVU is largely responsible for the economic transition in north-central West Virginia, from blue-collar to white-collar, thanks to its medical school, hospital system, research corporation, and other programs. The future economic base of the state is dependent upon this transition.

WVU welcomes and actively recruits and encourages in-state, incoming freshmen, but enrollment requirements must be met to qualify. My own daughter is a student at Fairmont State, because she dropped out of WVU, and couldn't qualify to get back in. Perhaps if the WVDE placed higher priority on the quality of public education and support services for school-age children, more in-state students would qualify and be eligible for academically-awarded financial aid to WVU.

While I am a proud native West Virginian, Morgantown resident, and WVU employee, the inherent isolationism implied by, "... focus state taxpayer dollars on educating West Virginia resident students..." indicates short-sightedness and lack of consideration for the future of West Virginia in a global economy. It's the same attitude that's gotten the state in its current cultural and economic bind. I urge the committee to reconsider the proposal for "Student-Focused Funding," particularly

with regard to the financial impact on WVU.

Thank you for your time and attention.

April 11, 2018

Dr. Paul L. Hill, Chancellor
West Virginia Higher Education Policy Commission
1018 Kanawha Blvd. East, Charleston, WV

Dear Chancellor Hill:

Thank you so much for your distinguished public service. I share your love and support of higher education, having served for many years as the Chairman of the Virginia Senate Education and Health Committee.

My wife, Emily, and my late brother-in-law, Larry Strite, are both proud graduates of Shepherd University. Larry served as President of the Shepherd Alumni Association.

Shepherd is one of the most successful and fastest growing institutions of higher learning in all of West Virginia. Its strategic location and exceptional leadership from President Hendrix position Shepherd for a very bright future. Because of its growth, track record, and potential that lies ahead, I would appreciate your strong consideration of the new funding model that has been developed that would increase Shepherd's funding by an additional $3.4 Million. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

I know you are aware that Shepherd received the lowest amount of funding of any university in West Virginia over the past few years. Hopefully, you will agree that West Virginia's leadership should reward Shepherd for its growth and outstanding progress, instead of penalizing a school for its successes. In fact, Shepherd has been penalized for its success over the last two decades.

I have spent my life in education leadership, both at the University of Maryland and Southern Methodist University and also in my position as Chairman of the Virginia Senate Education and Health Committee, and know firsthand the importance of investing in schools that have the potential for tremendous growth and progress.

Good examples of that are: George Mason University, Virginia Commonwealth University, and James Madison University - all schools that now are maxed out in total enrollment. Also, I believe strongly that with a declining population in West Virginia and an older population, Shepherd is one of the few schools that can influence population growth in West Virginia because of its strategic location and visionary leadership.

You have a tough job, and I respect very much your challenges, but please reward Shepherd for its unique pinnacle among West Virginia's institutions of higher learning. The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thanks for your consideration.

Sincerely,

Russ Potts

Subject: Funding

Dear Chancellor Hill,

As a Shepherd student, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I would love to attend a school that has all the classes that it says it offers on the catalogue, but sadly I do not. I cannot complete my degree in a way that is personalized to my future, and in a way I thought I was guaranteed because of the catalogue posted. With funding, Shepherd would be able to hire teachers to teach the subjects they claim to offer.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Subject: Shepherd meets the criteria established by the proposed funding model.

Dear Chancellor Hill,

As a Shepherd student, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. Shepherd has given me opportunities I know other institutions within West Virginia could not have given me. I am from Southern West Virginia, I chose to attend Shepherd because of its diversity in the workforce, diversity in the classroom, and its overall willingness to put the student first. I could go to any other school within the state and I chose Shepherd because I know I am not a number, I am Devin Spinks, I matter to the faculty, staff, and administration at Shepherd University. I hope you, the WVHEPC board, and other West Virginians see how Shepherd can make a better future for West Virginia as it is in the fastest growing area of our great state. I know Shepherd will utilize this funding to make educational experiences both within and outside of the classroom a pleasure to us Rams.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Subject: Support for the new higher education funding model

To Whom it May Concern:

As a faculty member at Shepherd University, and as a faculty member in West Virginia more broadly, I am writing to express my support for the new student-focused higher education funding model. The model will distribute state resources more equitably, allowing us to reach more students, and have a stronger impact on those students.

The model would, of course, benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. Clearly, Shepherd University should be rewarded for its strong service to students, but funding for Shepherd has steadily declined in years past, such that we have been regularly asked to do more with less. The old funding model has meant that Shepherd, in particular, is the least funded per student, by far. The $3.4 million addition to the Shepherd budget would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

This change would most likely also make a favorable impact on the impressions of others about West Virginia more broadly. As an institution near Maryland, Pennsylvania, and Virginia, we frequently represent West Virginia to those outside the state, and our proximity to Washington D.C. means that we sometimes represent West Virginia internationally. Indeed, we will be hosting the ambassador to Niger later today. This change to a more equitable funding model will help us leave our visitors with favorable impressions of West Virginia, which helps pave the way for positive relationships and future investment in the area.

Finally, I must note that these changes directly benefit not only Shepherd University, but also several other institutions of higher learning. In the estimates I have seen, three-quarters of institutions stand to benefit, half of those seeing an increase of more than 20%. In contrast, very few stand to lose, and only one of those by more than 20%. Further, the proposal plans to buffer those few institutions against any sudden losses.

Overall, I see this proposal as an excellent step toward putting resources where they will help students the most. Thank you for your consideration.

Sincerely,

Dear Sir,

I am writing in regards to the new formula which would deduct $1.0 million from Glenville State College's budget which would be a hardship on our college. We might be considered a rural area, but many students would like to come to a college where they are known by their names to professors, not simply by a number like in larger institutions. Glenville State is likely to attract low income, first generation college students that might not otherwise attend. It would be devastating to cut funding from state finances which could lead to deductions in faculty and staff. Glenville State is the backbone to the small town in which it resides in.

There is talk about a teacher shortage in West Virginia and Glenville State has been considered one of the best "teacher colleges" for a very long time. How can students get a quality education if there is a deduction in funding or faculty?

Thank You

Sincerely Yours,
Don Sheets

Subject: Funding formula Comments

Here are my comments with respect to the new funding model:

The WV legislature is to be commended for taking on the topic of formula funding. The funding formula gives us an impartial manner to distribute funds in an equitable fashion to institutions in the system, and it is a good idea.

Having been in a state that has a funding formula, I have seen first-hand how difficult it is to implement a funding formula and avoid supporters from individual institutions going to the legislature and getting special consideration for their individual campuses. If all of the institutions in a system don't support and sign on to the concept, it is destined to fail. As I understand the situation today, there is not universal support.

If we have universal support of all institutions, I will be fully behind the formula.

Subject: Formula Comments

If the medical school funding is to be included in the funding formula, it only seems fair that the $16M or so that the WVU medical school system receives from the soft drink tax should be included in the revenue total. Is it included?

Subject: Funding Model Proposal

Dear Chancellor Hill,

I write in support of the proposed new funding model for higher education in West Virginia and specifically as an effort to right the unfair distributions that I have seen in my forty-seven years at Shepherd College/University.

In all of my years at Shepherd we have always received the lowest funding per student in the system. In addition to receiving the lowest level of funding it has been a significantly lower level of funding. While this has been known for decades, no one until now has been willing to look at the unfairness and, hopefully, make corrections.

In all of the years Shepherd has continued to be the good soldier, to do the job expected and to do it at the highest level possible. It has been extremely difficult as we have had to operate with less funding while operating in one of the most expensive and competitive area of the State. We have, however, always achieved the high level we set for ourselves and, as I am sure you are aware, have always distinguished ourselves in terms of being leaders within the system. I long ago lost track of the number of times Shepherd has been cited for being exemplary, for setting the bar, for serving as a model and yet we have continued to be unfairly treated in matters of budget. Often it felt like we were “the crown of the system” while having any jewels long ago removed.

I have told three of our presidents that there is no reward for being the first to comply with a request from Charleston nor a reward for doing it right and there seldom has been a punishment for not complying by a deadline nor for not doing it right. I am proud to say that each of our presidents agreed with me and then asked that we comply as requested and to do it right. We have always worked with integrity as a key ingredient and always held hope that at some time the quality of our work would receive more than accolades and recognition and would result in a fair budget. It would be wonderful, as I near the end of my career, that this finally comes true.

While I know we can make a very strong case for receiving the highest level of funding given the

outcomes Shepherd maintains, our administration only asks for a fair share. Personally I wish we would ask for more, for a truly fair distribution of funds based on the quality of programs and outcomes yet I realize to do that would produce such outcry and financial adjustments at other schools who have been funded at a much higher level for decades that it simply is not politically possible. We must all keep in mind that the total funding available for higher education in West Virginia simply cannot provide the level of funding that schools in other states receive and we have to make concessions within our system.

In addition to my work at Shepherd I am very active within the communities of the Eastern Panhandle and also work with our neighboring counties in Virginia, Maryland, and Pennsylvania and those connections makes me quite aware of the positive impact Shepherd has always made in the economic area of the region and in the quality of life. Many of the businesses that have chosen to locate in the area, the retirees who have chosen to move here, and the tourists who patronize our businesses speak of the presence of Shepherd as a significant reason for that decision.

I am extremely pleased by all the good things Shepherd has done in the years I have been here and that I know will continue after I am gone. I hope this is the time where Shepherd will finally receive a fair level of funding.

On a personal note I must say I am sorry to read of your departure from the chancellor position. I know that Suzanne Shipley and Mary Hendrix both hold you in high regard. I wish you great happiness and continued success in your next adventure in life. You should be proud of the work you have done.

Subject: Support for new funding model proposal

Dear Sir,

Having been a faculty member in the chemistry department at Shepherd for forty-three years, I have seen hundreds of science majors (many of them future Ph.D.'s and M.D.'s) and nursing students avail themselves of the great opportunities that this school provides.

My department had done its best to attract both in-state and out-of-state grants for scientific equipment, in order to provide a modern education in the laboratory sciences. I know from personal experience how difficult it was for our business office to come up with the required matching funds for federal grants.

There is no question about the fact that all of West Virginia higher education is underfunded but the scarcity of money weighs especially heavily on Shepherd. I support the new funding model proposal which will even the playing field to some extent for a university that has done an outstanding job in preparing its students for their professional lives.

Subject: funding for Shepherd University

Dear Chancellor Hill,

As a member of the Shepherd community, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

I was the director of the USDA-ARS-Appalachian Fruit Research Station in Kearneysville, WV from 2007 to 2015 and spent my career at the laboratory from 1981. Over those years I hired many Shepherd students for summer and year-round work as well as providing internships and resources for students to complete their senior projects. I was always impressed with the knowledge and enthusiasm of the students as well as their ambition. I would estimate that at least of half of the students who worked with me for more than a year went on to graduate or professional programs. I have seen the quality of education and the breadth of programs change and improve over the years that I have lived and worked in the community. Higher education pays high dividends for the investment and I fully support the programs and leadership of Shepherd University.

Thank you for your consideration on this matter.

Subject: Requesting Support for the Student-Focused Funding Model

Importance: High

Dear Chancellor Hill,
As a long-standing administrator of an institution of Higher Education in the State of WV, I am reaching out to you today to voice my support for the proposed three-pronged "Student-Focused Funding Model" for higher education.
Personally, I favor this model because it sets benchmarks and uses a formula to assess the effectiveness of each state college and university, rewarding those that make good use of state taxpayer dollars to educate state residents helping students finish their degrees on time and provide preparation for high-demand careers (e.g. healthcare, education, and engineering).
I greatly appreciate your consideration in support of this model and your continued leadership for all of our institutions of Higher Education.
Best Regards,
Ulises

Subject: State Funding

Dear Chancellor Hill,

As a Shepherd student, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

This is the template created for Shepherd University students if they supported the state funding program increase. I agree completely that Shepherd University like other institutions have become underfunded and require additional funds. I also hope that the allocated funds go to the students so they can afford tuition and not miss out on a vital opportunity in life. I would also urge Shepherd University to choose wisely where to put the funds. Fair pay for the faculty is a crucial issue now more than ever and the shrinking of faculty could become an epidemic nationally. With this increase of funds I feel confident that a positive outcome from the budget increase will be likely. And makes me proud of the State of West Virginia to be making a productive decision.

Thank you for your consideration.

Subject: CU Students Support New Funding Formula

Dear Chancellor Paul Hill,

I am writing to you on behalf of Concord University's student body. In our Student Government Association meeting on March 28, the student senate voted with unanimous consent in favor of supporting the WV HEPC's new proposed funding formula model. The Student Government Association serves to represent the student constituent group in Concord's shared governance model, and as President, I felt it was my duty to pass along to you how much Concord University students want and believe in this funding formula.

As a senior at Concord University and after serving four years as a leader in SGA, I have seen this university suffer at the hands of budget cuts. The amount of resources we had when I came in 2014 and the amount we have as I am leaving in 2018 shows a drastic difference. We have not let these budget cuts or drops in enrollment in higher education stop us. Concord University has chose to face these deficits with determination and resilience by keeping tuition as low as possible, by cutting in house spending, and by working on improving scholarshiping. I have heard it said time and time again that we need to learn to do more with less, and that is exactly what Concord University has tried to do.

This proposed funding formula, however, could be the boost that Concord University needs for its future. Our small liberal arts university is so important to the southern region of this amazing state. Our students are intelligent and hard working, despite the fact that the majority are low income and first generation students. With almost 80% of our student body being West Virginia natives, Concord University is educating the future of West Virginia. This funding formula would reward us for this. Investing more in Concord University is investing more in West Virginia's future.

I cannot reiterate enough how much Concord University students could benefit from the implementation of the HEPC's proposed funding formula.

Thank you for your time and consideration,
Sarah Fancher
SGA President

Subject: Please reconsider the new funding model

Dear Chancellor,

I'm writing to ask that you reconsider the new funding model as the current proposal is unfair to Glenville State College.
Below are a few reasons why I feel the proposed model is unfair:

1. There is greater credit given to research universities than GSC. While it intuitively makes sense that graduate level courses would cost more to deliver, it is unfair that more credit is being given to research universities for undergraduate students meeting completion milestones and degree production. This type of differentiation essentially creates a caste system of support that penalizes GSC because of its mission as a state college. It would be proposed that no additional credit in any formula be provided simply because of a "research university" designation.

2. There is greater credit given to all universities as compared to GSC in terms of teaching upper-division undergraduate courses. Although the cost of instruction at the undergraduate level is similar across all institutional types, the additional credit for universities creates inequity and disproportionately less funding to state colleges (like GSC). It would be proposed that undergraduate credit hour weighting be the same for colleges and universities.

3. The costs in providing academic support services to high risk students is immense but necessary. GSC has a large number of students that would be considered high risk (economically challenged, first generation, etc.) and are successful in progressing towards and earning a degree. It would be proposed that greater credit be given in any state funding formula to assure that GSC is able to provide proper support for these students.

4. The timeline for implementing the new state funding model could occur as soon as next year, although it is expected to be phased in over the next three years. While GSC has introduced several initiatives to increase student enrollment and retention, activities and efforts take time to develop, implement, assess, and readjust. It would be proposed that funding "hold-harmless" provisions be in effect for no less than six-years to allow GSC adequate time to plan, implement, assess, and adapt its plans for enrollment recruitment and retention improvement.

Thank you for your time and attention to this matter.

Subject: Faculty Senate perspective on state funding for Shepherd

Chancellor Hill.

I wrote to you the other day as an individual Shepherd University faculty member regarding the new funding model for WV higher education. I'm writing now on behalf of the Shepherd University Faculty Senate. I've been a full time faculty member since 2003, at Shepherd since 2011. I can honestly say that I've never seen another faculty who cares more for their students. Shepherd faculty go to immense lengths for students while at the same time shouldering heavy service and administrative burdens, much of that due to unfilled administrative and faculty positions. We do a lot for our students, and given the time and resources we could do even more. As an example, I met last week with faculty from across campus who are looking for ways to give our students a more interdisciplinary experience. We are brimming with ideas and enthusiasm for ways we can educate our students. But to make those ideas become reality, we need resources. An increase of $3.4 million to our budget would mean not only providing enhanced learning resources for our students, but also allow us to hire and more effectively retain top-quality colleagues to help shoulder the workload. I encourage you to support the faculty of Shepherd University by supporting the new higher education funding model.

Sincerely,

Chris Lovelace
President, Shepherd University Faculty Senate

Subject: Shepherd University

Dear Chancellor Hill,

I have been an employee at Shepherd University for 13 years. Shepherd has been very good to me and I love working with my co-workers, colleagues, students, and the members of our community.

There has been a significant decline in morale as budget cuts and low enrollment continue to adversely affect all aspects of our beautiful campus. Even the dispensed length of paper towels is shortened in all of our restrooms!

With our innovative and vivacious President Hendrix, it is hard to complain as she is so positive, supportive and hopeful, however, when morale is down, and paygrade definitions are reduced, salary increases are taboo, vacant positions are frozen, our workloads are increased. Travel is stripped from our budgets leaving no room for continuing education or professional growth. It proves difficult to maintain the loyalty to an institution that is not loyal to its students, faculty and staff. The negativity is overwhelming.

With that being in writing now, I respectfully implore your loyalty and support to Shepherd University to do everything in your power to obtain a significant increase in our state funding so that Shepherd may once again rise with pride above all others and stand firm with our goals and beliefs so we may go on with business as usual without the constant feeling of impending financial and professional gloom and doom.

Very Sincerely,

Carol

Subject: Support for New Funding Formula

Chancellor:
I am writing to advocate for the new funding formula proposed by the HEPC. As an accounting professional at a small school, I can say we have done everything in our power to manage the yearly reduction in appropriations. We now need your help. I understand other factors in the decision, as I am also a recent grad of WVU. WVU plays a critical role in our state; however, I feel that West Virginia dollars should go to help West Virginia students. The smaller schools provide a quality education to our in state residents.

I support this new funding formula and I urge for its implementation.

Cc: [redacted]

Dr. Paul L. Hill,

I am writing today about a subject very dear to my heart – Glenville State College. It was recently brought to my attention that the West Virginia Higher Education Policy Commission (WVHEPC) has proposed a funding model that will spell nearly assured disaster for Glenville State College's future. Admittedly, West Virginia's finances are in dire straits but we cannot sacrifice our state's smaller institutions of learning as a temporary fix.

As you are hopefully aware, the state legislature approved the placement of a Glenville Branch of the West Virginia Normal School on February 19, 1872. At that time, the State Constitutional Convention (Article XII, Point 11) declared, "No appropriation shall hereafter be made to any State Normal School, or branch thereof, except to those already established, and in operation, or now chartered." Because of this declaration by the State Constitutional Convention, fifty-six citizens – farmers, merchants, lawyers, carpenters, public officials, democrats, and republicans - of Gilmer County came together with funds to establish the Glenville Branch Normal School. These citizens recognized the importance of the establishment of a Normal School at Glenville. Presumably, the state legislature also recognized the importance of establishing this Branch by voting to approve the placement.

We mustn't now acknowledge the continued importance of Glenville State College and at the same time declare the funding be drastically cut - especially without giving her administration, faculty, and staff the necessary time to adequately address any shortcomings found.

Despite her meager beginnings and often tumultuous financial struggles throughout her history, Glenville Branch Normal School - now Glenville State College - has remained steady in her goal of educating West Virginia citizens. From her first class in 1873 – a mere 10 years into the statehood of West Virginia – until now, Glenville State College has been and remains a "Lighthouse on the Hill" forming, guiding, and educating West Virginia students.

Using WVHEPC's chart on page 12 of the attachment, Glenville State College's total 2017 headcount enrollment of WV students was 86.8% with her ten-year average of total enrollment headcount being 87.4% West Virginia students. Glenville State College has remained steady in her recruitment of WV students while many other institutions total percentage of WV students have steadily dropped during the 10-year date range shown - Including West Virginia University.

In my humble opinion, without the quality teachers graduating from Glenville State, staying in state, and passing on their education to all WV students, the future of our state is indeed grim. Glenville State and her programs, teacher education in particular, are vital to the future of our students and our state.

We must not cut her funding as the proposed model does.

WVU may have the research facilities rewarded under the current proposed model, but are

those research facilities reaching WV students? The model shows they are not. 51.9% of WVU's total enrollment headcount are out of state students with only 13.5% of those remaining in state vs. 16.7% of Glenville's non-resident graduates remaining in state. Information is from the HEPC proposed model attached.

This proposed model punishes GSC for doing what she does best: Educate WV students. GSC's total enrollment headcount not only focuses on educating OUR students, it also includes a large percentage of first-generation college students (like me), at risk students, and students that come from severely disadvantaged homes.

I wish I had time to gather the exact numbers for these facts, but I am sure they are available from Glenville State College. Glenville State College's Student Support Services, and Hidden Promise initiative (now used at other institutions, but originating at GSC) allow numerous students from disadvantaged backgrounds to successfully graduate with a degree that will forever change the future of their families.

Below are a few reasons why the proposed model is unfair to GSC according to President Pellet:

1. There is greater credit given to research universities than GSC. While it intuitively makes sense that graduate level courses would cost more to deliver, it is unfair that more credit is being given to research universities for undergraduate students meeting completion milestones and degree production. This type of differentiation essentially creates a caste system of support that penalizes GSC because of its mission as a state college. It would be proposed that no additional credit in any formula be provided simply because of a "research university" designation.

2. There is greater credit given to all universities as compared to GSC in terms of teaching upper-division undergraduate courses. Although the cost of instruction at the undergraduate level is similar across all institutional types, the additional credit for universities creates inequity and disproportionately less funding to state colleges (like GSC). It would be proposed that undergraduate credit hour weighting be the same for colleges and universities.

3. The costs in providing academic support services to high risk students is immense but necessary. GSC has a large number of students that would be considered high risk (economically challenged, first generation, etc.) and are successful in progressing towards and earning a degree. It would be proposed that greater credit be given in any state funding formula to assure that GSC is able to provide proper support for these students.

4. The timeline for implementing the new state funding model could occur as soon as next year, although it is expected to be phased in over the next three years. While GSC has introduced several initiatives to increase student enrollment and retention, activities and efforts take time to develop, implement, assess, and readjust. It would be proposed that funding "hold-harmless" provisions be in effect for no less than six-years to allow GSC adequate time to plan, implement, assess, and adapt its plans for enrollment recruitment and retention improvement.

I believe at this time West Virginia's best bet is to move from no adopted funding formula to in transition of adopting a funding formula or remain as having no formula, as this model needs much more thought and change before it can be successfully implemented.

The New Approach proposed on page 19 is most assuredly upside down. Success certainly should not be rewarded at a mere 5% of the base budget. It does not make financial sense to offer 70% of the budget to institutions offering "Access." It encourages institutions to offer coursework at the sacrifice of quality graduates and success. Much is yet to be done before this model is to be successfully implemented. As is currently stands it is a danger to Glenville State College and the students of West Virginia.

Distributing 70% of available appropriation funding based on the total number of credit hours WV residents students attempt is fool-hardy. This encourages corruption in student advising where students are encouraged to attempt courses they either cannot successfully complete or they do not need to complete for graduation. Majority funding and focus should be placed on Success not Attempt.

I thank you for your time and I thank you for your thoughtful reconsideration of this proposed model. As it stands, I suspect it will be disastrous to Glenville State College's future.

Respectfully yours,

Debra Dingess Brennan

Subject: Funding

Dear Chancellor Hill,

I graduated from Shepherd College (now Shepherd University) in 1980 with a degree in Chemistry. After my graduation I was fortunate enough to earn a PhD in Chemistry from the University of Wisconsin-Milwaukee and then spend a few years as a post-doctoral fellow at the University of Virginia. Finally, on to a successful career in the medical device and pharmaceutical industries. People often asked me of my experiences at Shepherd since they likely didn't know that much about the school. I often replied it was the best kept secret in higher education, with solid academics and faculty supporting the mission of the university along with a fair cost structure for students. And, the location of the school makes it a desirable place to pursue academic excellence. I could go on with more accolades about Shepherd but I don't want to take up too much of your time for that is not the reason for this email to you.

I wanted to let you know that I wholeheartedly support the new higher education funding model that would benefit my alma mater Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

As a yearly donor to Shepherd to support their mission for over 25 years, I thank you for your kind consideration in this matter.

Sincerely,

Steven A Chmielewski, Ph.D.

Subject: Support for the Proposed Student Focused Funding Model

Dear Chancellor Hill,

As a staff member at Concord University, please allow me to express my support for the new higher education funding model that would more fairly distribute state funding among WV colleges and universities, ensure that taxpayer dollars are used to educate West Virginia residents, and hold institutions accountable for student success.

Since Concord University's establishment as a state teachers school in 1872, we have served the students of West Virginia, particularly rural, poverty-stricken southern West Virginia, well. We have long provided educational access to WV students who likely otherwise would not be afforded the opportunity. More than half of Concord students are low-income and over 40% are first-generation. The challenges facing first-generation and low-income students are well documented, as are their lower rates of retention and graduation and higher loan default rates. Concord has long been committed to improving access and success for these students, yet the support and remediation needs are often far greater than those of higher income students or students whose parents have a college degree. We work hard to ensure that our low-income students are persisting and graduating at rates similar to their middle- and high-income peers. Although Concord was recently named the most generous school in West Virginia in terms of student scholarships (according to a study released by The Student Loan Report), like many institutions serving high numbers of Pell recipients, we struggle to help each of our students fill the gap between their ability to pay and financial aid. Many of our students work one or more jobs to cover this gap and to support their families. The proposed funding model recognizes the challenges and importance of serving high-risk populations such as low-income students. Given that the percentage of West Virginia's population with a college degree is among the worst in the nation, it is essential that postsecondary access and success for West Virginians is made a priority and that the funding of colleges and universities reflect this. The proposed funding model also rewards institutions for educating West Virginians who then choose to remain in our state and help grow our economy. Many Concord graduates stay in West Virginia.
Small public regional institutions like Concord University have admittedly struggled financially in recent years due to state budget cuts, lack of investment in Pell and other financial aid which prices low-income students out of college, and the increased view that higher education is a private good. However, the majority of West Virginia low-income, first-generation, and underrepresented minority students in this state attend these very institutions. However, the current inadequate and unfair funding of West Virginia public colleges and universities endangers the small public institutions like Concord that provide a majority of the educational access and opportunities for West Virginia students.

Sincerely,
Sarah Beasley

Office of the President

April 19, 2018

Dr. Paul Hill
HEPC
1018 Kanawha Blvd, East, Suite 700
Charleston, WV 25301

Dear Chancellor Hill,

On behalf of the students, faculty and staff of Shepherd University and residents of our surrounding community, I write to express our collective gratitude for your courageous endeavor and thoughtful creation of the new funding model proposal that would give Shepherd a budget increase of $3.4 million per year. After two decades of being the lowest funded state college/university per student, the time has come to correct a longstanding injustice.

The most effective way to advance Wild and Wonderful West Virginia is by educating the next generation of leaders, innovators and model citizens. However, it has been difficult for the State to invest in education during a time of financial turmoil and transition from a coal-based economy to one that is more blended. As the State slowly climbs out of the economic downturn, an educated workforce will be needed to ensure stability, to stop the current exodus of citizens, and to attract new businesses and developers. In this regard, the Eastern Panhandle is poised to serve as a powerful economic driver of the State due to our proximity to Washington, D.C., Maryland, Virginia and Pennsylvania. Strong evidence in support of this contention was realized with the recent formation of the Potomac Applied Business Company on our campus -- created and led by a CEO from the metropolitan area who envisions Shepherd students as a pipeline for his satellite business in West Virginia.

For the past two years, I have had the privilege of serving as Shepherd's 16th President, and I have asked numerous individuals why our University has been treated so unfairly. Surprisingly, the answer is consistently the same: "It's just politics." West Virginia can no longer afford to do business in this manner -- and civic-minded voters know it. We are cognizant that our powerful colleagues at WVU will argue that the new funding model decreases their current state appropriation and that the West Virginia academic institutions will be pitted against each other. Our rebuttal is simple: 1) The phase-in period holds school budgets harmless; 2) WVU just completed a $1 billion fundraising campaign and has enormous capacity to replace lost state revenue with philanthropic funds; and 3) competition and benchmarks will inspire all of us to do better -- and that is the essence of the new funding model.

Thank you again for developing a fair model that will allow "all boats to rise" in West Virginia rather than promoting the political status quo. It is now up to our state legislators to vote courageously for fairness -- and we are all watching.

With profound gratitude and respect,

Mary J.C. Hendrix

Subject: funding

Dear Chancellor Hill:
I am aware of the results of the completion of your study regarding funding of State supported educational institutions.
I understand that the "Student Focused Funding for West Virginia Public Higher Education" model could benefit Shepherd University by adding $3.4 million to the university's operating budget for FY 20, a 36.4 percent increase from the FY 18 budget (a total of $12,765,130 in FY20, up from FY18's base budget of $9,360,954).
As you and others on the HEPC are aware, Shepherd University has historically been underfunded when compared to the other state institutions. As of the 2016-17 fiscal year, Shepherd, received the lowest state appropriation of all the four-year West Virginia state institutions, dead-last among eleven institutions with only $2,960 allocated per student annualized FTE.
Even though the new funding model will almost entirely exclude out-of–state students, Shepherd is so poorly funded right now that the model produces a higher proportionate increase for Shepherd than for any other institution. The new funding model would greatly benefit Shepherd students, as well as recognize and reward Shepherd's efforts to train the next generation of leaders and model citizens.
I also applaud the provisions in the model that demand and reward educational accountability. The legislatively mandated funding model sets benchmarks and uses a formula to assess the effectiveness of each state college and university. The model rewards those institutions that make good use of state taxpayer dollars to educate state residents.
Finally, I support efforts to provide training in high demand fields such as healthcare, education and engineering. In closing, I strongly support the proposed model.
Thank you for the opportunity to provide input into this important process, and thank you for your leadership in these efforts to create a more equitable appropriation process and greater accountability

among our State's institutions of higher education.
Sincerely,

Sandy Kaye

Subject: Shepherd University Funding

Dear Chancellor Hill,

My name is Bob Jensenius and I am writing this email on the behalf of my wife Billie Jensenius and myself. We graduated from Shepherd in 1974 and 1972 respectively. I also serve on the Shepherd University Foundation Board.

The purpose of this letter is to voice our support of the new higher education funding model. This would bring fairness to the distribution of state funds and level the playing field.

As we understand the proposed funding model, besides leveling the playing field, it challenges each university to meet certain performance criteria for current funding and future funding. We believe that Shepherd University should be rewarded for meeting the current criteria and strongly believe that Shepherd University will continue to meet or exceed the criteria in the future.

While the increase may look like a large percentage, Shepherd University, and it's students and faculty, should not be penalized moving forward for years of underfunding. Again, we are asking for level funding and the ability to compete.

Thank you for your time in reading this email and if you have any questions please call me at [redacted]

Respectfully,

Bob Jensenius

A Resolution of the Board of Governors of

Fairmont State University

BE IT ENACTED BY THE FAIRMONT STATE BOARD OF GOVENORS:

WHEREAS, the West Virginia State Legislature mandated a study by the West Virginia Higher Education Policy Commission (WV HEPC) of general revenue appropriations to individual higher education institutions; and

WHEREAS, the WV HEPC study shall include a report and recommendation to the Legislature on a formula for the allocation of general revenue; and

WHEREAS, the WV HEPC shall make a recommendation to the Legislature as to the amounts that each such institution should have appropriated to it in the general revenue budget for Fiscal Year 2019; and

WHEREAS, the focus of state taxpayer dollars should be on educating West Virginia resident students; and

WHEREAS, the funding model should account for variations in the missions of the state's public institutions and the unique needs of their diverse student populations, be based upon reliable metrics drawn from existing data resources, be straightforward and easy to understand, be transparent and auditable, promote innovation and student success, and reward institutional successes with additional funding; and

WHEREAS, the recommended funding model should focus on *Access* (What courses are students taking?), *Success* (Are students making sufficient progress toward degree completion?), and *Impact* (How many students are earning a college degree?); and

WHEREAS, the Student-Focused Funding Model provides an objective and equitable means of distributing general appropriation funds to public four-year institutions based upon *Access* (courses attempted by West Virginia resident students), *Success* (the progress resident students make toward on-time degree completion), and *Impact* (the number of student who finish college with high-quality degrees); and

WHEREAS, the Student-Focused Funding Model rewards institutions that help students finish on time, and produce high-quality degrees.

THEREFORE, be it resolved by majority vote of the Board members here gathered, that the Fairmont State University Board of Governors strongly endorses the West Virginia Higher Education Policy Commission's proposed Student-Focused Funding Model.

Subject: West Virginia Higher Education Policy Commission proposes $9.2 million cut to WVU funding - West Virginia Press Association : West Virginia Press Association

We in Montgomery (UKV) remain concerned that the closing of the WVU campus in Montgomery was neither collaborative nor transparent.

https://wvpress.org/breaking-news/west-virginia-higher-education-policy-commission-proposes-9-2-million-cut-to-wvu-funding/

Who is WVU to talk about collaborativeness and transparency?

In the February 15, 2015, edition of WV Illustrated, WVU President Gee, in reference to keeping both the Montgomery and Beckley campuses operating as WVU campuses, stated,

"They'll be two arms on the same body."

Seven short months later, he, President Gee, announced the closing of the century-old campus in Montgomery, the campus that was

entrusted to WVU--free of charge--in 1996.

And now you speak of transparency and collaboration?

Subject: Supporting The New Funding Model Vs. Gordon Gee's Jet!

Dear Chancellor Hill:

Bravo to the HEPC for finally correcting the funding model in an effort the bring Shepherd University to parity with other West Virginia universities. The past model that has led to the arrogance of WVU's Gordon Gee's private jet utilization while the other universities scrounge for crumbs is reprehensible. Please see to it that this sort of political nepotism in exchange for WVU perks ceases immediately; and advance your funding model through the legislative maize for the benefit of our WV students, not the champagne and caviar jet-setters of Morgantown.

Shepherd University Community Support For HEPC Funding Model

Dear Chancellor Hill: As a friend of Shepherd University, I support the new higher education funding model that would benefit Shepherd by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. • First: We need to more fully exploit the multiple pluses of the Eastern Panhandle of the State as well as neighboring Washington County in Maryland which Shepherd University draws heavily upon in close coordination and providing mutual support in many aspects of the life of our community. The focus just on Shepherdstown is too narrow. • Next, we should look more closely at, and appreciate more fully the human resources that are presently under- utilized by Shepherd due to funding shortfalls. They provide impressive resources for mentors, counselors and adjunct professors in direct support of an expanded or deepened curriculum which increased funding requested would facilitate. o We have in our proximity a wealth of professional expertise in a wide range of fields, some individuals are still working (by train or auto as well as a growing number of tele-commuters) and many retirees who decided to live here and commute to work in federal endeavors or supporting roles in the Washington. This well- educated and well- traveled mix of very active and articulate men and women already

support our highly successful and growing Life Long Learning Program that provides younger students opportunities to share their educational experience with the older generation in a learning environment. They are a great source of mentors, informal counselors, and simply valuable sounding boards for students to share and explore a wide range of interests. o For example, I have been facilitating for the past four years with two other retired colleagues (one an intellectual property lawyer, the other a British Veterinarian) intense weekly discussions on a variety of current issues. We add from time to time other experts from a variety of professions, still in harness to make sure our information is current. We consistently average 30 or more participants. Already we periodically attract students who in concert with their professors use us as sounding boards or survey participants for class projects. The point is, we have this many dedicated mature adults from every possible field of expertise assessible, exploiting Shepherd University facilities to establish and maintain an active dialog with each other, the community, and interested students. The weekly topics are summarized and published in the local paper and many In and about Shepherdstown follow the discourse and keep it alive as they go about their normal activities. Additional funds would provide Shepherd University badly needed additional resources for very cost-effective professors and counsellors to help students fully exploit this resource matching up students with mentors of advisors and sustaining effective oversight to properly manage – and for the benefit of the students – document results to support further study or employment opportunities. • Next, we have great potential for a series of internships or work study programs taking advantage of work-related experience opportunities in our community, with various business activities, and a multitude of government operations. There is vast potential: o We still have significant agri-business activities in this part of the state with added emphasis on sustainability, the environment, and advances in organic and ecologically-friendly production. The variety includes: grain (corn and soya bean) production, dairy and beef cattle, a variety of small animal operations, and even commercial fish farming. Local horse racing supports important hay and feed grain production as well. o Transportation infrastructure resources are highly concentrated within Shepherd University's reach for geographical and historical reasons, so we have an important East Coast North- South interstate freeway (U.S. 81) that has resulted in numerous large factories, warehouses, and distribution hubs (especially truck depots). We also have the main East Coast railroad trunk line (CSX) with an important junction with

Norfolk and Southern. And we have Martinsburg Regional Airport. So important inter-modal challenges (and learning opportunities) abound. o Federal Government (particularly public safety, emergency management, and continuity of government) Facilities: We are in close proximity to Mt. Weather, a concentration of FEMA functions in Winchester, another in Emmitsburg, Camp David, Fort Detrick. And the 167th Army Reserve Air wing. o Thanks to Senator Byrd, we have a concentration of government facilities as well including: the IRS headquarters, the Coast Guard Operations Center, the Home Land Security training facility, extensive U.S. Park Service operations, and a Job Corps Center. These are complemented by the National Conservation Training Center, and the Veterans Administration Regional Medical Center. o Important medical facilities (for support of added training) include: the Berkeley Medical Center, Ransom Medical Center, Valley Health Medical Center in Winchester, and Meritus Medical Center in Hagerstown plus numerous clinics, nursing homes, and assisted living facilities -- all provide excellent sources of medical-related internship and opportunities for work experience. With a little imagination and initiative in support of realistic higher education programs Shepherd University is well positioned to exploit our very positive and productive Inter-Ministerial Association coordination who could support seminarian residence programs, expand use of the excellent staff and resources of Byrd Center for internships and practical work on legislative process and Federal – State interface programs, expand use and revitalization of the Appalachian Commission, still grinding away but badly in need of fresh ideas and support, developing Shepherdstown (and SU) as publishing center tied to encouraging local and State authors, publishing and promoting their works, more aggressive exploitation and realization of our Historical heritage, and provide badly needed support for U.S. Armed forces recruitment and training including exploration of establishing Shepherd as a site for a revamped inter-disciplined ROTC program. Thank you for your consideration.

Signed: Michael G. Austin CDR, USN (Ret.) President, Shepherdstown Community Club

Subject: HEPC Proposed Funding Formula

Dear Chancellor Hill,

The calculation of higher education institutional funding across the state through a formula that is equitable and fair makes intuitive sense. Creating a formula that is straight-forward, coherent, understandable, and accounts for the nuances of institutions with vastly different student demographics and missions is important, although extremely difficult. I want to personally thank you and your staff for your recent work and effort in attempting to create a fair state-wide institutional funding formula. However, the "Student-Focused Funding model" currently proposed by the West Virginia Higher Education Policy Commission fails to create an equitable funding model for Glenville State College (GSC) for the following reasons:

1. Fixed Costs –
   While providing state funding based on the number of enrolled students makes sense, there are costs related to building and grounds maintenance and operations for each higher education institution that is fairly constant irrespective of enrollment. It would be proposed that a base funding level or amount be allotted to each institution irrespective of enrollment. This would ensure a stable funding level for institutions irrespective of changes in enrollment.

2. Differentiation –
   There is a higher weighting given to state universities as compared to state colleges in terms of teaching upper-division undergraduate courses. Although the cost of instruction at the undergraduate level is similar across institutional types, the additional weighting for universities creates inequity and disproportionately less funding to state colleges (like GSC). There are little to no instructional cost differences between institutions like Concord, Fairmont, Shepherd, and West Liberty and Glenville other than College or University designation. It would be proposed that undergraduate credit hour weighting be the same for colleges and universities.

3. High Risk Population Weighting Factor –
   The costs in providing academic support services to high risk students is immense but necessary. The delivery of Supplemental Instruction, tutoring, advising, career and disability services, and other specific staffing required with an Academic Success Center results in enormous costs. While high risk factors were somewhat addressed within the "Student-Focused Funding model", it would be proposed that additional weighting be

provided to account for the significant costs associated with providing service to these high risk student groups. GSC has an inordinate number of students that would be considered high risk (economically challenged, first generation, racial and ethnic minority, non-traditional adult age). GSC has had great success in educating these students and in creating educational success (progression and completion). Being sure that adequate attention and subsequent weighting be provided in any funding formula is critical in assuring there is proper support for these students. It would be proposed that the high risk weighting be greatly increased to account for the additional costs associated with educating these students.

4. Research Institution Weighting Factor –

   There is a consistent higher weighting provided to research level universities than colleges. While it intuitively makes sense that graduate level courses would cost more to deliver, it is unclear as to why greater weighting is being given in terms of research university undergraduate students and in terms of students meeting completion milestones and degree production. This type of differentiation essentially creates a caste system of support that penalizes GSC because of its mission as a state college. It would be proposed that no additional weighting be provided simply because of research university designation.

5. Timeline for Implementation –

   GSC has introduced several initiatives to increase student enrollment and retention. Enhancing student access through online degree offerings, adding high demand programming, and creating seamless transfer pathways for community college students will assist the college in building additional enrollment. Also, focused emphasis on improving retention through intrusive advising, counseling, and mentoring and other specific programs will provide enhanced support and structure for students to achieve progression milestones and eventual graduation. Activities and efforts take time for development, implementation, assessment, and readjustment. It would be proposed that any hold-harmless provision be in effect for no less than a six-year timeframe to allow GSC the time to plan, implement, assess, and adapt its plans for improving enrollment recruitment and retention.

Overall, the idea of a student focused funding formula has merit. However, any funding model that creates dramatic reductions for any single college needs careful consideration and extensive analysis. GSC will be unequivocally financially damaged with a decrease in state appropriation by over 17% of its current state appropriation. Questions related to the process in determining funding level percentages, weightings, and areas of focus should occur over an extended period of time that appropriately recognizes the differences in missions of all institutions and the unique value they provide to the state and region they are located. GSC provides an educational benefit to Central West Virginia that would go unfilled if it were not available. The proposed loss of $976,595 would be catastrophic to GSC's efforts to keep college affordable for those students that need it most. It is our hope that the Higher Education Policy Commission will consider our proposals and work with us to assure that Central West Virginia and GSC are not irreparably harmed by the proposed changes in funding being proposed.

Sincerely,

Tracy L. Pellett

Subject: Student Focused Funding Model

I am writing in strong support of the proposed Student-Focused Funding Model. As a life-long resident and taxpayer of West Virginia, this is the first model of revenue allocation that aligns with my beliefs about higher education in West Virginia. The following rationale explain my strong support:
• The focus of state taxpayer dollars should be on educating West Virginia resident students; and • A funding model should account for variations in the missions of the state's public institutions and the unique needs of their diverse student populations, be based upon reliable metrics drawn from existing data resources, be straightforward and easy to understand, be transparent and auditable, promote innovation and student success, and reward institutional successes with additional funding; and • The funding model should focus on Access (What courses are students taking?), Success (Are students making sufficient progress toward degree completion?), and Impact (How many students are earning a college degree?); and • The Student-Focused Funding Model provides an objective and equitable means of distributing general appropriation funds to public four-year institutions based upon Access (courses attempted by West Virginia resident students), Success (the progress resident students male toward on-time degree completion), and Impact (the number of student who finish college with high-quality degrees); and • Finally, the Student-Focused Funding Model rewards institutions that help students finish on time, and produce high-quality degrees.

Subject: Student Focused Funding Model

Hello,

I am writing to voice my support for the recently proposed Student Funding Model for higher Education. I have reviewed the documents provided and feel that this is a well thought out plan that puts the needs of West Virginia students first. Two features are especially attractive to me. First is the hold harmless implementation plan that enables institutions to adjust to the new funding mechanism over a three year period. Second the innovation pool of funding will help ensure that the best and brightest ideas in higher education rise to the top. I think that this innovation funding pool is such a good idea that If future state revenue allows it, implementing the pool sooner or with even greater support would be an excellent way to improve higher education even more. Full disclosure, I am a higher education employee.

Dr. Paul L. Hill

1018 Kanawha Blvd

Charleston, WV, 25301

Dear Dr. Hill,

I appreciate all you have done for higher education in West Virginia. But there is one last item I hope you will consider doing before your retirement. I would like to see the new funding model that has been developed, adopted by the state. It seems overdue that Shepherd University receive its share of the funding for higher education.

I am a Shepherd alumnus of 1962 and one of WVU in 1964. I have taught in the public schools and in several universities—all in West Virginia. I don't know whether the fact that Shepherd is in that panhandle has any effect or not. My brother graduated in 1960 and received his medical diploma from WVU in 1964. He practiced in Monongalia County until 2010. Shepherd is a good school doing a good job.

I respectfully request your assistance in having this funding model accepted and implemented.

Yours,

Roberta Renn Absher

Subject: Too many colleges? Senator expects "day of reckoning" for WV's higher education system | WV News | wvnews.com

Senator Gaunch, I understand your concern about the number of colleges in our state, but the Legislature has been battling this issue for years with little to no positiv

https://www.wvnews.com/news/wvnews/too-many-colleges-senator-expects-day-of-reckoning-for-wv/article_0c4327d8-f6a7-5056-9153-a05df424ffb1.html

If I recall correctly and I feel certain that I do, the Legislature hired Carnegie (at a great expense) in the late 1990s or later to do a research/study on this issue in hopes that Carnegie would take the political elephant off of its backs and recommend the closing some of our smaller colleges.

The results of that study (if I recall correctly) was twofold:

1. Due to the mountainous terrain of our state, the small instiutions need to remain in their respective locations in order to accommodate the area students each institution serves.

2. The unpopular recommendation which the Legislature did not want to hear much less deal with politically:

    Merge Marshall and WVU

I was an avid supporter of Tech in Montgomery. The Legislature was not due to political pressure from WVU. Now West Virginia has three colleges in very close proximity of the Beckley area.

And, even more important, I am convinced that history will record that the relocation of Tech to Beckley will result in the state of West Virginia eventually losing one of the best engineering colleges in the nation--simply because the nationally ranked Nelson engineering is/was a conflict of interest to WVU.

Since the education of our youth pretty much resides within the legislative system in Charleston, the need for strong and astute legislative leadership in dealing with this issue in a fair and equitable manner is imperative.

Dear Chancellor Hill,

Thank you in advance for the opportunity to comment on the WVHEPC's proposed student focused funding model. Please let me know if you have questions regarding my letter.

Best wishes,
Kathryn Liptak

Concord University
P.O. Box 1000, Campus Box 92

April 21, 2018

Office of the Chancellor
West Virginia Higher Education Policy Commission
1018 Kanawha Boulevard, East - Suite 700
Charleston, WV 25301

Dear Member of the West Virginia Higher Education Policy Commission:

As a member of the Concord University faculty, I am writing to express my support for the proposed higher education funding model that would benefit Concord by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that public institutions of higher learning in WV, like Concord University, should be rewarded for meeting the criteria established by the proposed funding model.

The $2.2 million addition to the Concord budget provided by the new funding model would greatly benefit everyone in our University community and especially our faculty. Funding Concord University at a fair and competitive rate would allow the institution to invest in continued academic research and development of innovative programs to attract and retain quality faculty, as well as help to prepare our graduates for a successful future in WV.

Thank you in advance for the opportunity to provide comments on the proposed funding model.

Sincerely,

Kathryn L. Liptak, Ed.D.
Professor of Education
Concord University

RE: Comments on the proposed Student-Focused Funding Model

Dear Chancellor Hill,

On behalf of the West Virginia Center on Budget and Policy, I am writing to address concerns with the proposed Student-Focused Funding Model. The West Virginia Higher Education Policy Commission has been developing a model of performance-based funding for West Virginias higher education institutions, as mandated by the legislature. While 37 states have adopted some form of performance based funding models for higher education, they have not all been successful, and have led to some unintended consequences.

Performance based funding models for higher education have typically designed with two goals in mind. One goal has been simply to encourage higher education systems to be more efficient, as shrinking state budgets have forced institutions to do more with less.[1] The second, more broad goal, is to align higher education institutions with other state goals around economic competitiveness and labor market outcomes. Performance based models have been designed to incentivize higher education institutions to produce graduates that will promote economic growth.[2]

Most evaluations and research has found that performance based funding models have not been successful. Evaluations of Washington state,[3] Tennessee,[4] Indiana,[5] and other similar studies have all found that performance based funding models have not had their intended effect on retention rates, degree completions, or graduation rates.

Studies have shown, however, that there have been a number of unintended consequences associated with performance based funding. These unintended consequences can have a disparate impact on underserved student populations, particularly low-income and minority students.

Performance based funding models in other states have raised concerns of weakening academic standards, including grade inflation, changing degree requirements, and moving students too quickly through foundational education.[6] This was evident in Tennessee, which saw an increase in increase in short-term degree completions and a decrease in long-term degree completions, as institutions began to break degrees into smaller and shorter components that can be completed on their own, rather than one longer degree program.[7]

[redacted]

With an emphasis on degree completion, another unintended consequence is increasing admissions requirements, including include changing admissions standards, recruiting students most likely to complete a degree, and offering more merit-based financial aid. These changes can lead to fewer low-income and minority students.[8] A study of Indiana's funding model found that Indiana public universities enrolled fewer minority students after performance funding was implemented, compared to Indiana private colleges and public colleges in surrounding states,[9] while another study found that Pell Grant revenue declined in schools after performance funding was implemented, suggesting that schools may be trying to meet benchmarks by restricting admissions.[10]

There are aspects West Virginia could include in its performance based funding model to mitigate these unintended consequences. West Virginia's proposed performance based funding model includes weights for high-risk populations. Weighting these factors is an important tool to address some of the issues present in performance based funding model, and care should be taken to ensure that the proposed weights in West Virginia's formula are adequate. However, formulas based on numbers of full time students can advantage large campuses, that don't serve underserved students who need to attend part time. In West Virginia's proposed formula, the additional weights for high risk students may not be significant enough to offset this issue, especially since the research institution weighting is so much more than the high risk population weighting.

While, West Virginia's proposal calls for including additional weights for high-risk populations "such as including economically disadvantaged, non-traditional (adult) students, academically underprepared students, and racial and ethnic minorities," it is unclear from the presentation if these examples all will be assigned additional weights and how they will be defined. In higher education low-income students and students of color are often concentrated at campuses with the least resources. These campuses would benefit from additional support to increase student success and outcomes, so it is important that additional weights for minority and low-income students are included made mandatory. Without additional weights to help, campuses could be incentivized to stop admitting students they believe are less likely to graduate or require additional resources to support.

West Virginia's proposed model also includes criteria that rewards intermediate outcomes as well as longer term ones like degree completion. This too is an important aspect that will help avoid the shortfalls experienced by other states, and should be made a key part of the funding formula. But since 70 percent of the proposed formula is based on credit hours, it is important that care is taken not to disincetivize developmental education and remedial education courses.

Finally, one of the biggest challenges higher education institutions face with meeting the goals of performance based funding is a lack of capacity and funding. Higher education institutions need to be able to afford make necessary changes to increase performance. It is costly for institutions to provide the supports and services needed in order to promote success for the state's low-income, adult and academically underprepared students.

[redacted]

West Virginia's proposed funding model was based on the state funding available in FY 2018, which had been substantially reduced after many rounds of budget cuts in recent years. General Revenue appropriations for higher education in FY 2018 were $83 million below FY 2013 levels, an 18 percent decrease. The model will be asking West Virginia's higher education institutions to increase student outcomes with fewer resources than what was available in the recent past.

With these potential problems, it would be very beneficial undertake a comprehensive program evaluation of the state's performance based funding model after it has been implemented to identify any unintended consequences of the policy and make changes accordingly.

As West Virginia moves forward with a performance based funding model, preventing these unintended consequences and ensuring the state's higher education institutions have adequate resources should be a central focus so that all West Virginia students should be successful.

Very truly yours,

Sean O'Leary, Senior Policy Analyst - [redacted]

Subject: comments regarding 4 year College Funding Formula

Dr. Hill,
I am writing in support of the proposed 4 year College funding formula. I currently teach at Concord University (CU), but was at Glenville State College (GSC) for 7 years prior to coming to Concord. Though I understand that GSC could be hurt by this formula (and I am very sympathetic to their situation), I think that a formula such of this is much needed for determining how state money should be allocated. Certainly international students and out-of-state students add variety and fresh ideas to a college campus - all the many advantages of diversity. However, when an institution like WVU has approximately half of their students come from out of state, and only a small portion of them stay in WV, it is unreasonable and unfair to give WVU a financial advantage. West Virginia needs to give priority to students who are most likely to stay in the state after graduation, sharing their skills and knowledge right here where it is desperately needed, increasing businesses, promoting opportunities for other West Virginians, sending their kids to school here, and spending their money in WV. High risk and economically disadvantaged students deserve our assistance.

WVU will always thrive. So many of the students that I have taught at GSC and CU are low-income, are often non-traditional, live in the area, and intend to stay in the area. They truly want to go to school closer to home, and have no intentions of leaving the state. The WV legislature needs to support the smaller schools around the state. Certainly these institutions should not receive less money per student than WVU!

I am fully in favor of the proposed College Funding Formula.
Thank you.

Subject: student-focused funding model

Hello, Dr. Hill. I hope this correspondence finds you more than well. I heard recently of your upcoming retirement- congratulations! You have been a wonderful asset to our state and HEPC and I immensely enjoyed my interactions with you while at MATRIC and TRAX. Upon the arrival of my twins I left my position at MATRIC and have since found myself teaching part-time in the Biology Department at Fairmont State University. I have really enjoyed the switch in environments and my interaction with students.

Recently I had the opportunity to review the HEPC proposed funding program for our state's colleges. Prior to this I admit I had very little "clue" how the whole state allocation of higher education funding worked. I was quite impressed with the student-focused model though. As you know, all students are not alike and I found it really interesting how your model addressed institutions who aim to include those at high-risk in their student population. Weighting factors such as degrees which require an elevated instructional cost or lead to degrees in high-demand fields were also counted for. I am well aware of the fact that an engineering or natural sciences degree is likely to carry a much increased instructional cost compared to many other degrees. It was refreshing that such differences were noted.

A few other notes, I liked the inclusion of holding institutions accountable for helping to keep students on track for on-time graduation. Although I have not personally seen it in my current position, I imagine it would be quite easy for an institution to lose sight of that goal when a student continues to be enrolled and pays tuition. After all, an enrolled student equals revenue. But we both know there is more to an institution's responsibilities to a student than merely collecting tuition.

I know that Fairmont State's board of directors unanimously approved our institution's support of this student-centered funding model and after reviewing it myself, I can certainly see why. I think time will show that your agency's model will not only be a key factor in the successful re-alignment and allocation of state funding for higher education but will also serve as a model by which other states may come to refer to. I am really excited to see what great ideas come about as a result of the additional funds set aside for innovation as well. Your office has certainly done its due diligence with this proposal and I thank you for that effort. It truly shows in this proposal.

So, again, thank you for all of your effort and service to our state. You have served many roles over the years (I think I first interacted with you while you were at EPSCoR) and I hope that they have left you with a great sense of accomplishment and I hope your retirement offers to you more than you ever hoped for. You surely

deserve it, Dr. Hill.

Sincerely,
Jamie L. Miller, Ph.D.

Subject: Comments on the proposed funding formula

Importance: High

April 26, 2018

To Dr. Paul Hill, Chancellor, Higher Education Policy Commission

Hello Dr. Hill,

I am writing to voice my support for the proposed new funding model for higher education. For way too many years, Shepherd University has been financially penalized through the existing funding model, which does not take into account the number of enrolled students or the number of students who successfully graduate. While I understand the concern of the institutions that will lose funding in the proposed model, the existing model has unfairly distributed money to other colleges and universities that I believe should have been coming to Shepherd, and it's way past time to correct that.

The existing funding model, in addition to state budget cuts, have forced Shepherd to raise tuition and fees over the years, which makes it more difficult for West Virginia students attending Shepherd to afford a college degree and often forces them to go into greater debt to pay for their education. Because the funding formula gives Shepherd less per student than it does other institutions, our students and their families are penalized more by placing on them the extra burden of making up the difference.

As the chair of Shepherd's Classified Employees Council, I should note that underfunding Shepherd is unfair to the university's employees, most of whom have not received salary increases for many years, yet live in one of the most expensive regions of the state. For example both housing and gasoline cost more here. The underfunding caused by the existing formula, budget cuts enacted by the state in recent years, and erosion of WV PEIA benefits have created a situation where fewer employees are forced to take on more duties for less compensation. While I understand all institutions have had to deal with state budget cuts and have struggled with giving raises, Shepherd is at a greater disadvantage because it is penalized by the existing funding formula. And, unlike other institutions that might be bigger, more politically powerful, or have land grant status, Shepherd doesn't have large outside financial resources from foundations and big grants to make up the difference.

A WVU report released by the HEPC in 2016 showed that Shepherd has the third highest economic impact of all two- and four-year institutions in the state, ranking only behind WVU and Marshall. This was despite the fact that Shepherd received proportionately much less state support. Imagine how much greater Shepherd's economic impact could be, not to mention how much more the university could do to educate the state's future business owners, employees, and leaders, if the funding formula invested in it properly.

Thank you for taking my thoughts into consideration.

Subject: HIGHER ED FUNDING REFORM PROPOSAL--COMMENT

Dear Chancellor Hill,

As a former legislator who was involved in efforts to bring long overdue and much needed reform to WV's funding for Higher Ed, I support the new HEPC higher education funding model that would bring fairness to the distribution of state funding to West Virginia colleges and universities. The majority of states (37) already have a sensible funding model in place, and WV should move in the same direction.

Locally, Shepherd University has been woefully underfunded and should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate and help SU to grow and prosper in it's unique geographic setting in the greater region from which it draws folks seeking to pursue a college degree.

Thank you for your consideration.

Sincerely,

Walter E. Duke

(Former member of the WV House of Delegates--2002-2012; 2014-16--representing the 61st District in central Berkeley County)

Attachments: Funding Formula Resolution.pdf

Dear Chancellor Hill,
As members of the Classified Staff Council at Fairmont State University we would like to submit the attached resolution, signed by council members, in support of the proposed funding formula based on funding those institutions that show the most progress towards educating West Virginia Resident Students. Current data supports the choices made by current students as to where WV residents feel most inclined to enroll. It is our recommendation that this data be used to support future appropriated allocations so that we can continue to re-invest into WV, ultimately investing into educating our workforce, therefore investing in our future economy. We willfully sign the attached resolution offering our support. Let it be known we are available for any additional support that may be necessary as this proposal works its way through the system. Please do not hesitate to contact us with any questions you may have.
Thank you for your service to the Regional Institutions and the people of West Virginia,
Holly Fluharty
Fairmont State University
Classified Staff Board Representative

A Resolution of the Classified Staff Council

of Fairmont State University

BE IT ENACTED BY THE CLASSIFIED STAFF COUNCIL:

WHEREAS, it was mandated by the West Virginia State Legislature a study performed by the West Virginia Higher Education Policy Commission of the general revenue appropriations to each of the public higher education institutions; and

WHEREAS, the West Virginia Higher Education Policy Commission study includes a recommendation reported to the Legislature on a formula for calculating the allocation of general revenue; and

WHEREAS, the West Virginia Higher Education Policy Commission recommendation to the Legislature shall include the amounts that each public institution should receive as appropriated dollars in the general revenue budget for the upcoming Fiscal Year 2019; and

WHEREAS, taxpayer dollars collected by the state should be directed towards the education of West Virginia resident students; and

WHEREAS, the Student-Focused Funding Model rewards institutions that help students finish on time, and produce high-quality degrees.

THEREFORE, be it resolved that the Fairmont State University Classified Staff Council firmly endorses the West Virginia Higher Education Policy Commission's proposed Student-Focused Funding Model.

ANALYSIS OF A PROPOSED FORMULA FOR STATE APPROPRIATIONS TO PUBLIC COLLEGES AND UNIVERSITIES IN WEST VIRGINIA PREPARED BY THE WV HIGHER EDUCATION POLICY COMMISSION

Thank you for the opportunity to comment on the proposed funding formula that has been developed over the past nine months.

I write in support of the primary policy commitments in the proposal and the incentives it embodies to improve educational opportunities for West Virginia students. The principal recommendations in the proposal generally conform to guidelines in a recent white paper prepared by the Rand Corporation for the Lumina Foundation, now the nation's most prominent supporter of studies related to access and success in higher education. The proposal reflects sensitivity to the special needs and aspirations of West Virginia students, to defensible variation in the costs of courses and institutional missions, and to the impact of changes in the state support provided to the several institutions.

A funding formula should reflect an understanding of recent trends in West Virginia's provision of higher educational opportunity and of other relevant policies that impinge on the nature of those opportunities. Among the more salient, some obvious and well known and others less visible but significant:

1. The college-going rate in the state, especially among low-income students, has declined over the past decade. (WVHEPC)

2. State support for WV's public colleges and universities has been reduced by about 20 percent over the past three years, while student charges have increased at a rate that places the state among the top states when rates of increase are compared. (Newfield, 2016)

3. West Virginia's student financial aid programs are among the most generous per student in the country. (PROMISE Scholarship study committee) The programs, both merit- and need-based, allow the student the option of attending in-state public or private colleges. After the creation of the PROMISE Scholarship, many public institutions began to devote a majority of their legislatively permitted tuition waivers to out-of-state students. (WVHEPC)

4. There remains a strong, positive relationship between family income and academic progress in WV and elsewhere. (Numerous studies) Increases in student financial aid and the relative financial status of students they serve allow some institutions to maintain enrollment while increasing tuition and fees.

5. Over the past two decades, there has been a significant increase in the number and percentage of out-of-state students attending our flagship university and smaller increases at the institutions situated near our state's borders. (WVHEPC) State law requires that these students must be charged the "full cost" of instruction, which obviates the need for state subsidies.

6. WVU has moved its campus in Montgomery to Beckley, spent $8 million to buy the campus of the former Mountain State University, and borrowed $36 million from United Bank to support that campus. (Newspaper accounts and WVU audits) The state recently invested $16 million to improve dormitory space at the Concord University campus in Athens.

7. From 2012 to 2016, the number of engineering graduates at WVU-Morgantown increased by 214, at Marshall by 47, and at WVU-Tech by 11 to a total of 45. (WVHEPC) Moreover, WV State has announced its intent to start a chemical engineering program at its Institute campus. Historically, the number of students in southeastern WV who take the ACT, express an interest in engineering, and have the math background that predicts success is quite small. (ACT WV Profile for several years)

A focus on the achievement of West Virginia students is a main strength of the present proposal. It rewards more aggressive efforts to recruit and to serve West Virginians and will reverse some of the negative trends cited above. The renewed focus on WV students should also serve as an incentive to engage the public colleges and universities in the long-term challenge of improving the state's public schools. Incidentally, efforts to intensify recruitment of out-of-state students were justified as a means of subsidizing in-state students, of bringing "year round" tourists, and of diversifying the student population that would ultimately enrich the education of all students. However, recent data reveal that we might actually be importing students who are not as well prepared as in-state students largely because we are competing with universities in other states on the basis of cost more than quality. (WVHEPC)

The latter point deserves elaboration. Only five of the nation's flagship universities charge lower tuition to out-of-state students than WVU. The best-known flagships – Michigan, Virginia and Berkeley – charge out-of-state students twice as much as WVU. (College Board) High admission standards among publics in Virginia, Maryland and Pennsylvania divert a large share of their students to our state. Virginia's public institutions have even been called "gated communities." It appears that WVU—that has quickened the pace of tuition increases to out-of-state students over the past five years—can continue to raise those rates and still be competitive.

There is some evidence to suggest that maximizing out-of-state enrollment at WVU may have diluted the quality of educational experience there for all students. Student retention and graduation data indicate that WVU is not retaining or graduating students at the same level as other, similar flagships. (NCES College Navigator and WVHEPC) Some evidence of grade inflation is evident in some of WV's public institutions, probably a partial result of an increasing reliance on financial aid to students rather than adequate support of institutions. (Studies by the College Board found that the SAT's predictive power was diminishing largely as a result of grade inflation in small, poorly financed private colleges.)

Current funding levels of institutions serving southeastern West Virginia present a special problem of inequitable funding treatment. For several decades, West Virginia Tech received enriched funding to support its engineering mission. Over the past 15 years, including years before and after WVU's takeover of the institution, Tech's enrollment in four-year programs has plummeted and eventually seems to have bottomed out over the past several years. Still, it appears that engineering at the new Tech is withering on the vine due to competition from Marshall and WVU-Morgantown. (One reason for Tech's original affiliation with WVU was to protect it from the expansionist ambitions of Marshall in the engineering field.) Yet, the institution's level of funding still reflects the effects of policies enacted in the 1960s. Continued focus on the engineering mission and other STEM fields with intensified recruitment of out-of-state students due to the dearth of qualified prospective engineers in southern WV would minimize WVU-Tech's competition with institutions that have long served this region. However, if WVU-Tech uses its excess funding to compete with established programs in the region, then existing

institutions are at a decided disadvantage. Enriched funding would allow it to conduct a price war with other institutions. In contrast, spreading part of the funding surplus to other institutions would enable them all to harness runaway tuition increases.

I suspect that a careful analysis of higher education facility utilization in the Beckley area would reveal considerable excess capacity with the possible exception of the Erma Byrd Center managed by the Policy Commission. Both Tech and New River CTC have relatively large numbers of dual enrollment students that generally do not require additional space on college campuses. As I recall, the last space utilization study was conducted by the Policy Commission staff more than a decade ago, and thus should be updated to obtain a contemporary estimate of facility adequacy in the region.

To summarize: the proposed formula values West Virginia students, provides incentives for improving their pre-college education and for their eventual progress and success as college students, rewards institutions whose graduates become members of the state's workforce, recognizes variations in the cost of courses and institutional missions, and provides for an extended adjustment period for institutions that may lose funding when the formula is implemented.

Unfortunately, the formula does not recognize that almost all of the state's four-year public institutions are significantly underfunded compared to their peer institutions. College access strategies that focus increasingly on student aid can very well neglect the quality of the programs that students are able to attend.

Respectfully submitted,

Jerry L. Beasley

Dear Dr. Hill,
On behalf of chairs and directors of the Social Work programs in six public institutions, please accept our attached letter requesting that Social Work be included as a high demand field.

All of the representatives are willing to meet with you, or your designee, members of the Commission, and LOCEA regarding the need for professional social workers throughout the state.

Thank you in advance for your consideration.

Respectfully,
Sylvia Senften

RE: Student-Focused Funding

Dear Dr. Hill,

Thank you for the opportunity to provide comments regarding Student-Focused Funding. This letter is supported by the Program Directors of the Social Work programs asking that Social Work be added to the area of high-demand fields. Social Work is the *one* profession that is engaged in the frontline activities that aid some of the most vulnerable of our state's residents and communities.

Statewide there are six public institutions that have Social Work programs accredited by the Council on Social Work Education: Concord University, Marshall University, Shepherd University, West Liberty University, West Virginia State University, and West Virginia University. Please refer to the table below that indicates the number of anticipated graduates this year with their social work degree.

	BSW	MSW
Concord Univ.	41	66
Marshall Univ.	30	54
Shepherd Univ.	25	n/a
West Liberty Univ.	12	n/a
West Virginia St. Univ.	19	n/a
West Virginia Univ.	40	58
	167	178

Each of these programs participate in a statewide Social Work Education Consortium, (SWEC), providing training for the WV Department of Health and Human Resources (DHHR) utilizing funding available through the Title IV-E of the Social Security Act.

Undergraduate Social Work programs require, at a minimum, 120 credit hours of course work, including Social Work content covering areas such as Research, Ethics, Diversity, Social and Economic Justice, Human Behavior, Policy, Practice with Individuals, Families, Groups, Communities, and Organizations as required by the social work accrediting body, the Council on Social Work Education. Each of these content areas are competency based and assessed as part of our accreditation. Further, each of the programs deliver the "signature pedagogy" expectation of requiring a minimum of 400 hours of Field Education at the BSW level and 900 hours at the MSW level.

The need for professionally trained social workers is so critical that WV DHHR is in crisis in terms of filling jobs with qualified applicants and federal and state dollars are being directed toward workforce development in behavioral health - rural areas in particularly are impacted. Our programs are working to meet these needs and have successfully built enrollment and will need to keep building that enrollment. In particular, with the opioid epidemic - the need for clinical social workers to provide individual, group, and family therapy as well as the need for child welfare professionals, and prevention programs has never been greater.

The Bureau of Labor Statistics notes that "overall employment of social workers is projected to grow 16 percent from 2016 to 2026, much faster average for all occupations. Increased demand for healthcare and social services will drive demand for social workers, but growth will vary by specialization. Specifically:

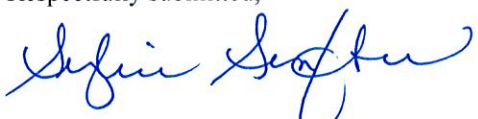

- Employment of child, family, and school social workers is projected to grow 14 percent from 2016 to 2026, faster than the average for all occupations. Child and family social workers will be needed to work with families to strengthen parenting skills, prevent child abuse, and identify alternative homes for children who are unable to live with their biological families. In schools, more social workers will be needed as student enrollments rise. However, employment growth of child, family, and school social workers may be limited by federal, state, and local budget constraints.
- Employment of healthcare social workers is projected to grow 20 percent from 2016 to 2026, much faster than the average for all occupations. Healthcare social workers will continue to be needed to help aging populations and their families adjust to new treatments, medications, and lifestyles.
- Employment of mental health and substance abuse social workers is projected to grow 19 percent from 2016 to 2026, much faster than the average for all occupations. Employment will grow as more people seek treatment for mental illness and substance abuse. In addition, drug offenders are increasingly being sent to treatment programs, which are staffed by these social workers, rather than being sent to jail."

https://www.bls.gov/ooh/community-and-social-service/social-workers.htm#tab-6

There is a critical need in West Virginia for professionals that are equipped to address the multitude of issues and concerns of our population. Please add Social Work to the list of "high-demand" fields in order to assist our colleges and universities in providing accredited professional social work education.

Thank you again for the opportunity to provide these comments.

Subject: Resolution in support of Student-Focused Funding Model

Dear Chancellor Hill:

Please find attached two copies (one signed and scanned, and one better quality) of a resolution that was pass unanimously by the Fairmont State University Faculty Senate. As noted in the resolution, we find many appealing aspects to the Student-Focused Funding Model that has been proposed by the HEPC.

Respectfully,

Joseph W. Kremer, Ph.D., CFP(r), CFA
Associate Professor of Finance
Faculty Senate President
Fairmont State University

P.S. Best wishes on your upcoming, well-deserved, retirement

Resolution of the Faculty Senate of Fairmont State University in Support of the HEPC's "Student-Focused Funding for West Virginia Public Higher Education" proposal.

Whereas, access to higher education for West Virginia Residents is essential for economic vitality and the development of an informed citizenry;

Whereas, progress toward degree completion should be facilitated;

Whereas, high-demand, high-impact degrees in healthcare, education, and engineering merit additional funding;

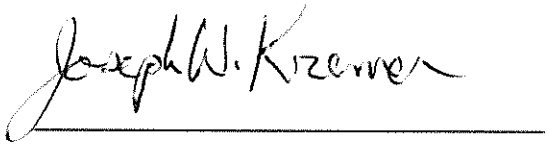

Whereas, high-risk student populations, including academically underprepared, non-traditional, and underserved minority groups need additional support;

Whereas, a formula supporting innovation in education keeps our institutions of higher education vibrant;

Whereas, no institution should encounter a sudden, unexpected drop in funding;

Be it resolved that the Faculty Senate of Fairmont State University strongly supports the HEPC's "Student-Focused Funding for West Virginia Public Higher Education" proposal, which directs funding in alignment with these goals.

Passed unanimously by the Fairmont State University Faculty Senate, April 10, 2018.

JCDA
Jefferson County Development Authority

JCDA

Jefferson County Development Authority

April 26, 2018

Paul L. Hill, Chancellor
West Virginia Higher Education Policy Commission
1018 Kanawha Boulevard East, Suite 700
Charleston, WV 25301

Dear Chancellor Hill,

On behalf of the Jefferson County Development Authority (JCDA), I write to offer our support of the proposed higher education funding model for West Virginia's four-year colleges and universities.

The JCDA is a strong proponent of higher education and the role it plays in the economic development of our community. In addition to being one of the largest employers in Jefferson County, Shepherd University provides highly qualified graduates for employment by our local businesses and serves as a marketing tool to attract new development and jobs to Jefferson County.

Shepherd University has historically been underfunded when compared to the other state-supported educational institutions. I understand that the "Student Focused Funding for West Virginia Public Higher Education" model could aid Shepherd University by adding $3.4 million to the university's operating budget for Fiscal Year 2020, which would be a 36 percent increase from its current budget. This additional funding would offer further educational opportunities for area residents and enhance Shepherd's efforts to prepare a competent workforce and future leaders for Jefferson County and the Eastern Panhandle.

Thank you for the opportunity to provide comments about the proposed new funding model. This model creates a more equitable appropriation process and greater accountability among our colleges and universities, and I strongly encourage its approval.

Sincerely,

Nicolas H. Diehl
Executive Director

Subject: comments on proposed funding model

Greetings,

Please accept my comments on the proposed funding model:

The purpose of this communication is to provide comments on the new higher education funding model proposed by the WV Higher Education Policy Commission. The proposed funding model does not address the urgent need to restore recent, severe budget cuts and to increase funding for higher education of WV residents which is the only way to improve access to higher education. I am opposed to the adoption of the proposed funding model for several reasons.

First, it does not increase funding for higher education and therefore, there will be no change in the trend of rampant tuition increases which is quickly making higher education unaffordable and out of reach of the average person in WV. Stagnant and declining funding has led to tuition increases and this invariably leads to enrollment declines. Research has shown that for every $100 increase in tuition and fees there is a 0.25% decline in enrollment.

Second, the proposed funding model is a zero-sum game in that some colleges and universities may see slightly increased funding but only at the cost of another college or university loosing that amount of funding. A fair and equitable funding model would provide the same appropriation per WV resident full time equivalent (FTE) student. The current funding levels are inequitable now with some institutions receiving much greater funding per WV resident FTE than other institutions with the latter having an associated lack of adequate financial resources and a need to increase tuition thereby decreasing enrollment.

Third, in the funding model presentation, a pure FTE-based model would reduce funding for WVU and WVU Tech. It is claimed that this equitable model fall shorts because of large cuts at these two institutions, high cost of research, variation in instructional costs across disciplines and lack of incentives for high demand fields. The high cost of research and variation in instructional cost are not unique to WVU and WVU Tech as other colleges and institutions are subject to these costs. Furthermore, WVU receives special-purpose funding for research and medical programs that are not subject to the new funding model. Therefore, these two reasons are not sufficient for claiming that a pure FTE-based model falls short. The claim that incentives are needed for high demand fields is invalid because high salaries and signing bonuses are sufficient to draw students into those fields.

Fourth, the weighting tables for the university and college categories are unfair and not justified. What is the basis for giving a 2.2 weight for an upper division liberal arts class at a university while only giving a 2.0 weight for the same type of class at a college? The cost of instruction should be about the same but more funding is being given to the universities. This is the reason that the proposed funding model is biased in favor of larger institutions. Master and doctoral level classes are given a weight of 4.4 and 5.5. Again there is no justification for this weighting. The weighting should be linear and a master's level class should be 3 and a doctoral level class should be 4.

Fifth, this biased funding for graduate level classes (4.4 and 5.5) indirectly subsidizes

non-residents. How many graduate students are WV residents? According to 2017 headcount enrollment data from WVU about 60% of their graduate students are non-residents. In many cases, non-residents can move to the state and become residents and then leave after they have completed their graduate degrees. How does this benefit the state? It does not benefit the state at all. The taxpayers would still be subsidizing the funding of non-residents at the research institutions.

Sixth, it is unclear why Glenville State College's weighted credit-hour production is a round number. Every other institution is not rounded to the nearest one thousand. I would question the accuracy of that number. If there is not an accurate measurement of this critical variable then that impairs Glenville State College.

Seventh, the proposed funding model does not give sufficient weighting to high risk students. Many of the state's college students and potential college students are high risk. The instructional costs associated with this student population are much greater. Additional support services such as tutoring and advising are needed along with a much lower student to faculty ratio. These additional costs are not sufficiently compensated for in the proposed funding model.

Eighth, the proposed funding model favors research over instruction by giving 10% extra weight to WVU and Marshall along with 2.5% extra to WV State University. There is no basis for this in state code. The mission of higher education institutions are three fold with instruction, service and research given equal emphasis. A strong argument could be made for increased emphasis on instruction since only about one quarter of WV residents has a college degree.

Ninth, the approximately $1 million cut that would result from the proposed funding model would devastate Glenville State College. The college has lost about 20% of its state funding during the last few years and another 17% cut would put the institution into a dire situation. A negative feedback would occur where tuition would increase and then enrollment would decline. It would only be a matter of years before the college would be forced to close or unlikely privatize. There are already an excess number of private institutions in the central part of the state. The loss of access to higher education in the central part of the state would be devastating as this area is also home to severe poverty.

Tenth, if the cuts would cause Glenville State College to close then the state would be liable for the $39 million dollars in debt owed by the college. The funding model would be penny wise and pound foolish in this regard. A million dollars would be saved but $39 million plus interest would have to be paid for in full to prevent loss to the state credit rating. The debt obligation of Glenville State College will be paid off by leveraging state funding with student tuition, federal loans and grants along with private donations.

Eleventh, the hold harmless provision is too short and goes into effect too quickly. Institutional change takes time and new strategies and tactics to obtain a larger portion of the budgetary pie would have to be developed. A permanent 100% hold harmless provision should be granted to smaller institutions.

Twelfth, the proposed funding model could create some disreputable or unintentional incentives for institutions to gain more funding. For example, institutions would now have incentives to "game" the system by getting more non-resident graduate students to become residents. Institutions would now have incentives to offer massive open online courses that dramatically increased their student credit-hour production. Institutions would now have incentives to pressure faculty to reduce the rigor of courses to ensure that students complete milestones and graduate on time. The need for administrators to optimize the institution's ability to gain state funding would

take away from time spent managing the institutions.
In closing, let me reiterate my strong opposition to the proposed funding model. It will not have the desired effect of improving access to higher education in WV. It will only have the effect of making large institutions larger and will eventually force smaller institutions to close. This will decrease access to higher education in WV. The only way to improve access, impact and success is to dramatically increase funding for higher education in WV. Funding should be increased to a level where the tuition, room and board at all state colleges is fully covered by Pell grants. The simple way to set these rates is $1000 each for tuition, room, and board each semester. That would enable students receiving Pell grants to fully cover those expenses. Higher education would become much more affordable for the average WV family. This increase in funding is the only way to ensure that more students become college graduates in WV.

Respectfully submitted,

Subject: Proposed Funding Formula comments

Hello,

I'm writing in support of the proposed changes to the West Virginia Higher education funding formula. I believe this new formula makes much needed improvements to the way we fund higher education in West Virginia by focusing our limited tax dollars on West Virginia students. In addition, I'm pleased to see a focus not just on access, but also on timely completion. I'm happy to see that we are beginning to address more facets of what is ultimately a very complex process in regards to student success.

One area in which I do have more concrete feedback would be to consider your discipline clusters in regards to high impact majors. Your health cluster contains nursing, allied health, and health profession, but excludes psychology and sociology. Both of these degrees at the baccalaureate level feed students into important position in social services, mental health, addiction counseling, etc, which given the opioid epidemic in West Virginia is something we desperately need more of. There is a shocking lack of trained individuals in these areas across many counties in West Virginia. As can be noted from the WVRHA Health Data Portal linked below.

April 26, 2018

Paul L. Hill, Chancellor
West Virginia Higher Education Policy Commission
1018 Kanawha Boulevard, East Suite 700
Charleston, WV 25301

Dear Chancellor Hill:

I write in strong support of the Student-Focused Funding Model presented at the Higher Education Policy Commission's March 23, 2018 meeting. It's often said in higher education that "what is measured is what matters" because that is where we ultimately will devote our time and energy. Therein lies the strength of this funding model; it measures those factors that are most central to our mission as public higher education institutions. In other words, it measures what matters: student access, progress toward degree, and graduation. Equally important, it does so in a manner that is fair and equitable across West Virginia's wide range of public institutions.

Having researched numerous performance funding models across the United States in my previous position with another state system of higher education, I am impressed with the comprehensive and thoughtful analysis that has gone into development of this West Virginia model. Built-in factors (such as greater weighting given to research institutions, higher-level courses, higher-cost programs, high-risk student populations, and high-demand fields) take into account the uniqueness of each of our institutions. This is especially important to Bluefield State as we deliver high-cost, high-demand accredited programs such as nursing and engineering technology to many high-risk students.

Another key aspect of the model is the hold-harmless provision, allowing it to be fully phased-in over a five-year period. If the requested funding is provided, no institution will experience a decrease in state appropriations for at least the first three years, allowing sufficient time to prepare for and adjust to the anticipated change. The model also should offer greater predictability of funding which is crucial for effective institutional planning.

I am especially enthusiastic about the proposed Innovation Fund that will eventually award grants to institutions for the implementation of new initiatives targeted to increase student success. This provides campuses with an important incentive.

You and your staff are to be commended on the thorough and careful analysis that has produced this model. It is much needed and long overdue. I urge the Higher Education Policy Commission to adopt and implement the Student-Focused Funding Model as presented, provided the Commission also is granted the funding that will be required for its full and successful implementation.

Thank you very much for your consideration.

Sincerely,

Marsha V. Krotseng

Subject: SUPPORT FOR NEW HIGHER ED FUNDING PLAN

Dear Chancellor Hill:

Please include this letter of support regarding the proposed new funding formula for West Virginia's public four-year colleges and universities.

The Eastern Panhandle Business Association (EPBA) is an independent, non-partisan organization that strives to protect, preserve and advance free enterprise's goals of economic freedom and opportunity through political action. Founded in 1991, the EPBA supports measures to create a stronger West Virginia by improving the business climate of our state in general, and our Panhandle in particular. Education reform is one of our five identified priorities for which we advocate.

We salute your efforts to bring the long overdue measure of funding fairness for WV's Higher Ed institutions. The current funding method has historically underfunded some WV four-year colleges and universities, including Shepherd University.

Best practices for State government expenditures should include the concept of maximizing return on investment. State funding of WV's Higher Ed institutions is no exception. We feel the proposed new funding plan is a giant step in the right direction. WV should be investing more dollars for Shepherd University to take full advantage of its strategic proximity to a vast pool of potential students within a 90-minute drive of Shepherd University—which includes the DC/Baltimore Metro areas.

The EPBA stands ready to encourage the West Virginia Legislature and the Governor to support and implement the plan. Thank you and your staff for your fine efforts.

Sincerely,

Walter Duke

Chairman, Eastern Panhandle Business Association

cc: Eastern Panhandle Legislative Delegation

cc: Dr. Mary Hendrix, President of Shepherd University

Subject: WVU Response to Proposed Funding Model.pdf

Dear Chancellor,

Please find attached a response to the proposed funding model.

Cordially,

Gordon

Our Summary and Request

We are at a pivotal moment, when higher education and the State must band together to address the headwinds we all face. That is why it is so disappointing that the staff of the Commission has proposed a funding model that will not enhance educational outcomes or economic growth in the state. As fiduciaries of the state's only Carnegie R1, land-grant institution with comprehensive health sciences programming, which has the highest graduation rates, graduates the most resident students, provides the most service, and generates the most research and grant dollars of any institution of West Virginia, we object to the Commission proceeding with this proposed funding model.

This model is not an outcomes-based funding model. Rather, it is a reallocation model that does two things:

First and foremost, it reallocates funding away from West Virginia University and to other institutions.

Second, it serves to transfer governance-based decision-making from the institutions – a move contrary to recent actions taken by the Governor and the Legislature.

West Virginia University actively supports additional funding for all institutions of higher education, including those other than WVU, as evidenced by our public support of Senate Bill 284 – which intended to provide for additional investment and access to the state's community colleges. It was and remains a noble idea.

Institutions of higher education across the state are underfunded and in desperate need of additional resources. We suspect many of our colleagues will support this model because their appropriations would increase, at least initially. In fact, we are aware of at least one institution that has publicly solicited support from alumni, students and employees for the proposed model to the Commission. Please note that we have not taken that approach. Although we could have engaged in a massive letter writing campaign, we believe the more appropriate approach is to focus on the challenges of the proposed model.

It is difficult to comprehend why the Commission would propose and support any model that would drastically reduce funding over the long term to any four-year institution in our state. We request that the Commission abandon the current path advocated by your staff. Instead, we request that the Commission take steps toward

PO Box 6201 | Stewart Hall
Morgantown, WV 26506-6201
O 304.293.5531 F 304.293.5883

creating a funding model that incentivizes the correct goals; is developed by the institutions with dialogue from all stakeholders; recognizes the different benefits that each institution brings to the table for West Virginia; and incentivizes successful graduation and entry into the workforce of college-going students. To that end, WVU will propose an inclusive process to produce an alternative model for the Commission's consideration.

We also believe that, before any funding model decisions are made, the Legislature should review the overall structure of higher education to determine how two-year and four-year higher educational outcomes could be enhanced and the State return on investment in higher education increased. Finally, we suggest that the Commission should advocate for additional investment by the State in higher education rather than supporting the redistribution of a funding pool that is already insufficient.

A Re-Introduction to West Virginia University

West Virginia's higher education institutions find themselves at a unique and challenging juncture. Collectively, funding for higher education in West Virginia has declined by over $60 million, including $40 million at West Virginia University alone, over the past seven years. Conversely, many states are recovering from the economic troubles of 2008 and 2009, and are investing more into higher education, threatening to leave our institutions at a competitive disadvantage.

WVU has been turning these challenges into opportunities. Our best chance of success comes with the drive, courage and determination to reinvent who we are, what we do and how we do it. We have adopted a mindset focused on innovation, entrepreneurship, strategic risk-taking and purpose. At every corner, we are challenging ourselves to become better, each and every day, all to provide enhanced opportunities for our students and our state.

Our willingness to partner with and serve West Virginia is evidenced in the significance of our investment in the following:

- Providing the most comprehensive set of offerings and opportunities of any institution in the state – over 400 degree programs across our three campuses. They include 194 degree programs which have earned 199 specialized accreditations, 39 of which are medical and dental residency programs.

- Educating students from all 55 counties every year. We have the highest graduation rate in the state, and the rate of our resident students is even higher. Our Honors College enrollment is 66.7% West Virginia residents: 1,745 of West

Virginia's brightest students.

- Producing winners of the Boren, Gates, Schwarzman, Truman, Critical Language, Fulbright, Gilman, Newman Civic and Goldwater scholarships as well as NSF Graduate Research Fellows in the last four years. Of the WVU students who win these prestigious awards, nearly 80% of the recipients in the last four years have been in-state students.

- Improving the health of West Virginians through the Robert C. Byrd Health Sciences Center, which educates health professionals, conducts basic research in clinical and rural healthcare delivery, and provides professional education and direct healthcare practice through its large network of regional training centers. There are 743 rural faculty field-practitioners and 456 training sites supporting delivery with community outreach and care through specially-designed programs through WVU Medicine. We also provide more than $6 million worth of unreimbursed dental care annually.

- Boosting the economy through West Virginia Forward. Many of the ideas circulating today – rebranding our state, site readiness and creating an entrepreneurial ecosystem focused on business startups and innovation – are all part of the blueprint created by West Virginia Forward.

- Supporting entrepreneurship education through two innovation labs, one in Morgantown and one in Beckley, for students and community members.

- Providing services through the WVU Women's Business Center, the only one in West Virginia.

- Recruiting world-class health sciences faculty in cancer, heart and vascular, children and neurosciences.

- Discovering elevated emissions in Volkswagen vehicles.

- Enhancing radio astronomy and work at Green Bank, including advocating for funding from the National Science Foundation and sustaining Green Bank and local jobs.

- Developing ideas for a rebirth of the manufacturing industry and the protection of our energy industries, including working with the Department of Commerce and the China Energy Group.

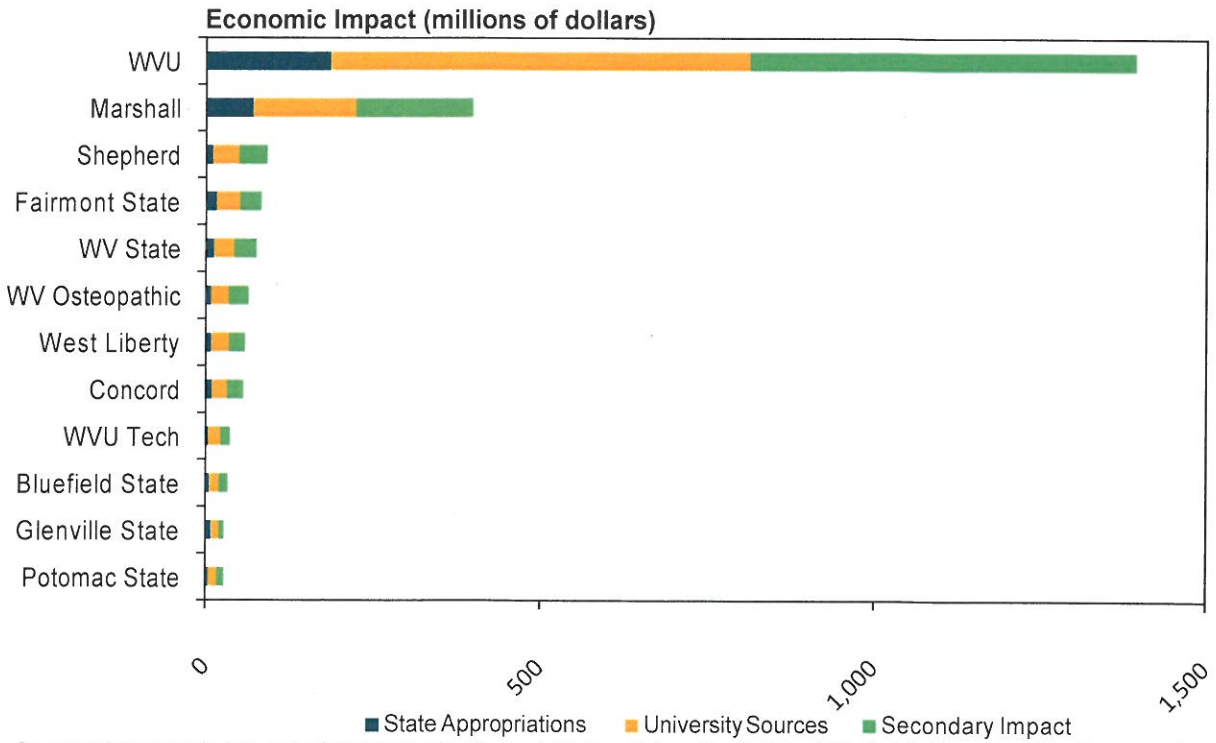

- Bringing in well over $150 million in grants and contracts to our state, year after year.

- Attracting approximately 2,500 first-time freshmen from out of West Virginia into our state, every year. For example, last fall we had 15,377 nonresident students enrolled who collectively pay for their full cost of education and do not burden this institution or this state, but instead enhance it by adding to our economy, with many staying in West Virginia beyond graduation. These students make it possible for West Virginia students to access a broad array of opportunities because of the financial support they bring.

- Providing much needed educational, health, economic, fire safety and agricultural services to communities in every county of the state through our Extension Service, particularly 4-H.

Our economic impact to the state is significant, according to a study commissioned and promoted by the Higher Education Policy Commission:

Economic Impacts of Public Four-Year Institutions in West Virginia

Source: "Economic Impact of Public Institutions of Higher Education in West Virginia", Bureau of Business and Economic Research, 2016.

As is stated on the Higher Education Policy Commission's website:

> WVU produced the most significant impact of any four-year institution based upon State investment, with a ratio of $7.50 for every dollar invested by the State. The impact figures for Marshall and WVU do not include medical facilities associated with the universities, which generate substantial economic ripple effects. For example, according to Dr. John Deskins, BBER director, the economic impact of WVU medical facilities alone during FY 2014 was $1.9 billion.

In recent years, we have also focused on making our University more efficient. We have worked with the Legislature to allow us to adopt modern human resource policies that focus on merit and performance. And we took a political risk to preserve WVU Tech by moving it to Beckley; early indicators suggest that this investment was well-founded. Indeed, just last week staff representatives from WVU Tech informed the WVU Board of Governors that the move is the best thing that could have happened to the institution.

We believe that governance is best handled at the local level. ***Indeed, one of the foundational elements underlying all of our efforts is that a one-size fits all approach leads to a wasteful bureaucracy that holds institutions and students back and drives everyone toward mediocrity, hindering the fulfillment of educational goals and missions.*** The leaders of this Commission must realize that the best policy empowers those best suited to make decisions in the most efficient manner possible.

The Problems with the Funding Model

1. *The Hold-Harmless Provision and (Re-)Centralization of Power at the Commission.*

To make the formula more palatable to those losing funding, the Commission staff have proposed a three-year, hold-harmless period and then a two-year phase in of the formula. To make this work, the Legislature and the Governor would need to agree to provide an immediate, additional $13.5 million in funding toward four-year institutions of higher education (assuming that the model is also applied to two-year institutions, that amount of additional funding would need to increase). Given the recent trend of reductions in funding for higher education; the recent prioritization of funding for primary and secondary professional educators; the continuing costs of medical inflation that has a significant impact in funding for the Department of Health and Human Resources and the State's budget; the upcoming recommendations of the Public Employees Insurance Agency Task Force; and the priority from the Governor in making two-year community and technical college more affordable, the Governor and the

Legislature may not have sufficient funding to support this increase in appropriations.

Once again, we fully support additional investment in higher education and agree it should be a priority. Unfortunately, predicating the application of this model on increased funding and assuming those funds will be available is putting the cart before the horse. The proposed model cannot move forward without a significant additional infusion of moneys into higher education, and we ask that the Commission indicate this publicly and in writing.

Releasing this study without appropriate vetting will also lead to unintended consequences. In the absence of additional moneys, will the Commission advocate that the Governor and the Legislature reduce appropriations to West Virginia University and Glenville State College immediately to start benefitting other institutions of higher education? The additional funding required in the model is presented as an assumed afterthought. In this environment, it is anything but a certainty.

Another significant problem with the funding model occurs after the application of the hold-harmless provision. As indicated above, the hold-harmless period is in effect for a period of three years, and then it is phased out over a two-year period. Therefore, assuming all facts stay as they currently are, the appropriations of West Virginia University and Glenville State College will be reduced by $13.5 million at the end of this period. Under the model, because the four-year institutions that benefit from the model would have already seen their allocations increase in Fiscal Year 2020, an additional $13.5 million for higher education would remain after the reductions to West Virginia University and Glenville State College.

The Commission staff has proposed to increase its own budget at the end of the hold-harmless period with this $13.5 million to hand out as it sees fit. The result of this move is clear: The Commission, not the Governor or the Legislature, will be playing a larger role in making funding decisions for higher education.

There is no question that West Virginia University and the Commission staff have different philosophies relating to higher education governance. We believe that governance decisions are best made locally. We do not believe that a one size strategy fits all. In 2017, House Bill 2815 was passed, which appropriately placed more of that decision-making at the local level ***for all four-year institutions***. House Bill 2815 was passed in the House of Delegates by a margin of 97-2 and in the Senate by a margin of 30-4. The message from the passage of that legislation is clear – governance is a local matter. Indeed, recognizing the ability of West Virginia University, Marshall University and the Osteopathic School of Medicine ("Exempted Schools") to govern themselves, the Governor proposed and the Legislature overwhelmingly enacted House Bill 2815, which

made the Exempted Schools by and large not subject to most authority of the Commission. This funding model and the reclamation of the $13.5 million of Legislatively allocated funds by the Commission staff would increase their authority over funding decisions during and after the hold-harmless period and is contrary to the provisions of House Bill 2815 – particularly as it relates to the Exempted Schools – and to good governance.

2. ***The School of Osteopathic Medicine Has Been Excluded from the Commission Staff's Proposed Model. Marshall University and West Virginia University's Professional Programs Should be Treated in the Same Manner.***

The Commission staff has excluded the School of Osteopathic Medicine from the model, presumably because the costs and delivery of osteopathic degrees cannot be adequately compared with other institutions that primarily focus on undergraduate education.

The medical, dental, pharmacy, legal and other professional programs at West Virginia University (and Marshall University), however, are included in the model. We believe that, just like the School of Osteopathic Medicine, West Virginia University's and Marshall University's professional schools should be excluded. The Commission staff noted that it closely followed the Nevada model. We note that the Nevada model ***excludes*** medical, dental and law schools.

Not only has the Commission treated Marshall University and West Virginia University different than the School of Osteopathic Medicine, but the weighting factors in this model drastically undervalue professional degrees at Marshall University and West Virginia University. North Dakota's model, which does include medical schools, has provisions that would translate to a weighting factor for medical schools of 20 and legal education of 7.4. In the Commission staff's model here in West Virginia, medical schools at WVU and Marshall would only be weighted at 8.8 while our law school would only be weighted at 4.4 (lower than PhD students in the humanities, which are weighted at 5.5).

3. ***The Model Proposed by the Commission Staff Would Be One of the Most Aggressive and Far Reaching in the Country.***

In its proposal, the Commission staff indicated that over 37 states have adopted funding formulas. But the application of funding formulas in most of those states is far different than what is being proposed for West Virginia. During the last Commission meeting, Commission staff indicated that the particular weighting model proposed was in place in only two or three jurisdictions. Additional analysis reveals the critical nature of what the Commission staff has proposed. Note the following:

- In Virginia, the model is only used to drive the ability to retain unexpended funds.
- In Washington, Wyoming, Wisconsin, Texas, and New York, the model only applies to two-year schools.
- In North Carolina, Oregon, and Utah, the formula funding model has only been used to allocate money (which was new money), and that has only happened one time.
- In Arizona, Kansas, Missouri, Oklahoma, Michigan, and Georgia, the funding model only applies to new appropriations.
- In Minnesota, a small portion of funding is reserved until performance measures are met.
- In Pennsylvania, New Mexico, Montana, Florida, Indiana, and Illinois, formula funding drives less than 6% of funding.
- In Arkansas, Colorado, Louisiana, and Nevada, the funding formula drives less than 30% of funding.

Therefore, only Massachusetts, North Dakota, Ohio, and Tennessee have funding formulas that allocate anywhere near as much as is proposed to be allocated in the Commission staff's model, and even those models do not follow the approach advocated by the Commission staff. The Commission staff's proposal does not follow the norm of over 30, or even a handful of jurisdictions.

Rather than making such a radical change, perhaps the Legislature should take the intermediate step of increasing funding for higher education and basing that additional funding on success outcomes or on institutions that demonstrate a clear justification for additional funding.

4. *The Representations Made Relating to Out-of-State Students Are Misleading and Unfair to the Work of West Virginia University.*

West Virginia University has heard individuals from the Commission indicate that we do not fare well in this model because the Commission staff's proposal is only based on funding for resident West Virginia students (as opposed to nonresident students). This is inaccurate and a red herring. First, the assumption in that conclusion is that the Legislature has previously subsidized the tuition for nonresident students at West Virginia University. They have not.

In fact, information provided annually by the Commission demonstrates that our nonresident students pay for the full cost of instruction. We believe that the Legislature has taken steps to appropriately fund the different nature and mission of West Virginia University. We are a land-grant institution that serves all 55 counties. We have a comprehensive set of academic offerings that provide a wide array of opportunities for our students. And our graduation rates and research exceed any other institution in the state.

Second, it is unfair and unwise to justify the defunding of West Virginia University on the fact that we have the ability to attract nonresident students. Our ability to attract nonresident students should be seen as a positive, and not a negative. Moreover, our commitment to serving our resident students is stronger than ever.

The chart on page 12 of the Commission staff's model relating to nonresidents seems to indicate that West Virginia University over that time period has de-emphasized the effort to recruit and retain residents. That implication is false. The referenced chart shows the portion of all students who are in-state students. The reason as to why an institution has fewer in-state students as compared to the total population could result from many different things.

For example, if an institution were no longer able to attract nonresidents students and also lost in-state students (but lost nonresident students by a higher percentage than resident students), their outcome on the Commission staff's chart would be better in terms of serving the state. By contrast, if a school increased its resident population and its nonresident population because it became a more attractive place to go to school (but the nonresident rate increased more than the resident rate), then the chart would show them as not serving the state as well. The chart on page 12 is misleading and should be removed.

5. ***The Model Incentivizes Institutions to Attract Students Who May Not Be Well-Suited for Education at a Four-Year Institution.***

In this rapidly evolving economy, there is a tremendous need for high school students to continue their education after graduation. There is also a compelling case to be made that not every one of those students should attend a four-year institution. We feel strongly that a robust higher education system must include a strong commitment to certificate and community college programs as well as four-year and post-graduate programs. We also know that not every student is ready or well-suited for a four-year undergraduate baccalaureate degree program.

In the Commission staff's model, an ***attempted*** credit hour by a student who is "high-risk," e.g., an economically disadvantaged, academically underprepared, non-traditional adult, or an underserved racial or ethnic minority, gets 50% more credit than a non-high-risk student.

By contrast, in the Nevada model, the weighting of high-risk students is only 40%. Additionally, the Nevada model provides "high-risk" weighting to Pell-eligible and minority students. It ***does not*** provide such weighting to academically underprepared and nontraditional students. Furthermore, the Nevada model applies this weighting only to the portion of the model that allows institutions to earn funds that have been reserved. This model is therefore fundamentally different than that proposed in Nevada.

The proposal by the Commission staff will have two negative impacts to the students of West Virginia. First, it incentivizes four-year institutions to recruit high-risk students when they may be better suited to other forms of education. Second, it will incentivize four-year institutions to compete with two-year institutions. In other words, a student who may be academically underprepared for a four-year degree program may be successful in a two-year degree program. This model, if enacted, will incentive four-year institutions to compete for students who may be better served elsewhere. It is in neither the state's nor the students' best interest to motivate financially challenged four-year institutions to recruit academically unprepared students who may very well have a better, brighter and more financially productive opportunity elsewhere. Furthermore, by rewarding "attempted" hours, the incentive is biased toward getting these students in the door even if they fail, which is addressed in our next concern.

6. ***The Access, Success and Impact Pools Defy Logic.***

A student-focused, outcomes-based funding model should motivate institutions to focus on a student's progress toward and actually obtaining a degree. Seventy-percent (70%) of this model, however, is based on ***attempted credit hours taken***. In other words, under this model, an institution is rewarded with funding if a student attempts yet receives a failing grade in a course or simply drops the course. Financially incentivizing institutions to enroll academically underprepared students in courses, regardless of their ability to succeed, is a deeply troubling consequence of this model. The model should be more heavily based upon students actually progressing toward a degree. We are unaware of any other model that gives so much weight to credit hours ***attempted*** and rewards institutions for students who take, yet fail, courses.

On page 4 of the Commission staff's proposal, it indicates that any new formula must "promote innovation and student success" and "reward institutional successes with additional funding." It is unclear how basing 70% of the model on ***attempted*** credit hours

is an appropriate success mechanism.

The weighting factors of student credit hours by discipline are ostensibly related to the cost of delivery of those credit hours. However, courses in business are weighted by the same value as psychology, history, and, English, among others. Given the very significant market difference in salaries between business faculty and faculty in the other disciplines, it is hard to imagine that the cost of instruction per credit hour is similar.

For most disciplines the relationship between the lower division weighting and the upper division weighting is more than double (lower division weighted at 1.0 and upper division weighted at 2.2). However, every course with a lower division weighting of more than 1.0 has an upper division course weighting that is less than double that value. The relationship between the cost of lower division delivery and upper division delivery should be consistent. This observation also applies to the relationship between lower division weightings and both the master's and doctoral weightings as well. For example, doctoral work in English is weighted five-and-a-half times the lower division weighting but doctoral work in engineering is only weighted four-and-a-half times the lower division weighting.

Additionally, master's degrees in education carry the lowest weighting of any discipline within the formula. Given the emphasis on teacher education in other sections of the model, the low weighting of this coursework does not make sense.

Finally, the Success and Impact portions of the model proposed by Commission staff have the primary aim to reward institutions with resident students who are on track for and do graduate, but the Success and Impact portions only account for 30% of the model. We believe that institutions should receive more credit for advancing students toward their degrees and actually graduating. If the goal is to increase outcomes, the model ought to be weighted to promote graduation and entry into the state's workforce.

7. *West Virginia University, the Highest In-State Graduation Rates, Fares Poorly in the Impact Pool.*

The Impact Pool rewards institutions based on the number of degrees awarded to resident students, with credit for nonresident students who remain employed in the state after graduation. West Virginia University has the highest graduation rates of any institution in the state. According to the Commission's records, WVU should also get the most credit for nonresident students who remain in the state. Yet if you analyze the manner in which the Commission staff's Impact Pool portion of the model operates, WVU receives a smaller share of the Impact Pool than we do for the Access Pool. It is unclear how this allocation could be reached, given the inputs into the model.

Specifically, the following provides a summary of retention and graduation rates for students at public, four-year institutions in West Virginia.

Institution Name	Graduation Rate
West Virginia University	57%
Shepherd University	46%
Marshall University	45%
West Liberty University	43%
Glenville State College	35%
Concord University	34%
West Virginia State University	29%
Fairmont State University	28%
Bluefield State College	25%
West Virginia University Institute of Technology	21%
Institution Name	**Full-time Retention Rate**
West Virginia University	79%
Marshall University	75%
West Liberty University	72%
Glenville State College	70%
Bluefield State College	69%
Fairmont State University	69%
Concord University	67%
Shepherd University	60%
West Virginia State University	58%
West Virginia University Institute of Technology	54%

Source: IPEDS Data Center

Moreover, without access to the data underlying the model, which we have requested without success, it is unclear how the weighting of the model could cause such contradictory results for Success and Impact given the numbers for retention and graduation rates.

8. *The Model Undervalues the Research Undertaken at West Virginia University.*

The Commission staff recognized that the model should take research activity into account, given the benefits to students and the state and the costs relating thereto. In the proposed model, the Commission staff has proposed a 2.5% research institution weight for West Virginia State University and a 10% research institution weight for Marshall University and West Virginia University. The weighting measure for West Virginia University, however, is inadequate given the levels of research that are being

conducted.

According to the National Science Foundation, between 2013 and 2016, West Virginia State University had between 28 and 115 employees working on research and development, while Marshall University had between 485 and 517 individuals working on research and development. At West Virginia University, between 3,455 and 3,659 individuals were involved in such research and development.

As it relates to attracting research funding, a similar level of disparity exists. In 2016, West Virginia State University had $5.2 million in research expenditures; Marshall University had $21 million in research expenditures. By contrast, West Virginia University had $172 million in research expenditures.

In the proposed model, WVU's research weighting is four times the amount as West Virginia State, even though we do 33 times as much research, and our research weighting is the same as Marshall, even though we do over eight times as much research.

We are not detracting from the important work undertaken by Marshall and West Virginia State University, and we believe that the funding model should reflect those efforts. Where the model falls short, however, is in recognizing that the amount of research being conducted at WVU is far different in terms of scope and magnitude. Accordingly, our research weighting is inadequate overall and compared to the other institutions, in the model proposed by the Commission staff. One size does not fit all.

9. *The Model Undervalues the Service Performed by West Virginia University.*

The Commission staff excluded from the model State appropriations that are dedicated toward a specific purpose. On this basis, $28,154,323 in appropriations for West Virginia University was excluded from the model. The Commission staff, however, did not fully account for moneys that the University currently is expected to spend relating to its service mission to the state.

For example, while our State-provided land-grant match is $7.8 million, the University dedicates another $10.3 million for Extension Services across West Virginia, for services such as fire training and agricultural support to the state's agricultural industry. We also continue to spend over $500,000 on health-related programs such as multiple sclerosis, Alzheimer's and women's health even though 80% of those appropriations have been eliminated. We provide approximately $6 million in unreimbursed dental care. Finally, we spend over $2 million each year on mine safety and certification. As appropriations have declined, State leaders have impressed upon the University the need to continue to support these activities. Including those revenues

associated with these activities in a student-driven, outcomes-based funding model is inappropriate.

In addition, the University funds extensive STEM education training throughout the state. For example, the WVU Institute of Technology educates more than 350 teachers in hands-on STEM education, including providing classroom kits to teachers. The ultimate impact of that exceeds over 10,000 public school children through improved STEM education. The University, through its engineering and physics work, also provides opportunities in robotics and coding camps. And the University also, on a consistent basis, hosts the Governor's Academies, which are not fully funded by the State.

10. ***The Adverse Impact of the Proposed Funding Model on West Virginia University Will Be Significant.***

On page 40 of the proposal, Commission staff assert that the proposed reduction to WVU constitutes a 1.2% reduction in funding as part of our overall budget, which is misleading and unjustified. First, a significant portion of that overall budget is restricted because they are dedicated to specific activities, such as athletics, student housing and research. If you remove athletics, grants and contracts, gifts, and investment income from our budget, our revenue is reduced to $613 million from over $1 billion. As a result, a reduction in funding of the magnitude proposed by the Commission staff, particularly, given the recent declines in appropriations, would be devastating. And the message that this model sends to the University is that the State does not value the service and outcomes it provides.

Relatedly, as the State has reduced its funding for higher education, WVU has developed an entrepreneurial model so that it can continue to fulfill its mission and serve West Virginia. Our success is now being used against us, and the remaining funds we receive and use to support our mission are being threatened. This claw-back mentality is part of what is hurting this state. Instead of punishing the successful, the State should be finding ways to support them.

11. ***West Virginia University's Data Requests to the Commission Staff Remain Unfulfilled.***

At the last Policy Commission meeting, Commission staff indicated that it would be transparent, that it would share data and that it would do everything within its power to help institutions understand the model it was proposing. Two weeks ago, we sent to the Commission a data request.

In response, the Commission staff indicated that it did not have the ability to

provide much of the data that we have requested. And to date, the only information we have received is feedback on our own data.

Without the data we have requested, we cannot understand the full implications of this model and comment on it fully. We hope that the Commission understands that the proposed reductions in funding to West Virginia University are a serious matter and that University officials and policy leaders need to understand the workings of the model.

On this basis, we request the opportunity to provide additional comments once the Commission staff has fulfilled our request for data and we have had sufficient time to respond in writing to the Commission. We also request that this model not move forward, including any presentations to the Legislature, until the Commission itself has had the opportunity to review our comments and the proposed alternative suggestions that will be forthcoming from West Virginia University.

Conclusion

Instead of embracing a leadership and advocacy position for all of the institutions of higher education and how their unique missions serve our state and its students, the staff of the Commission has chosen a path that recommends a redistribution of funds, without transparency or accountability and reclaims authority over institutions through future financial allocation. We again implore the Commission to do what is best for the students of our state and use this as an opportunity to improve higher education in a meaningful way.

Sincerely,

E. Gordon Gee
President, West Virginia University

Subject: Comment on proposed funding model

Dear Chancellor:

I am concerned with the apparent undervaluation of the medical school component in the proposed Student-Focused Funding Model. The apparent multiplier for the doctoral courses in the schools of medicine is 6.6. This makes the "cost" of producing doctoral-level SCHs in medicine equivalent to producing those same SCHs in nursing and business and 75% as much as producing doctoral SCHs in engineering and the sciences.

For Marshall's School of Medicine, A rough accounting of the funding for those SCHs and the additional funding for medical graduates yields a total model funding amount that is roughly one sixth of the actual appropriation for the MUSOM. Arguably, that appropriation is much less than the real cost of educating our medical students, but even if it were an appropriate amount, the model is providing only 18% of that amount.

I would suggest a more appropriate accounting for medical school (and other health science "1st professional" program) SCHs would make the model much more palatable.

Sincerely,

Michael McGuffey
Senior VP for Institutional Research, Planning and Information Technology/
Special Assistant to the President

West Virginia Higher Education Policy Commission
c/o Chancellor Paul Hill
1018 Kanawha Blvd E #700
Charleston, WV 25301

To whom it may concern;

This letter is being sent to the West Virginia Higher Education Policy Commission (HEPC) with regards to the funding formula that has been proposed by the HEPC for West Virginia's four-year colleges and universities. Based upon the information provided to the public on this matter, we strongly ask that the Higher Education Policy Commission reconsider the proposed funding formula.

As the elected student body leadership at West Virginia University, we find that there are a number of components of the proposed higher education funding formula that would negatively impact our University and the nearly 30,000 undergraduate, graduate and professional students we serve and represent.

We believe in the value of higher education, and we view it as a critical component in moving West Virginia forward into the future. Continued cuts to higher education do not align with this vision. As the largest economic driver of growth in the state, West Virginia University has already received over $40 million in reductions in state appropriations over the past seven years. Instead of continued cuts to our state's flagship, R1 university, we strongly contend that we must be actively investing in our young people and talent. Simply put, this proposed funding model does not achieve this goal. Now more than ever, it is crucial we demonstrate a firm commitment to all of our state's people.

In addition, our students provide tremendous value to all corners and across all parts of the state. Through academic research, community engagement and service, our student body fully embraces our land-grant mission to service. This past year, WVU's Student Government Association helped launch our new "Service First" initiative. Through this day of service, we were able to serve in communities all across our state. This is one of many examples of how our students work each and every day to give back to the State of West Virginia.

STUDENT GOVERNMENT ASSOCIATION

As proud Mountaineers, we value our degrees from West Virginia University, and we believe in the strong purpose of this University. Through our three campuses in Morgantown, Beckley and Keyser, WVU is bringing the world to West Virginia, but more importantly, we are taking West Virginia to the world. As we continue to create a 21st century West Virginia, we must make strategic changes to improve our state's well-being and our people's quality of life. We are not advocating for other higher education institutions to be cut, but rather, we strongly implore the Higher Education Policy Commission to realize the value of investing in West Virginia's flagship, land-grant University.

April 27, 2018

Dr. Paul L. Hill
Office of the Chancellor
West Virginia Higher Education Policy Commission
1018 Kanawha Blvd. East
Charleston, WV 25301

Chancellor Hill,

I am writing to show my opposition to the proposed funding model by the West Virginia Higher Education Policy Commission. As previously stated by WVU Provost Joyce McConnell, this proposed funding model will be absolutely detrimental to the University system, particularly to WVU Tech.

Our campus in Beckley represents 1,623 students, 143 faculty and 121 staff. This campus also represents a chance for new and powerful opportunities in Southern West Virginia in employment, in economic growth and in the kind of innovation that is going to carry this state into the future.

In addition to educating students to enter the workforce, we provide training and support to K-12 STEM educators. We provide continuing education courses to keep our state's career technical education teachers on the cutting-edge. We provide STEM training to teachers across West Virginia – training that impacts more than 10,000 public school students through improved STEM education. We provide camps and events throughout the calendar year to inspire our youngsters to do more, to explore their interests and to build careers that will allow them to enjoy the richness of our great state as future professionals in a wide range of fields.

We're also a new beacon for entrepreneurship in Southern West Virginia. Our WVU Launch Lab provides support and guidance to faculty, staff and students who wish to take their ideas to market. In a partnership with the New River Gorge Development Authority's HIVE, we are able to collaborate with and provide support to start ups and small businesses. In the first year of the WVU Launch Lab in Beckley, we've helped several students secure patents and obtain funds to develop prototypes, which will allow their work to continue.

Employers across West Virginia and around the world know the importance and value of a WVU Tech degree. Independent rankings align with their understanding – we're ranked #1 in the state for student return on investment and in the top 15% for earning potential nationally. We also have been ranked in the top 100 undergraduate engineering programs in the country by U.S. News & World Report for many years.

Our students have logged more than 4,000 service hours to our region since August 2016. Our students earn internships, cooperative education opportunities and fellowships around the world. Our graduates are driving innovation and growth in businesses and industries across our state. With their sharp minds and community-focused hearts, they are also helping to improve the world around them.

We have worked so hard to set a higher bar for our institution and to show the people of this state what can be accomplished when one works hard and is a smart steward of their resources. Even so, we have done so with help from those who have put their faith, and funding, into these efforts. Under this new model, our resources will be dramatically reduced. We will continue to work hard, but I am deeply concerned that this funding model may stall our work of training the future leaders and innovators who can help move West Virginia forward.

Sincerely,

Carolyn Long

Subject: HEPC Funding Model Comments

Attachments: WVU Faculty Senate HEPC Resolution.pdf

Dear Chancellor Hill,

I write to you in my role as the Chair of the WVU Faculty Senate. As such, I serve as representative and spokesperson for the faculty. With that in mind, I respectfully submit for your consideration the attached letter.

Note that the letter and the statement it contains has been endorsed by the WVU Faculty Senate Executive Committee, which constitutes the key faculty leadership, including both faculty Board of Governors representatives, the past Senate Chair, the next Senate Chair, and several other leaders elected to represent their constituencies.

Thank you for providing us with this opportunity to comment.

Respectfully,

Matthew

Matthew Valenti

Professor, Lane Dept. of CSEE

Chair, Faculty Senate
West Virginia University

WestVirginiaUniversity.
BENJAMIN M. STATLER COLLEGE OF ENGINEERING AND MINERAL RESOURCES

April 27, 2018

Dear Members of the West Virginia Higher Education Policy Commission:

Nineteen years ago, I was drawn to West Virginia University because I saw it to be a place of purpose and potential. Since then, I have worked my way through the ranks and tenure system, and currently hold the position of full Professor in the University's Lane Department of Computer Science and Electrical Engineering.

Additionally, I serve as the University's Director of the Center for Identification Technology Research (CITeR). This is a National Science Foundation Industry/University Cooperative Research Center that works to support the flourishing biometrics industry in West Virginia. CITeR's research has been incorporated into the recognition capabilities used by the FBI, Department of Defense, and Department of Homeland Security that make our lives more secure. Importantly, the industry-directed research that we perform creates training opportunities for WVU students, making them better qualified for high-tech jobs. Having a pool of qualified high-tech workers is a critical component in attracting new businesses to West Virginia. The technology developed by the Center has resulted in several spin-off companies that provide new opportunities and jobs.

Moreover, I currently serve as Chair of the WVU Faculty Senate. In this capacity, I represent over 3,600 faculty members across the WVU System, which includes WVU, WVU Potomac State College, and the WVU Institute of Technology.

I am writing this letter to share the concerns that WVU faculty have regarding the new funding model that is under consideration. These concerns amplify the public statements made by our Provost Joyce McConnell. We firmly believe that, if adopted, this proposed model will have serious ramifications for our University and a negative overall effect on the state. We respectfully ask that you seek greater stakeholder engagement before determining the final funding model.

Further, as West Virginia's only institution to receive an "R1" designation by the Carnegie Classification of Institutions of Higher Education, the proposed funding model would have a significantly negative impact on the high-quality research WVU is performing and the corresponding academic training opportunities.

The proposed model would also impact our ability to recruit and retain the caliber of faculty necessary to ensure that our students are educated at a level that is on par with other academically competitive institutions across the nation and globe. This is vital to West Virginia's economic future, as we desperately cannot afford to be left further behind as the rest of the nation prepares for the increasingly high-tech industries of the future. Moreover, it would impact our ability to attract highly qualified students at all levels, but especially at the graduate level where research reputation is of utmost importance.

Finally, the faculty of WVU are very concerned that the model devalues the critical aspect of on-time degree completion, which harms all students, including those at WVU.

Equal Opportunity/Affirmative Action Institution

In response to the proposed funding model, the WVU Faculty Senate Executive Committee, which consists of the WVU faculty leaders, has endorsed the following statement:

> "The faculty of West Virginia University are fully committed to the mission of creating a diverse and inclusive culture that advances education, healthcare, and prosperity for all. If adopted, the proposed West Virginia Higher Education Policy Commission funding model would greatly impede WVU's ability to serve this mission. In particular, it will inhibit WVU's ability to conduct high-impact research, will curtail state outreach efforts through its Extension Service, will potentially limit healthcare capacity, and will do significant harm to an economic engine that drives innovation and creates opportunities for those who need it most — across West Virginia and around the world."

I hope that you consider the impact that this proposed funding model would have on the state of West Virginia, both in terms of the loss of personal opportunities for our residents as well as the loss of economic opportunities. Together we must prepare for the industries of the future.

Sincerely,

Matthew C. Valenti

West Virginia University
BOARD OF GOVERNORS

April 27, 2018

Dear West Virginia Higher Education Policy Commission,

As chair of the West Virginia University Board of Governors and on behalf of the 16 current members of the Board representing faculty, staff, student, and alumni leaders, I am writing to express my grave, grave concerns about the higher education funding model the Commission has proposed.

Along with President Gordon Gee and Provost Joyce McConnell, I disapprove of both the development process for the model, which lacked transparency and collaborative input, and the model itself, which treats higher education as a one-size-fits-all proposition and moves decision-making away from institutions and state elected officials to the Commission. People don't wear hats as much as they once did, but if they did, the development of this model was certainly kept under those hats, and higher education in West Virginia is the worse for that lack of sunshine.

Every college and university is unique. WVU is a land-grant institution that serves all 55 counties, and its graduation rates and research exceed any other institution in the state. As West Virginia University's formal response to the proposed model shows, WVU also has by far the largest economic impact on West Virginia based on state investment. Further, WVU is West Virginia's only institution to receive the R1 designation in the Carnegie Classification of Institutions of Higher Education.

If adopted, the proposed model would undervalue WVU's strengths, punish it for its successes, devastate it financially, and hinder its ability to serve West Virginia.

Because I value research, I am profoundly concerned that the proposed funding model would have a significant negative impact on the research WVU is performing to improve the lives of West Virginians and others around the world.

The funding model also fails to account for the millions of dollars that West Virginia University provides in service to our state.

Finally, instead of an outcomes-based approach that rewards institutions for helping students actually obtain degrees, seventy percent of this model derives from credit hours undertaken, whether a student succeeds, fails, or drops out of class.

If adopted, the proposed West Virginia Higher Education Policy Commission funding model will harm our flagship University. More importantly, it would harm West Virginia, by limiting WVU's ability to advance groundbreaking research, perform life-changing service, and continue producing the best educational outcomes for students.

I urge you to reject this model in exchange for one that helps all the state's institutions thrive while fulfilling their unique missions to our state.

Sincerely,

William D. Wilmoth
Chair, West Virginia University Board of Governors

OFFICE OF THE PRESIDENT

Dear West Virginia Higher Education Policy Commission,

On behalf of West Virginia University's Staff Council, we are reaching out in support of WVU's opposition to the proposed funding model by the West Virginia Higher Education Policy Commission.

In total, the three Staff Councils across the WVU System represent more than 2,200 classified employees throughout WVU, WVU Potomac State College and the WVU Institute of Technology.

We work to promote a positive work environment for all classified staff by advocating for classified employees in the University's decision-making process and serving as a means for classified staff to convey their concerns on employee-employer relations.

After reviewing the proposed West Virginia Higher Education Policy Commission funding model, we are deeply concerned by the potential reallocation of funding away from WVU and to other institutions.

As you know, WVU has faced significant budgetary reductions in recent years. And as a result, the University has been unable to provide a regular merit increase program for its faculty and staff employees.

In fact, at the request of the WVU Board of Governors (BOG), the University recently reviewed its classified staff pay positioning relative to current market-based pay ranges. WVU also conducted a faculty market survey last year to assess the competitiveness of our faculty pay.

These assessments showed that a significant number of University employees – both faculty and classified staff – currently are paid below 90% of market. We believe the proposed West Virginia Higher Education Policy Commission funding model would only compound this issue.

The proposed model not only would deplete already exhausted resources to cover WVU's operating expenses, it also would further inhibit the University's ability to provide competitive wages and retain talent in an increasingly competitive market.

At WVU, our faculty and staff are united by our land-grant mission to strengthen education, healthcare and prosperity throughout our state. And the University continually surpasses the benchmarks set forth in the West Virginia Higher Education Policy Commission's proposed funding model.

From our robust academic offerings to our comprehensive health sciences programming and services, WVU is leading the way and creating new opportunities across West Virginia and beyond. And our graduation rates and groundbreaking research exceed any other institution in the state.

In conclusion, we echo the University's request that the West Virginia Higher Education Policy Commission take steps toward a rational funding model that incentivizes the correct goals and is developed by the institutions with dialogue from all stakeholders.

Sincerely,

Lisa A. Martin
Special Event Coordinator Senior, Office of University Events and WVU Board of Governors Classified Staff Representative

Paul L. Hill, Chancellor
West Virginia Higher Education Policy Commission
1018 Kanawha Boulevard, East Suite 700
Charleston, WV 25301

Dear Chancellor Hill:

Thank you for the opportunity to comment on the proposed Higher Education Funding Model. This development is long overdue for West Virginia higher education, and I write in strong support of the model. Clearly, a great deal of thought and research have gone into this work. The Policy Commission has succeeded in creating a formula that is fair across the wide range of institutions we have in our state. The formula gives greater weight to much-needed high-cost programs such as engineering and healthcare. It also takes into account the increased cost of serving high-risk student populations which describe most of the students we enroll at Bluefield State. Finally, it focuses on West Virginia residents. This is as it should be since these are the students our colleges and universities were initially established to serve.

I appreciate your efforts to ensure that all institutions in West Virginia enjoy the opportunity to receive fair and equitable funding. You have my support, and I urge the Higher Education Policy Commission to adopt this model. Feel free to contact me if I can be of further assistance to you in this effort.

Sincerely,

Garry D. Moore, Sr.
Vice Chairman
Bluefield State College Board of Governors

Dr. Paul L. Hill
Chancellor
West Virginia Higher Education Policy Commission
1018 Kanawha Blvd. E., #700
Charleston, WV 25301

Dear Chancellor Hill:

My name is Sean Frisbee and I serve as the President & CEO of the West Virginia University Alumni Association. I am also a distinguished graduate of WVU's College of Engineering and the parent of a WVU student.

I'm writing you today on behalf of our 200,000+ alumni worldwide to express my support for WVU's opposition to the West Virginia Higher Education Policy Commission's proposed funding model.

The proposed funding model raises concerns among our administration, as well as the many West Virginians it will impact if adopted. I assure you it will raise the ire of our alumni as well; especially those from West Virginia who attribute West Virginia University as the foundation of their professional success.

It is unfair and unwise to justify the defunding of West Virginia University on the fact that we have the ability to attract highly-qualified non-resident students. Our Alumni spend much time attending college recruiting fairs across the country to help us recruit the most qualified students. Our ability to attract non-resident students is a nod to the excellent academics and opportunities at West Virginia University and provides a robust and diverse training ground for all students, including those from West Virginia. Yet the Commission appears determined to treat this as a negative, which makes no sense. Our ability to attract non-resident students should be seen as a positive, and not a negative.

The most important product of a higher education institution is a student who graduates and enters the workforce as a productive member of society. Yet it appears in the proposed model that the Commission is rewarding attempted credit hours instead of graduation rates and job placement. As a parent of a WVU student I can tell you that I'm not interested in attempted credit hours. I'm interested in successful completion of classes and a degree in the shortest time possible. I suspect if I asked our Alumni, both residents and non-residents, they would share this sentiment. Institutions in West Virginia with high resident and non-resident graduation and placement rates should be rewarded, not penalized by a model with a mis-directed focus on attempted credit hours.

Where the model does focus on graduation, it does so primarily for in-state students. In order to propel West Virginia forward, we must not be so narrow in our approach. While our challenges can seem big, so are our numbers and there is power in numbers. The University and the Alumni Association are working to harness the knowledge, skills, wisdom, talents and treasure of our alumni and bring those together with the excitement, energy and momentum of the University. We've seen success in working with the West Virginia Forward effort in bringing jobs to West Virginia and increasing internship and career opportunities. Many of the graduates who are most engaged in these endeavors are those who came to WVU from out-of-state but have

Phone: 304.293.4731
alumni@mail.wvu.edu

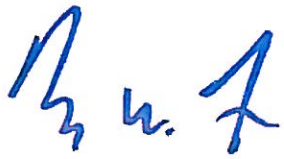

Erickson Alumni Center
PO Box 4269
Morgantown, WV 26504-4269

the passion for helping West Virginia. Out-of-state students will play an increasingly important role in moving West Virginia forward and penalizing WVU for out-of-state students does not make sense.

West Virginia has many challenges and WVU is uniquely positioned to help provide front door access to resources from healthcare to food security through both our alumni network and our 55 Extension offices across the state. By placing additional barriers to providing quality and affordable education to our students, you're also impacting our ability to help people in your own communities.

I urge you to relook at the goals you are attempting to achieve with this funding model and realize the negative impact the current model will have on current and future students—and by extension, the State itself. On behalf of our alums, I implore you to focus on building a model that will allow us to continue providing educational opportunities and scholarships to our students, regardless of residency.

Sincerely,

Sean Frisbee, '89
President & CEO
WVU Alumni Association

April 27, 2018

Dr. Paul L. Hill
Office of the Chancellor
West Virginia Higher Education Policy Commission
1018 Kanawha Blvd. East
Charleston, WV 25301

Dear Chancellor Hill,

My name is Jennifer Orlikoff, and I am the Campus President of West Virginia University Potomac State College in Keyser, West Virginia. I came to the Keyser campus from Morgantown where I was the director of the Center for Women's and Gender Studies in the Eberly College of Arts and Sciences. Since joining WVU in 2008, I have served as a faculty member in the department of World Languages, Literatures and Linguistics, a visiting faculty member at the Royal University for Women in Bahrain, chair of WVU Faculty Senate, and as an Academic Leadership Fellow.

At first glance, the proposed student-focused funding model appears to benefit Potomac State College, but that small increase in funding pales in comparison to the overall harm proposed for the entire WVU system. Please remember, we are OneWVU.

Founded in 1901 as a "preparatory branch" of West Virginia University, Potomac State College has always been a part of the WVU system. We are committed to creating a diverse and inclusive culture that focuses on fulfilling our land-grant mission. Currently we have 1,410 students, a majority of whom are West Virginia residents, who benefit from all that the WVU system has to offer.

Potomac State College is a great value and it is ranked as one of the most affordable four-year schools in the U.S. by the Department of Education/NCES. Our connection to the WVU system supports our ability to offer our students a low-cost option for a quality education, while allowing our 104 faculty and 120 staff to remain student-focused.

The financial harm proposed to the WVU system will negatively impact our ability to remain student-focused. For that reason, I must express my support for WVU's opposition to the proposed funding model presented by the West Virginia Higher Education Policy Commission. I ask that you please take the time to read the analysis in Dr. Gee's letter, and thoughtfully consider the negative impact that this funding model will have on our students and our citizens.

Sincerely,

Jennifer E. Orlikoff

Chancellor Paul Hill
WV Higher Education Policy Commission
1018 Kanawha Boulevard, East - Suite 700
Charleston, WV 25301

Dear Chancellor Hill,

The HEPC's work to create a student-focused funding model was very well done. If implemented by the Legislature, it will allow our State to move significantly closer to achieving the strategic goals of the HEPC. Please pass my thanks and congratulations to everyone working on this project.

I have served on the Shepherd Board of Governors for almost ten years. Inequity in funding has long challenged our University and higher education as a whole in West Virginia. Funding schools based on a prior year's funding is detrimental to all - institutions, educators, students and tax payers. It penalizes success and subsidizes shortfalls. The HEPC student-focused funding model will re-align and amplify higher education in West Virginia.

Small changes in the weighting and the recognition of out-of-state students could be justified, but the funding model, as proposed, is fundamentally right and should be championed forward. I support it enthusiastically.

Sincerely,

Gat Caperton

Dear Chancellor Hill,
As a member of the Shepherd community, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.
I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.
The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.
Thank you for your consideration.

Subject: HEPC 4 Year Institution Funding Model

Dear Chancellor Hill,

I am a graduate of WVU (which I attended as a non-resident), took a year of classes at Shepherd, and earned a Masters studying at Shepherd, but listed as a graduate student at WVU. I've lived outside WV, then moved inside WV and had to find work in VA and MD, and finally spent the last 6 years before retiring working in Shepherd's Business Office (for 1/3 what I had earned in private industry).

I commend the committee for including in their allocation formula factors concerning WV Residency (since we are talking about spending tax money from WV Residents), student success measured by timely completion of their degrees, studying in high demand fields, and the student's choice to stay in WV, although I question the choice of 2 years. Because my husband was drafted, we spent several years outside WV, so you would not have counted me. However, WV has benefitted from my taxes for almost 40 years! I understand the difficulties tracking where former students live, though, so I'll let that go.

I appreciate the thought and effort that was necessary to develop this formula, and give my hearty approval for moving forward with this Funding Model.

Thank you for opening this change to public comment, and for all your hard work.

Shepherd University Student Support For HEPC Funding Model

Dear Chancellor Hill: Shepherd University is highly underfunded for a school as prestigious and well recognized as it is. It is a school with wonderful staff who take care of their students and encourage them to succeed. I have learned a great deal during my experience there and my education hasn\'t stopped at what\'s covered in the books. The school has taken the lessons and helped us to apply what we\'ve learned into modern situations. Shepherd deserves to have fair funding. As a Shepherd student, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Subject: Equitable Funding Distribution

Dear Chancellor Hill,

As a faculty member at my alma mater, Shepherd University, I wish to demonstrate my support for the new higher education funding model that would benefit my university system by bringing fairness and equity to the distribution of available state funding to all West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established in the proposed funding model, most particularly, as we here in the Department of Education seek to provide qualified, licensed teaching professionals for our state.

Since Shepherd University is in the Eastern Panhandle, we have a most unique situation in this tri-state region, as it is often more financially lucrative for our graduates to leave our state. With additional funding we could be more competitive throughout the region in order to attract, train, and retain graduates to the state's benefit.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students since it would underwrite necessitated and ongoing efforts while funding Shepherd at a fair and equitably competitive rate.

I thank you for your consideration of my request.

Sincerely interested and invested,

Shepherd University Community Support For HEPC Funding Model

Dear Chancellor Hill: TO THE OFFICE OF THE CHANCELLOR, WEST VIRGINIA HIGHER EDUCATION POLICY COMMISSION In the past five years since my wife, Dr. Lindsey Levitan, accepted a position as a professor at Shepherd University, I have witnessed just how much impact this small university has on the community, and the State of West Virginia. Our experiences prior to coming to Shepherd were grounded in larger institutions like Stony Brook University in New York, were she previously worked, and at many other universities that I have worked with over the years as a photographer. The individual attention and strong commitment to learning and community that the faculty and staff have at Shepherd is truly distinctive, and it's impact palpable. My wife's students have gone on to better jobs, further advances in academia, and better lives due to the quality of instruction and energy that her and her colleagues impart upon them. As such, I truly believe that the new higher education funding model that would bolster Shepherd University's budget by $3.4 million is a valuable investment for the State of West Virginia, and is, in my opinion, a good first step that I hope will be increased over time. My work as a photographer has led me to travel throughout the State for a community development lender to document success stories of entrepreneurs, farmers, and families. As I have travelled and met more people throughout the state, the common thread that binds these success stories has been access to education and critical thinking skills, with an understanding that not everyone started with the same

foundations. These are situations where the kind of education that Shepherd University has shown great aptitude. It's successes with non-traditional students and veterans are an asset to the community at large. Furthermore, Shepherd University has particular advantage of being fairly accessible to DC, Maryland, and Virginia. It can reach out to out of state students without having to go far. It's arts programming and small town charm, while still having big cities within a reasonable drive, is attractive to incoming students. Shepherd is unique in being able to meet the needs of West Virginians, while being an attractive and accessible option for those who live across the Potomac. Any extra support from the State will help prime the pump of a valuable academic and economic engine. As a friend of Shepherd University, I support the new higher education funding model, and I do hope that it is the beginning of continued investment in the University and West Virginians. Thank you for your consideration. -Sam Levitan

Subject: Proposed Funding Model - Comment

Dear Chancellor Hill,

As a graduate of Shepherd University as well as a member of the Shepherd community, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Subject: Shepherd University's new higher education funding model

Dear Chancellor Hill,

I am a 1964 graduate of Shepherd, a life-long teacher in WV, mostly Marion County, where I now live. My brother is a 1962 graduate, a medical doctor who practiced in Morgantown before retirement; our mother was a 1922 graduate of Shepherd living in Berkeley County. My brother and I still support Shepherd for all it did for us and maintain a scholarship there.

We are concerned that Shepherd has not been funded equitablely with other state schools. We would like you to give the new higher education funding model that would benefit Shepherd by bringing fairness to the distribution of state funding to colleges and universities. Thank you. Subject: State funding model

Dear Paul,
Bob and I are spending a few months in Florida. I just returned from a three day visit to Shepherd U . I was part of the committee that performed Mary Hendrix presidential review.
As I am sure you know, such a review entails interviewing all the constituent groups that make up the University community. I cannot emphasize enough how impressed the committee was after reviewing the progress that Shepherd has made during the last two years. As the students would say, we are on a roll to achieve great things.
The only thing that is holding us back is lack of funding. The new state funding model proposed by HEPC could do wonders for our University. Thank you so much for believing in us and our future.

Best wishes, Tia McMillan

Subject: New Funding Model

As a graduate of Shepherd University, I would like to express my support for the new funding model for state colleges and universities. Shepherd does an outstanding job of educating its students and providing them with skills that lead to employment. For many years, it has been underfunded from the state. The new model will more fairly recognize the outstanding job that the university does and provide more equatable funding.

Your consideration of this support for the new funding model is appreciated.

sincerely,

Esther Morrison

Shepherd University Employee Support For HEPC Funding Model

Dear Chancellor Hill: As a Shepherd employee, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Subject: funding Shepherd U

Dear Chancellor Hill,

I am a member of the Shepherd U community, and one who values higher education -- I have a BA, MA and JD, who as a partner and trial attorney in an International Law firm, guest lectured at GW and Geo. Mason law schools and in Europe and Asia. In short I am committed to educating our children, and have contributed to my schools and to Shepherd University.

I support the new higher education funding model, bringing fairness to the distribution of state funding to WV colleges and universities. This funding model promises to benefit Shepherd -- as it should, because Shepherd meets the criteria established by the proposed funding model.

I understand the new funding model would provide Shepherd with an addition $3.4 million, and afford current and future Shepherd students with well deserved educational opportunities.

I thank you for your consideration.

Arthur Wineburg and Susan Brown

Dear Chancellor Hill: I support the new higher education funding model that would benefit my alma mater Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. As an Alumnus and an active member of several Shepherd University initiatives, I have seen the results of the funding cuts. This new effort is a way to reinstate the suffering programs and to allow this strategically located University to move forward. President Hendrix has embraced the advancement of Shepherd on an extremely limited budget. I support the funding increase so as to allow her very progressive initiatives to prosper. I am and always have been proud to support Shepherd. Thank you for your consideration.

Shepherd University Employee Support For HEPC Funding Model

Dear Chancellor Hill: Hello, I am a Shepherd Faculty member that came from outside of West Virginia and now loves it here. That being said, financial issues at our University have made it so that I will not be able to stay in our state long-term because I have multiple children and Shepherd cannot even afford to offer tuition remission to its full-time faculty members. As a Shepherd employee, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities so that I can afford to stay and work in West Virginia. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Dear Chancellor Hill,

As a member of the Shepherd community and a former educator, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. As a high school counselor in the Tri County area, I had many students that would have gladly gone to Shepherd University because of its location but the lack of financial support meant many programs and facilities were not available at Shepherd.

It is evident that Shepherd should be rewarded for meeting the criteria established by the proposed funding model. The 3.5 million addition to the She[herd budget would clearly benefit students and continue to make Shepherd the great value in education that it is. There is an educational niche here that Shepherd. serves and the benefit to both students and the state should not be missed.

Subject: New funding model

Greetings Chancellor Hill,
As a Shepherd student, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Best Regards,
Michael Watcher

Subject: Support the new funding model

Dear Chancellor Hill,

I continue to be amazed as I learn about the many ways in which Shepherd University is an outstanding small university. President Hendrix brings to Shepherd an outstanding array of accomplishments, connections with important organizations, energy and innovative ideas. Shepherd students have won awards in a variety areas from robotics to debates. As residents of Shepherdstown, we personally have benefited from the musical events connected with the music program.

Therefore, as a friend of Shepherd University, I support the new higher education funding model that would benefit Shepherd by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Sincerely,

Cheryl Pullen

Subject: Funding for Shepherd University

Dear Chancellor Hill,

Shepherd University is deserving of increased revenue to bring fairness to distribution of state higher education funding.

Shepherd has been vital to the Eastern Panhandle and Shepherdstown's youth and older citizens.

A 3.4 million addition to S.U.'s budget would fund the university in a fair and equitable amount.

Respectfully,
Bill & Betse Hinkley,
Shepherdstown, Fernbank at Cress Creek

Shepherd University Alumni Support For HEPC Funding Model

Dear Chancellor Hill: I support the new higher education funding model that would benefit my alma mater Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Shepherd University Employee Support For HEPC Funding Model

Dear Chancellor Hill: As a Shepherd employee, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. Having spoken on over 60 college campuses I can say with confidence that Shepherd is a true gem in higher education. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The WVHEPC report card shows Shepherd in a very positive light and this funding model rewards positive outcomes. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Subject: Fair Funding for Shepherd University

Dear Chancellor Hill,

As a member of the Shepherd community and one who as had five relatives earn degrees from Shepherd over the years and gone on to successful careers, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. Fair funding of Shepherd not only benefits its role as a provider of a quality education, it would enhance the entire Shepherdstown community of which the University is a vital part.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students and the community by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Respectfully Submitted,

John V. Loeffler

Dear Chancellor Hill,

As an employee of the Contemporary American Theater Festival hosted on the campus of Shepherd, I support the new higher education funding model that would benefit Shepherd University employees by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Hi I am a student at Shepherd University and I support the fund increase. I hope it will benefit me personally and others who are in need of financial support at this school. I love this school, it's small and private and you're able to have more one on one time with your teachers than most colleges. Please consider the fund increase.

Thanks,
Sophia Dinch

Dear Chancellor Hill: Dr. Hill, As a Shepherd employee, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Additionally, I am mandated to raise funds for the Shepherd University as Director of Annual Giving. It is at times difficult to state the case that donors and alumni should invest in an institution that the state of West Virginia itself continually underfunds. Creating a fair distribution would aid the conversations. We would be able to say to our friends and supporters that West Virginia supports all its institutions of higher education in an equitable manner. Kind regards, Stacy McFarland, M.B.A, M.S.M. Shepherd University Employee Support For HEPC Funding Model

Dear Chancellor Hill: As a Shepherd employee, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Subject: Funding for shepherd University

Dear Sir:

The new funding model finally moves toward equity in providing state funding assistance to Shepherd University. It is still not enough for real equity, but Shepherd has been treated so badly over so many years that this model is a welcome blessing for a West Virginia school that has provided outstanding higher education education for many years.

Subject: Shepherd University Funding

Dear Chancellor Hill,

As a Shepherd student, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Sent: Thursday, April 12, 2018 11:31 AM

To: Chancellor's Office

Subject: Please support HEPC Proposed Funding Model

Dear Chancellor Hill,

We're writing out of concern for the lower and lower amount of state funding that has been going to Shepherd University.

Please support the Student Focused Funding model which seems to be a more fair method of distributing state aid to state-funded schools.

We strongly support the $3.4 million in additional funding for Shepherd's budget that the new funding model would provide. There are 2 compelling reasons why Shepherd deserves the extra funding in the proposed model: Shepherd has met the conditions required in the proposal, and because Shepherd has had the least amount of per student support from the state and therefore the model helps restore some equity.

Thank you in advance for considering our opinion.

Sincerely,

Lynn & Chess Yellott

Shepherd University Community Support For HEPC Funding Model

Dear Chancellor Hill: As a friend of Shepherd University, I support the new higher education funding model that would benefit Shepherd by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Subject: Funding needed for Shepherd University

I've been asked to request more necessary Funding for Shepherd University and its students. Please consider the request... it is a wonderful university...I attended it for 3 years (1964-1967)...it has improved and grown over these many years...but more funding is needed! I so loved Shepherdstown, I retired to this small community based town five years ago. The University is so much a part of the town... the students need your financing support.

Please read the cut and paste email below:

Subject: Funding increase for Shepherd University

In 1989 we moved from Southern California to Shepherdstown, WV. Our son was a high school senior at the time and unsure of his path. We had him go to Shepherd College for a year, with mixed.results. He ultimately joined the Army and spent 8 years. Throughout this time we watched Shepherd expand and grow into a.University, growing more impressed with each year. Chris returned and received not only his bachelor's degree, but also his masters from Shepherd and this year our oldest grandaugter opted to stay and go to Shepherd . She looked at many University programs, but decided the political science program was a good fit for her to work towards furthering her education into law after Shepherd. Please consider the funding increase for Shepherd. Hopefully more young people will stay and this University can become a driving force in education for West Virginia.

Subject: Supporting funding for Shepherd University

Dear Chancellor Hill,

I am a retired higher education professional who has recently relocated to Shepherdstown. I have in the past worked closely with HEPC-as well as other state systems-and am aware of all the challenges states face in bringing fairness to the distribution of state funding to colleges and universities.

My experience so far in Shepherdstown has underscored the critical importance that a quality university such as Shepherd brings to all facets of the community in which it is located-including undergraduate, graduate, and lifelong learning.

Accordingly, I strongly believe that Shepherd University should be rewarded for meeting the criteria established by the recent proposed funding model. The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Subject: Shepherd University needs adequate funding

04-11-2018

Shepherd University is the flagship school in the Eastern Panhandle. It needs more money to fund regular (not adjunct) professors to keep a competitive edge.

The Nation is making fun of West Virginia and it's below average funding for schools.

Give West Virginia a school to be proud of: Shepherd University.

Respectfully,

Paul F. Kradel

Shepherd University Alumni Support For HEPC Funding Model

Dear Chancellor Hill: I support the new higher education funding model that would benefit my alma mater Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Subject: Higher Education Funding Model

Dear Chancellor Hill,

As a Shepherd University Emeritus Administrator, part-time lecturer, and alumnus, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

I retired after 44 years of service to Shepherd in various administrative positions and have been teaching part-time for the last four years. This new funding model is long overdue and Shepherd deserves additional funding than the proposed model currently provides; I hope additional funds can be allocated as soon s possible to fairly provide for Shepherd's financial needs.

Thank you for your consideration.

Shepherd University Community Support For HEPC Funding Model

Dear Chancellor Hill: As a friend of Shepherd University, I support the new higher education funding model that would benefit Shepherd by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Subject: New Funding Model

Dear Chancellor Hill,

It has been a concern for quite some time that the funding mechanism for WV colleges and universities has become less than fair. The amount of state funding Shepherd University receives has become such a small percentage of its operating budget that it almost seems the designation as a state university is misleading. I am excited to see a new funding mechanism based on successes and outcomes rather than mere existence.

Having had the opportunity to reconnect with my alma mater over the past several years and to become involved in fundraising efforts, I have come to appreciate how well Shepherd University has made every effort to serve its students by offering new and exciting programs. Therefore, I support the new higher education funding model that would benefit my alma mater, Shepherd University, by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Shepherd University Employee Support For HEPC Funding Model

Dear Chancellor Hill: I have taught at Shepherd since 2007. I love my job, my colleagues, my students, and this institution. I am proud of Shepherd and the work we do. That is why I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. Please implement this model that will help our students and the work we do. Thank you!

I hope you will consider funding Shepherd University fairly by adopting the new higher education funding model.
I am a 1979 graduate of Shepherd; both my husband and daughter are also graduates. Shepherd is a fine school deserving of increased funding.

Shepherd University Alumni Support For HEPC Funding Model

Dear Chancellor Hill: I support the new higher education funding model that would benefit my alma mater Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Dear Chancellor Hill: As a friend of Shepherd University, I support the new higher education funding model that would benefit Shepherd by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Subject: Shepherd University

Dear Chancellor Hill,

As a friend, community supporter and staunch advocate of Shepherd University, I wholeheartedly and sincerely support the new higher education funding model. The model will benefit Shepherd University by introducing fairness to the distribution of state funding to West Virginia colleges and universities. I believe Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd University at a fair and competitive rate.

Thank you for your consideration.

Kathy Klein

Subject: Funding for Shepherd University

Dear Chancellor Hill,

As a friend of Shepherd University, I support the new higher education funding model that would benefit Shepherd by bringing fairness to the distribution of state funding to West Virginia colleges and universities. Although I did not attend Shepherd, my husband and I sing with the vocal students in the Masterworks Chorale, I am a volunteer teacher in Shepherd's Lifelong Learning program, and I started a scholarship for vocal students with the Masterworks Chorale. I am very impressed by what the Shepherd faculty does with meager resources— the additional millions would make such a difference.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Subject: Higher Education Funding Model for Shepherd University

Dear Chancellor Hill,

As a friend and supporter of Shepherd University, I urge you to implement the new higher education funding model that would benefit Shepherd by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

In addition to rewarding schools that educate West Virginia residents, the proposed funding model rewards institutions that help students finish their degrees on time and that provide training in high-demand fields (healthcare, education, and engineering).

Shepherd has historically been underfunded when compared to the other state institutions. As of the 2016-17 fiscal year, Shepherd, received the lowest state appropriation of all the four-year West Virginia state institutions, dead-last among eleven institutions with only $2,960 allocated per student annualized FTE.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Subject: Support Funding Model

Dear Chancellor Hill,

I support the new higher education funding model that I recently read about. I believe it would benefit Shepherd University, my alma mater, by establishing greater fairness to the distribution of state funding to West Virginia colleges and universities.

I believe Shepherd has been greatly shorted by the model being presently used, and that the proposed model would reward Shepherd for meeting the well reasoned criteria established by it.

I have been told that the proposed model could result in a $3.4 million addition to Shepherd's budget. I believe this increase will greatly benefit Shepherd students in many ways and enhance the overall effectiveness of the university's service to the State of West Virginia.

Thank you for your consideration.

Subject: Shepherd University Community Support For HEPC Funding Model

Shepherd University Community Support For HEPC Funding Model

Dear Chancellor Hill: As a friend of Shepherd University, I support the new higher education funding model that would benefit Shepherd by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Shepherd University Community Support For HEPC Funding Model

Dear Chancellor Hill: As a friend of Shepherd University, I support the new higher education funding model that would benefit Shepherd by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Greetings,

I wanted to write to show my support for the newly proposed Student Focused Funding for West Virginia Public Higher Education. As a former student of Shepherd University, I saw the dramatic shift in funding availability over my time there. I feel that this change is much needed for the success of current and future students. Our students are our future, and we need them in West Virginia now more than ever.

We appreciate all that you do for the future of our state! I look forward to seeing WV continue to invest adequate resources towards the betterment of our educational system.

Best regards,

Allison Buchanan

Shepherd UNIVERSITY

Dear Fellow Shepherd Graduate,

I respectfully request your assistance on an issue of great and urgent importance to the future of Shepherd University.

As many of you are aware, Shepherd University has not received equal state funding for at least two decades. A new funding model has been developed that would benefit Shepherd by increasing our state funding by $3.4 million (a 36.4 percent increase in funding).

Here's how I need your help--the Chancellor of the West Virginia Higher Education Policy Commission is taking comments about the proposed funding model. I ask that you please consider sending an email so that the Chancellor is aware of the support of Shepherd alumni for the funding model.

Below is a template of a letter for you to cut and paste into an email for you to send to: [redacted]
closes April 27.

To read more about the new funding model or to send a prefilled form letter, visit *http://www.shepherd.edu/state-funding/*

Thank you in advance for your consideration in sending comments to the HEPC Chancellor in support of fairness and equity in adjusting Shepherd's state appropriations based on the new funding model.

Sincerely,

Mary J.C. Hendrix '74
President

Dear Chancellor Hill,

As a friend of Shepherd University, I support the new higher education funding model that would benefit Shepherd by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Shepherd is one of the very few state schools located in a growing area. We need to face the reality of today and adjust funding based on that reality and not based on nostalgia.

We must expand in growing areas and trim back in areas that are not growing to fairly and efficiently fund education in our state.

Thank you for your consideration.

Subject: HEPC Porposed Funding Model

Dr. Hill,
As a Shepherd employee, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Additionally, I am mandated to raise funds for the Shepherd University as Director of Annual Giving. It is at times difficult to state the case that donors and alumni should invest in an institution that the state of West Virginia itself continually underfunds. Creating a fair distribution would aid the conversations. We would be able to say to our friends and supporters that West Virginia supports all its institutions of higher education in an equitable manner.

Kind regards,

Stacy McFarland, M.B.A, M.S.M.

To: Chancellor's Office

Subject: Referencing Funding for Shepherd College

To the Chancellor of the West Virginia Higher Education Policy Commission
Dr. Paul L. Hill

Dear Dr. Hill,

I am writing to encourage the Commission to fund Shepherd University at higher levels
than in the past, and also at levels that are commensurate with the funding received by
other institutions of higher education supported by the State of West Virginia, especially
when considered on a per student funding basis. Shepherd University has, historically,
received lower funding per student than almost any other institution of higher learning
within the West Virginia state system.

As a pastor in Shepherdstown, I have frequent interaction with the Shepherd students,
providing support for those students, administration, and faculty who attend our church
worship services and programming, as well as in support programs our congregation
provides to the wider university community.

Shepherd University is very important to the Shepherdstown community, as well as to
the wider Eastern panhandle area. I, myself, have been an active participant and donor
to the University Arts programs.

I encourage you and the Commission to support Shepherd University at the highest levels
possible.

With blessings,

Rev. Gayle Bach-Watson

To: Chancellor's Office

Subject: New Higher Education Funding Model

Dear Chancellor Hill,

I support the new higher education funding model that would benefit my alma mater Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Bob

Subject: Please provide Shepherd University with the appropriate funding increase

Dear Chancellor Hill,

I grew up in West Virginia. As both a 1992 graduate of Shepherd and the West Virginia public school system, I support the new higher education funding model that would benefit my alma mater, Shepherd University, by bringing fairness to the distribution of state funding to West Virginia colleges and universities, and enabling better education opportunities to all West Virginians, not just those closest to Morgantown or Charleston.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Shepherd University Student Support For HEPC Funding Model

Dear Chancellor Hill: As a Shepherd student, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Subject: Higher Ed funding model - Shepherd University

Dear Chancellor Hill,

As a Shepherd employee, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

I would also like to mention that I'm a graduate of Shepherd. I get to give back every day to my alma mater. It's a source of great pride to me that I can help ensure that Shepherd students are surrounded by faculty and staff who want to work here. We see so much potential in the students who attend Shepherd and we feel they deserve to be taken seriously in their pursuit of personal and professional goals. In addition to working with traditional-aged college students, I have taught an online class for RBA students for a number of years and know first-hand the many challenges faced by non-traditional students who are trying to complete a degree. Helping adults complete a degree is obviously a priority for our state. I think additional funding will be a great help in that regard.

Thank you for your consideration.

Shepherd University Employee Support For HEPC Funding Model

Dear Chancellor Hill: As a Shepherd employee, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Subject: Shepherd University Budget

Dear Chancellor Hill,

As a Shepherd student, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

This is my first year attending Shepherd University. I have very much enjoyed my time here so far, however there is wide knowledge across campus that funding is lacking and the school is suffering. What this really means is students are suffering.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

If Shepherd were to receive the $3.4 million addition to Shepherd's budget provided by the new funding model, this would be a better learning place for all. Rather than focusing on budget cutting, I'd like to see us further growing and advancing as a university, which in turn would hopefully grow the student enrollment.

After looking at the funding for other West Virginia universities, I believe this budget increase is completely fair and reasonable.

Please help is improve our educational experience. Education is the key to a successful society.

Thank you for your consideration.

Subject: In Support of Proposed New Funding Model for WV Institutions of Higher Education

Dear Chancellor Hill,

As a sometime Shepherd adjunct instructor and community member, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

In recent years funding cuts have taken a toll on smaller colleges and universities throughout the country and in West Virginia. Having been associated with Shepherd University since 2004 and Higher Education for a lifetime, I have noted the impact of budgetary cuts on the university and its personnel. The new funding model offers a much needed influx of financial support.

Thank you for your consideration.

Sincerely, Pamela Edwards

Dear Chancellor Hill,

As a Shepherd student, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Respectfully,
Madison Isenberg

Subject: Proposed Funding Model

Dear Chancellor Hill,

As a Shepherd student, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Subject: New Higher Education Funding Model

Dear Chancellor Hill:

I am an adjunct instructor of history at Shepherd University, and I'm writing in support of the new higher education funding model. I am familiar with the proposal, and believe that the model would benefit Shepherd University by bringing more fairness to the distribution of state higher education funding.

Shepherd clearly meets the criteria of the proposed funding model and an additional $3.4 million in Shepherd's budget, provided at the fair and competitive rate established in the new funding model, would greatly benefit Shepherd students. I sometimes think that since Shepherd in the remote panhandle of West Virginia, it is too easily given short shrift in the state's funding mechanisms. Please help Shepherd not only survive these difficult financial times, but to step boldly into the future. Thank you for your consideration.

Sincerely,

William A. Marjenhoff, Ph.D.

Subject: Shepherd University Student Support For HEPC Funding Model

Shepherd University Student Support For HEPC Funding Model

Dear Chancellor Hill: As a Shepherd student, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model. The $3.4 million addition to the Shepherd budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. Thank you for your consideration.

Subject: Support for newly proposed higher-education funding model

Dear Chancellor Hill,

I am writing to voice my support for the new higher education funding model. I am a Shepherd University employee. For years my institution has continued to excel while receiving a much lower level of state support relative to most peer institutions in the state. I applaud the move to finally bringing fairness to the distribution of state funding.

Thank You,

Jeff

Dear Chancellor Hill,

I am writing to express my support for the new proposed higher-education funding model. As you are aware, some state institutions (e.g., Shepherd University) have not received a fair level of state funding for decades when compared to peer institutions. The proposed funding model would finally allocate resources more fairly and rewarded institutions like Shepherd University for meeting the various criteria established by the proposed funding model.

Sincerely,

Jeff Groff

Dear Chancellor Hill,

As a Retired Shepherd faculty member with 38 years of service, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

Shepherd has operated on a bare bones budget for years dating back to years of President James Butcher. He was very proud of running a tight ship, while other institutions did not demonstrate this same fiscal responsibility. From this point forward Shepherd was financially punished by blanket state wide cuts, and as such Shepherd has experienced severe financial strain.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Subject: Proposed Funding Model

Dear Chancellor Hill,

As a Shepherd employee and as a parent of teens entering their college years, I am in full support of a funding model that provides more equitable and fair funding to Shepherd University than that which has been provided in the past.

Shepherd University meets the criteria established by the proposed funding model. I am excited to see the benefits that this type of support will give -- not only to Shepherd and the Eastern Panhandle, but to a future for West Virginia made brighter by an even better educated base of workers and citizens.

The $3.4 million addition to Shepherd's budget, funding Shepherd at a fair and competitive rate, would greatly benefit Shepherd students and by extension our state.

Thank you for your care and concern in respect to this important change in funding model.

Sincerely,

Traci Morris

Subject: New Funding Model

Dear Chancellor Hill,

As a Shepherd alum, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Importance: High

Dear Chancellor Hill,

As a Shepherd employee, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

When I walked in the door to begin work as Registrar in January 2003, almost my first conversation with my boss was about a 10% budget cut I would have to make, for an office whose staff I didn't yet know by name. That same conversation has been almost an annual event in every office, every division since – sometimes twice a year.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model, especially in the face of continual cuts over at least 15 years.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate. It is not overstating things, I believe, to say that such a budget recasting is long overdue.

Thank you for your consideration.

Sent: Sunday, April 8, 2018 10:09 AM
To: Christopher Treadway
Subject: College funding

Chris,

My name is Richard Zigler. I am a taxpayer in the state of West Virginia and I would like to voice my opinion on funding colleges.

All school curriculums need to be reviewed before funding is made available to said institutions. I am tired of my tax dollars subsidizing radical agendas that make colleges Indoctrination Centers for the Left.

As seen nationwide, many colleges have zero tolerance for anyone not of the political thinking of extreme liberal professors. Free Speech of conservative opinions is relegated to off campus sites or severely restricted to participation on campuses. "I Hate America" classes of the extreme Left have to be stopped.

This is becoming a national crisis that has to be addressed. We are a conservative state and our schools need to reflect this. Our country is in dire need of morality. truth, and education that will prepare our students for the real world.

Thank you for your time and service to our state.

Subject: new funding model support

I am in support of the new Student-Focused Funding model that has recently been presented. I work at Shepherd University, and I appreciate the fact that this model seems to be fair. Shepherd has been under-funded by the state for many years. I realize there's only so much money to go around, but in the past we have not received our fair share. Most importantly, this model will ensure that the state's public colleges and universities will continue to strive to help the students succeed. Shepherd works hard to not only recruit new students, but to take care of the students we have. Students have many opportunities to not only get a quality education, but to reach current goals and to set new ones.

This new funding model will allow us to focus more on students and ways we can improve instead of focusing on finances and what we're going to cut.

Sincerely,

Ginny Haddock

Shepherd has been under-funded by the state for many years. I realize there's only so much money to go around, but in the past we have not received our fair share. Most importantly, this model will ensure that the state's public colleges and universities will continue to strive to help the students succeed. Shepherd works hard to not only recruit new students, but to take care of the students we have. Students have many opportunities to not only get a quality education, but to reach current goals and to set new ones.

This new funding model will allow us to focus more on students and ways we can improve instead of focusing on finances and what we're going to cut.

Sincerely,

Ginny Haddock

Subject: New Funding Formula Model

I have just seen the proposed changes to the funding formula for our state colleges and universities, and I would like to say that this sort of change is overdue, and welcome. It feels like an opportunity to focus some resources on higher education in the state - badly needed resources, after years of budget cuts.

I fully and enthusiastically support these changes, particularly with the Hold Harmless provision allowing the few institutions who would suffer a chance to re-align themselves.

Subject: HEPC Proposed Funding Model

Chancellor Hill,

I'd like to express my support for the proposed funding model for the HEPC institutions. The current historical appropriations do not reward institutions for good results or increased enrollments. The funding model will not only make institutions accountable for their performance but reward them for positive results. This seems a more equitable system than to perpetuate a system that may penalize institutions for achievement.

I attended the last HEPC meeting and listened to the presentation on this model. I believe it is a good, well thought out plan and treats institutions fairly based on performance. The plan helps to insure that WV students who want to attend a public institution have a choice.

I appreciate all the work the HEPC staff has put into this project.

Thank you for your time,

Subject: HEPC Proposed Funding Model Support

Good morning Chancellor Hill,

Please accept this email as my letter supporting the proposed funding formula for higher education.

As state appropriations to higher education continue to dwindle it is imperative to correct the funding model. The proposed funding model recently shared at the WVHEPC meeting could benefit West Liberty University by adding $1.6 million to our operating budget for FY20. This is a 21.6% increase from FY18.

West Liberty University is one of the few institutions that has grown its enrollment when others have lost. We have been penalized while the declining schools have been rewarded. For example, in the last two years, a WV school with declining enrollment received $900 more per student than WLU. This year, the same institution, following another year of decline, will receive $1200 more per student than WLU.

Please support the proposed funding model that rewards schools that educate WV residents, rewards institutions that help students finish their degrees on time and that provide training in high-demand fields (healthcare, education and engineering).

We need and deserve the new funding model to correct the current inequities.

Sincerely,

Diana

Subject: West Liberty University HEPC Proposed Funding Model

To Whom It May Concern,

I am a current West Liberty University Employee and anted to reach out about the HEPC Proposed Funding Model. West Liberty University has historically been underfunded. The current funding model rewards State institutions that are losing enrollment and penalizes institutions, like West Liberty University, that experience enrollment growth. As an example, during the last two years, WLU's enrollment has grown. In the same two years another State institution saw significant declines. Last year that institution received

$900 more per student than West Liberty. This year, following another enrollment decline, they are receiving $1,200 more per student. We feel that we need and deserve the new funding model to correct this inequity.

Thank you for your time and understanding with this subject,

Subject: HEPC Proposed Funding Model

Dear Chancellor,

Please support the HEPC proposed Funding Model. WLU has continued to grow despite being severely underfunded, and has demonstrated an ability to use tax payer funds responsibly. Small schools lack the ability to duplicate services, and generally one person is filling roles by numerous people at larger schools. This requires our faculty to do jobs that faculty from larger schools would not dream of having to do while continuing to provide a personalized and high quality education for our students, yet many of us are significantly underpaid compared to our peers in higher ed, and even more obviously underpaid when compared to our colleagues outside of higher education. If we are going to have any chance of attracting faculty who meet the credentialing requirements, we have to have something more to offer than more work and less pay.

Thank you for consideration,

Sincerely,

Tammy McClain, Psy.D.

Subject: Support of HEPC proposed funding model

Dear Chancellor,

I am writing in support of the proposed funding model from the HEPC for West Virginia institutions of higher learning that provides additional funding to institutions that education West Virginia Residents.

As a two time alum of West Liberty University (undergraduate and graduate) and a current employee of the institution, I full heartedly support the University and believe in its mission. Our University is not only a staple in our community, providing one of the largest resources for employment to the great Wheeling area, but is also home to many students from the Northern panhandle and the mid-Ohio Valley region. Additionally, WLU has had a steady growth in enrollment over the past two years and is working diligently to continue this trend. I currently serve as the Creative Video Director for the Office of Marketing and Brand Management, and in my daily interactions with students, I am privileged to hear their stories of success and acceptance here at WLU. Additionally, I am an adjunct faculty member in the College of Arts and Communications, and I can say without a doubt that we boast some of the most talented and hardworking students in the state.

West Liberty University is undoubtedly a special place to many people, but it's also educating and shaping the future of our region, our state, and our world. I hope that you will support the new model that will undoubtedly have a tremendous impact on our institution and other great institutions in the state; an impact that will have a very positive effect on so many students in West Virginia.

Thank you for your time and consideration, and for your continued efforts to improve the higher education in our great state.

To the Office of the Chancellor, West Virginia Higher Education Policy Commission:

As a staff member of a West Virginia higher education institution, Concord University, I am asking you to support the new higher education funding model. Without a doubt, you have received an overwhelming number of templated pleas for support claiming this model will reduce the number of students who do not enter college due to financial barriers. While those claims are true, what those requests leave out are two important points. First, the fact that the current funding model has been in use since before some of these students were even born. Don't you believe it's time for change? That over the years the assumptions used to develop the current model no longer hold true? Secondly, the proposed funding model could be used to supplement rising costs rather than increasing tuition (making college more affordable) or even to upgrade technology and facilities making more WV institutions and students competitive in higher education and the workforce.

Thank you for your time and consideration.

Concord University serves students from some of West Virginia's neediest counties. The kinds of students from these counties are often best served by institutions close to their homes and with resources tailored to the needs of those communities. For many years, Concord has received a somewhat smaller allocation of funds compared to there state institutions, in spite of serving some of the state's poorest counties. This new funding model would put more state resources in place to have some of the highest impacts.

To the Office of the Chancellor,
West Virginia Higher Education Policy Commission:

Please allow me to express my support for the proposed Student Focused Funding Model for higher education that would benefit my alma mater, Concord University, by bringing a measure of fairness to the distribution of state funding to West Virginia colleges and universities. I believe that public institutions of higher learning in WV, like **Concord University**, should be rewarded for meeting the criteria established by the proposed funding model. The $2.2 million addition to the Concord budget provided by the new funding model would greatly benefit our current students and Alumni by helping to revitalize our campus and further extend our outreach to assist WV Students for many years to come.
Thank you for the opportunity to provide comments on the funding model.

Please allow me to express my support the new higher education funding model as a member of the Concord University staff. I believe that public institutions of higher learning in WV, like Concord University, should be rewarded for meeting the criteria established by the proposed funding model. The $2.2 million addition to the Concord budget provided by the new funding model would greatly benefit our entire campus. In light of the many years of appropriation decreases and budget cuts, WV higher education staff have lived in fear of losing their jobs. This model would help to secure staff positions and allow Concord to invest in services that help both our staff and our students succeed. The Classified Staff Council fundraises annually to assist children of staff members to attend Concord and we look forward to being able to continue that tradition. As the rising costs of living, transportation, textbooks and tuition and fees grow, WV students are all too often faced with critical decisions that time and again result in their inability to attend college. This new formula would help to increase access for those students seeking a degree who currently cannot meet the financial challenges of attending. Thank you for the opportunity to express my support for the funding model.

This new funding model does away with the inequities some of the smaller colleges have endured for my entire career (30 years) in higher education. The model doesn't penalize a school for being small and it doesn't penalize a small school because of its mission. This is the right thing to do. Please approve the new funding model.

Concord provided an academic foundation in Software Engineering that launched a career I still enjoy today. Many of the relationships I formed with staff and classmates during my time in Athens have endured throughout the years as well. I will be forever grateful for the opportunity to study and mature at this outstanding University, and your consideration of this funding model could provide the same experience to additional young adults.

Subject: comments regarding 4 year College Funding Formula

Dr. Hill,
I am writing in support of the proposed 4 year College funding formula. I currently teach at Concord University, but was at Glenville State College for 7 years prior to coming to Concord. Though I understand that GSC could be hurt by this formula (and I am very sympathetic to their situation), I think that a formula such of this is much needed for determining how state money should be allocated. Certainly International students and out-of-state student add diversity to campuses. However, they are unlikely to stay in WV and contribute their skills to our citizens and economy. Students who are most likely to stay in state to work after graduation should get priority. We also need to give priority to high risk and economically disadvantaged students.

Thank you for the opportunity to express my support for the funding model.

I am also an alumnus of Concord College, 1993. I have always taken pride in my job and knowing I received my education from Concord.

I work in Admissions. I strive to offer the best customer service and the best information for any student. I work with transfer, readmit, non-degree, and transient students. I make certain they have the knowledge going forward with the application process. If a readmit student is in default on their loans, not meeting Satisfactory Academic Progression (SAP), have holds on their accounts, etc., I alert them up front so they can take care of these status'. Some students don't realize they have these barriers to face and are happy someone is helping them, giving them the information needed to be admitted so they can conquer the barriers and meet their goals. Transfer students are informed of transcripts not mentioned on their application as an evaluation is done through the National Student Clearing House and the National Student Loan Data System to alert them of transcripts needed before a decision on admission can be determined. Non-degree students are informed they will not receive financial aid if not seeking a degree. Concord has provided cross training with Financial Aid so I can alert students during the application process. Students who attend Concord love the small community atmosphere and they know faculty and staff are always willing to help. They also know they are receiving a quality education.

Please take Concord into consideration when determining the New Funding Model.

Best,

Andrea Tabor

Subject: West Virginia Code §18B-1B-4(d)

Dear Sirs:
I would like to share my comments in regard to West Virginia Code §18B-1B-4(d), the proposal to develop a fair and equitable formula in distribution of state funds to all higher education institutions in West Virginia. I am very much in favor of this Student-Focused Funding Model. This model provides an objective and equitable means of distributing general appropriation funds to public four- year institutions based upon the courses attempted by West Virginia resident students [ACCESS], the progress resident students make toward on-time degree completion [SUCCESS], and the number of students who finish college with high-quality degrees [IMPACT].

The need to distribute funding to higher education institutions across the state of West Virginia in a more fair and equitable manner is long overdo. Most states, over 37, have already adopted funding formulas for their higher education institutions.

We have to remember that our smaller institutions deserve fair distribution of funds in order to be successful and to continue to grow. Concord University has been extremely important to the residents of West Virginia, as well as the other smaller institutions in the state.

I am very hopeful that the Student Focused Funding Model will be approved in order to assist all higher education institutions in West Virginia meet the needs of all students and help the future and success of West Virginia.

To the Office of the Chancellor, West Virginia Higher Education Policy Commission:

Please allow me to express my support the new higher education funding model as a member of the Concord University administration. I have worked in higher education for nearly 25 years, at campuses around the country. In any state system of higher education, state appropriation of funds must be appropriated in a consistent and reasonable manner. Our current model provides no such consistency or reason. Disparities among different institutions seem to exist because "they always have." The proposed model brings consistency and fairness to the process, while clearly defining the criteria used to determine funding levels. Concord stands to benefit by $2.2 million, other institutions more, some less – while others stand to see their funding decrease. This is not a disparity, but rather a leveling. Given the financial difficulties facing our regional institutions, now is the time for the state to bring stability, reason, and fairness to its funding model.

As both an alumni and three-time employee of Concord, I know the value of our regional institutions and the impact they have on local economies, to say nothing of the contributions our students, faculty, staff, and alumni make to the state. This funding model will help to ensure that this tradition continues at Concord, as well as at other institutions around WV.

Needless to say, I fully support the proposed funding model.

Sincerely,

Jamie Ealy

Subject: New Funding Model

To the Office of the Chancellor, West Virginia Higher Education Policy Commission:

Please allow me to express my support the new higher education funding model as a member of the Concord University staff. I believe that public institutions of higher learning in WV, like Concord University, should be rewarded for meeting the criteria established by the proposed funding model. The $2.2 million addition to the Concord budget provided by the new funding model would greatly benefit our entire campus. In light of the many years of appropriation decreases and budget cuts, WV higher education staff have lived in fear of losing their jobs. This model would help to secure staff positions and allow Concord to invest in services that help both our staff and our students succeed. The Classified Staff Council fundraisers annually to assist children of staff members to attend Concord and we look forward to being able to continue that tradition. As the rising costs of living, transportation, textbooks and tuition and fees grow, WV students are all too often faced with critical decisions that time and again result in their inability to attend college. This new formula would help to increase access for those students seeking a degree who currently cannot meet the financial challenges of attending. Thank you for the opportunity to express my support for the funding model.

Thank You,

Eric Jewell

Subject: HEPC New Proposed Funding Model

To the Office of the Chancellor, West Virginia Higher Education Policy Commission:

Please allow me to express my support the new higher education funding model as a member of the Concord University staff. I believe that public institutions of higher learning in WV, like Concord University, should be rewarded for meeting the criteria established by the proposed funding model. Investing higher education funds into schools that serve predominately the families of West Virginia, similar to Concord University, is making an investment in the future of our state. The Higher Education Institutions that are providing access to opportunity and placing our students in the West Virginia workforce are the institutions that are needed to create innovation and fill the job shortages that our state currently face. The $2.2 million addition to the Concord budget provided by the new funding model would greatly benefit our entire campus. In light of the many years of appropriation decreases and budget cuts, WV higher education staff have lived in fear of losing their jobs. This model would help to secure the positions of hundreds of WV public employees and allow these institutions to invest in services that help both our staff and the students of our state succeed. In addition to the resources of our institution we would like to have the ability to expand the resources of our local areas to promote economic and population growth, security, and innovation. The Classified Staff Council fundraises annually to assist children of staff members to attend Concord and we look forward to being able to continue that tradition. As the rising costs of living, transportation, textbooks and tuition and fees grow, WV students are all too often faced with critical decisions that time and again result in their inability to attend college. This new formula would help to increase access for those students seeking a degree who currently cannot meet the financial challenges of attending. Subject: Higher Ed Funding Model

Good morning, and greetings from Athens, WV!

I wanted to lend my voice of support to the proposed funding model from the HEPC. I have worked at Concord University (and for the first years, College) most of my professional life, since 1999. I have seen many changes, and we have weathered many financial storms. My area, in Student Affairs (thought I have worked in Housing and Admissions before), seems to bear a particularly large brunt when financial times are tough. Just within my office, we have absorbed three full-time professional staff positions since I took this position in 2013 alone! We play the hand we are dealt, and I do love this job, but having a few additional resources to assist us with our efforts in student satisfaction and retention would go a VERY long way. It seems this funding model would help accomplish this.

I appreciate your and the HEPC's efforts to help equalize the playing field in WV Higher Education, and I believe, ultimately, the system will be better for it.

Best to all of you,

- A

Students like myself would not be able to go to college without every possible financial help available. The cuts to the state budget for the current fiscal year has already affected the costs for students. If costs increase again, anyone considering going to college may have to change those plans.

Best Wishes,

Subject: Support for Higher Education Funding Model

Dear Chancellor:

I support the proposed higher education funding model. As a taxpayer, multi-generation West Virginian, and lifelong educator, I am in favor of an equitable model that prioritizes our in-state students. Funding colleges and universities on the basis of their performance and their service to the people of West Virginia can and should be our priority.

As a state with a low percentage of college graduates, we need to direct our appropriations to fairly serve the population of our entire state. This is the only way we can achieve equity in a state dominated by first-generation or low-generation college students, and regional differences in economic climate.

I applaud your efforts to find equitable means to fund higher education and serve students from rural communities throughout West Virginia (although I admit to being partial to southernmost West Virginia, where I have watched our economic climate diminish to a dire state over the past 20 years).

Students across the state of West Virginia are steadily making the decision to come to college or to go straight to work mainly due to their low income households. Students should not have to worry about an annual tuition increase when it is already a struggle making ends meet at home. The $2.2 million addition to Concord's budget could allow the annual tuition increase to end and for students to be able to focus on school, rather than school and financial issues. I am so grateful for my commitment to Concord as the school has offered endless opportunities to not only my education, but also to my future employment. I feel as if Concord would use the increase to solely benefit the students. As the institution has continued to value and put the students first with the previous budget decreases, I am confident Concord will use the increase to continue making our name more honorable and elite.

Sincerely,
Chelsea Goins

As a Concord student, I support the new higher education funding model that would benefit Concord by bringing fairness to the distribution of state funding to West Virginia colleges and universities. I believe that public institutions of higher learning in WV, like Concord University, should be rewarded for meeting the criteria established by the proposed funding model. The $2.2 million addition to the Concord budget provided by the new funding model would greatly benefit students like me by funding Concord at a fair and competitive rate. This may decrease the need for further tuition increases in the future and ensure greater access for others like me to attend college. Thank you for the opportunity to provide comments on the funding model.

Subject: Funding Formula

Chancellor Hill:

I am writing to express my support for the Student-Focused Funding Model currently under consideration. I have been teaching at Concord since 2003, and the reduction in funding from the state has made it more and more difficult for Concord to serve our students. As you are well aware, Concord and several other schools in the state are now struggling with some very serious financial difficulties. These difficulties are exacerbated by the inequities of the current funding schedule. The new funding model would be fairer to all WV schools and allow us to better compete for and serve the students of WV.

Thank you and best wishes.

Subject: Student Focused Funding Model

I am writing today to formally ask the Office of the Chancellor and the HEPC to support the Student-Focused Funding Model for Higher Education in West Virginia. As a Concord College Graduate, and supporter, I have been very concerned for several years about the funding mechanisms provided by the State to our institutions of Higher Education. The Student-Focused Funding Model would provide a more equitable model for ALL institutions in the State.
Thank you for your consideration in this matter.
Sincerely,
Greg Ball

Subject: Proposed Funding Model for Four-Year Schools

Dear Chancellor,

As a faculty member at Concord University, I was pleased to see the proposed alteration to the base funding for West Virginia's four year colleges and universities. While all of the educational facilities deserve robust funding, I think it is important to spend the money that the state applies to the system fairly. I think the proposed funding model comes closer to doing that than other models. It is important to evenly spread funding so that all students in West Virginia are afforded the opportunity to attain a college education if they so choose. Previous models, which have left holes in the funding of many schools, have required students to spend more and more money on tuition thus making it increasingly likely that only students of means will have educational opportunities. EVERY member of the West Virginia population deserves accessibility to education should they choose to pursue those opportunities.

I applaud you and the committee for working so hard to serve our students. Thank you.

Subject: Student-Focused Funding Model

Chancellor,
I would like to express my support for the Student-Focused Funding Model. Such a model will help smaller schools in West Virginia, particularly those like Concord University, which strive to serve the lower economic demographic of West Virginia. We provide a liberal arts education and provide a more intimate setting for learning that benefits many students, as compared to larger class sizes and impersonal interactions that come with bigger schools. Smaller institutions are necessary for many West Virginian students to get the education they need, whether that is because they have to commute, want to be close to home, or need a smaller campus which more personal interactions, and this funding model will aid us in providing that.
Thank you for your time,
Haley Fields

Subject: Student-Focused Funding Model

Dear Chancellor Paul Hill,

I firmly believe that the Student-Focused Funding model put forth by the WVHEPC will take our state to the next level and more appropriately fund our state's colleges and universities. As a Concord University staff member for over 21 years and now a member of the Board of Governors for Concord, this funding model reaffirms a very positive aspect of what I think makes Concord so special as well as several other institutions in our great state, namely who we serve. Over 80% of our students at Concord are native West Virginians. Likewise, these same students often become our teachers, our healthcare providers and many other service personnel that our state desperately needs. Moving to a more equitable funding model like this will allow institutions like ours to better fulfill our mission and meet the needs of not only our students but our state for years to come. This funding model will also provide structure to everyone involved to more aptly serve resident and non-resident students alike and encourage graduates to remain and build a more robust workforce within our state. It will also encourage better participation among faculty and staff alike to have a more vested interest in our student's success and future. We all want to improve our student's ability to reduce their loan debt, to increase their employability and to help the state grow. This funding model will allow all of these things and more if given the chance. Speaking from a staff member's perspective with many years of service to Concord I can say that the staff here are absolutely committed to the success of our students and our state. Please help us do more by making this funding model a reality so that we have a fair and equitable solution.

To whom it may concern:

I read with great interest the Gazette-Mail article April 5th on the program to increase access to higher education for WV individuals who are having difficulties. I received a federal training grant in 1988 which helped pay for my masters degree at the University of Vermont in Communication Sciences and Disorders. Following graduation as an AAC specialist I worked for 23 years until my retirement. This grant was available to international students and several of them who got the grant did not stay in VT and work for the required 2 years. They reimbursed the grant money and returned to Canada. I stayed and worked as previously mentioned for 23 years. I expect this is not unusual and strongly support monies going to WV permanent residents only.

Now Retired I split my time between WV and ME. The Maine legislature is tackling the same issue. Please read in the Portland Press Herald about a bill to help low income families with education costs which has just become law without the governors signature. The funds will be available to those who are eligible for, but do not receive, Temporary Assistance to Needy Families benefits.

Sincerely,

Subject: Higher Ed proposed funding model

I'd like to express my support for the new funding model for higher education proposed by HEPC.

I am an employee of Fairmont State University and a graduate of Bluefield State College. I have seen the funding struggles that our institutions face from both a student and employee perspective, and I think the proposed model would be a strong move in the right direction.

I believe it's important to reward our institutions that focus on West Virginia students. We have lost population in recent years, and too often, we lose the most educated of our population at a disproportionate rate. Without an educated work force, we're unlikely to bring in new businesses and industry, and we've already seen these challenges manifest across the State.

Thank you for your time.

Subject: Support of WVHEPC proposed Student-Focused Funding Policy

Hello Chancellor,

I strongly support the West Virginia Higher Education Policy Commission's proposed Student-Focused Funding Model.

I feel that hard working West Virginians tax dollars which are allocated by the state to higher education, must go directly to funding and supporting our fellow West Virginians.

Out of state students do a lot for our economy and culture, but WV tax dollars should be solely focused on our in state resident students.

Again, I strongly support the proposed WVHEPC Student-Focused Funding Model.

Respectfully,

Jon

Subject: Support in Favor of the Proposed Funding Model

Chancellor Hill,

I write to you today to pledge my support to the proposed funding model put forth by HEPC to allocate state appropriations to senior higher education institutions. As a lifelong resident of WV and a two time alum of Fairmont State University, I urge you to move forward with suggesting this allocation of funding you have proposed. As a taxpayer of this state, it is only appropriate that my tax dollars go to support other WV residents in their quest for higher education. As the economy in WV continues to struggle and the need for more individuals to be educated grows, do what is imperative to help this state and support its residents. The distribution of funds is fair and equitable and will help higher education institutions ensure they are providing what the state of WV needs. I thank you for your comprehensive approach to directing state tax dollars to support much needed initiatives in this state.

With Much Respect,

Christa Kwiatkowski

Subject: Support for new funding formula

Dear Chancellor Hill,

As a senior faculty member and Coordinator of the Department of Music at Fairmont State University, I support the proposed new funding formula for West Virginia's institutions of higher education. As a professor of Music, I am encouraged to see the recognition that a pure FTE-based funding formula "fails to recognize the variation in instructional costs across academic disciplines" (*Student-Focused Funding*, slide 9).

I believe this proposal takes a significant step in correcting what has appeared to me, since I arrived at Fairmont State in 2004, to be inequities in Fairmont State's funding. I believe, with President Martin, that the measures prescribed in this formula can be transformational for our institution.

It is important to note that, at 87% of total enrollment, Fairmont State's West Virginia student contingent is the largest of any institution in the state. Furthermore, our percentage of non-resident graduates who remain in the WV workforce is nearly nine percentage points higher that of West Virginia's flagship university. Fairmont State University is an excellent candidate for tangible recognition of service to West Virginia's own students.

Sincerely,

Anne L. Patterson, Ph.D.

Subject: Comment on proposed funding model

Chancellor Hill:

I write from my personal email as a native of West Virginia and a proud graduate of Fairmont State to say that I believe the proposed new funding model can change the face of higher education in West Virginia and greatly nourish my alma mater in what has ever been her mission: to educate the young adults of West Virginia and thereby better our West Virginia community. As I was a first-generation college student, Fairmont State was transformational for me. I was blessed with parents who, though blue-collar themselves, understood the treasure that is higher education. That Fairmont State was not only academically rigorous and noted but also affordable and in my home town made it my first and only choice. I always knew I would go to FSU. But what I received from Fairmont State has been so much more than I could ever have imagined. Because I learned how to learn, I have had a long, rewarding career. Because of what I learned, I have had my choice of good, well-paying jobs; and my family has always been financially secure. Because of what was offered to me here, my life has been made richer by the beauties of literature, art, music and theater. But beyond that, I learned to be a citizen of the world, and to understand the concept of service to others and community. This is what it means to be a West Virginian. This funding model recognizes Fairmont State and our other regional institutions as the primary educators of, primarily, West Virginians, and it honors that the citizens' taxes should logically be directed to the greater good of West Virginians. While we welcome and want out-of-state students to attend our wonderful institutions, I believe our limited funding in West Virginia should be toward our populace first. I believe this proposed new model does just that. Thank you for allowing comments.

Subject: Public comments on the budgeting

I would like to ad my comments to the proposed rebudgeting for West Virginia universities. I believe that West Virginia should invest in the education of West Virginia residents and provide more funding for schools that are educating West Virginia residents so the proposed new budgeting system is a major step in that direction. The students from out of state who come to West Virginia for school are welcome but West Virginia should not pay for their school since they will mostly be returning to their home states when their schooling is complete. We have been paying to educate West Virginia's economic competitors. Funding should go to the schools that support West Virginia through long term population and tax revenue.

Subject: Glenville State College

Dear Chancellor,

We are writing in support of Glenville State College. My wife's parents graduated from Glenville (40"s) and we support Glenville financially.

As we understand, almost 87% of Glenville's students are WV students. Glenville is a convenient, centralized college that is easily accessible for the central counties of our state. Many of these students come from economically challenged communities many of which are 1st generation High School graduates, 1st generation college attendees and 1st generation college graduates. Our families are an example of this and as a result, the successive generations have attended colleges, graduated and have become productive tax paying citizens.

Glenville State College is an economic engine for Central West Virginia.

Therefore, we would ask that you reconsider the drastic cuts projected for this honorable establishment.

Sincerely,

John and Cathy Arritt

To: Chancellor's Office
Subject: Glenville State

Sir, I think the funding model for higher education needs to take in the overall effect the institution has on the economic development of it's region. In the case of Glenville State it is the only bastion of higher education in many central counties. It provides resources and activities many of the people that live in this area would never experience without it. It provides more to the region than just a college education it provides an affordable opportunity to better the region that has little going for it other wise. Central WV needs Glenville State, in fact a greater outreach would be beneficial.

This type of information needs to be included when apportioning funds. The impact is often greater than simple numbers of students of degrees.

Thank you,

Subject: House Bill 2815

Dear Chancellor,

I am writing to voice my concern over the recommendations contained in House Bill 2815.

According to the President of Glenville State College, those recommendations would cut funding to G.S.C. by almost 1 Million Dollars!

That would be devastating and would result in the very future of the College being left in doubt.

I am an example of the importance of this college.

I graduated many years ago as a first generation college graduate and spent 40 years as a teacher, principal and superintendent in WV.

Glenville College has produced many graduates like me, who have stayed in the WV and made many contributions to the State and the

younger generations that followed them.

Glenville College has provided a gateway to an education and success for thousands of Central West Virginians who in turn have

become good citizens and contributing members of our State!

I know the trend is to make the rich richer but I implore you to remember the multitudes who pay taxes and contribute to the success of

the State of WV.

Thanks for the opportunity to express my concerns and best wishes as you wrestle with the difficult task of funding for our colleges

and universities.

Subject: HEPC

To Whom It May Concern,
It has been brought to my attention that the state legislature is considering a funding framework that will negatively impact the smaller institutions in West Virginia.

I'm writing in behalf of Glenville State College. Being denied 17%, or $976,595.00, will put a terrible strain on their budget, something they obviously cannot afford.

As graduate out of state student, Glenville provided me with an excellent education. The faculty and staff were knowledgeable, well prepared and available when needed. I was well prepared when I entered the field of education.

I'm writing to implore you to reconsider this program funding model.
Sincerely,
Patricia Guzzie Tonarelli-Bigi

Subject: In support of the proposed funding formula model for higher education

Chancellor Hill,

At the request of Dr. Mirta Martin, President of Fairmont State University, I have reviewed the details of the proposed funding formula model explained in the PowerPoint presentation entitled, "Student-Focused Funding for West Virginia Public Higher Education." As proposed, this funding model seems to benefit students, public colleges and universities, and the state of West Virginia and has my full support.

In my position as the Director of the Center for Educational Support Programs, I oversee the Office of Exploratory Advising, which advises undecided, pre-nursing, and non-degree students, and I serve as the Regents Bachelor of Arts (RBA) Degree Program Coordinator. Essentially, the student populations served by these offices are the high-risk populations identified in the proposed funding model.

In addition, three out of the four Student-Focused Initiative examples (funding training for academic advising, for innovative degree programs for adult students, and for strategic course scheduling) will have a direct impact on the daily operations of my offices. Most importantly, these initiatives have the potential to increase student access and success. The proposed funding model not only considers multiple key variables but also sets up a synergistic paradigm for all involved constituents.

Again, I fully support the adoption and implementation of the proposed funding formula. Please feel free to contact me if you need any further information.

Sincerely,

Pamela Stephens

Subject: I Support The New Funding Model

To the Office of the Chancellor, West Virginia Higher Education Policy Commission:
Please allow me to express my support the new higher education funding model as a member of the Concord University staff. I believe that public institutions of higher learning in WV, like Concord University, should be rewarded for meeting the criteria established by the proposed funding model. The $2.2 million addition to the Concord budget provided by the new funding model would greatly benefit our entire campus. In light of the many years of appropriation decreases and budget cuts, WV higher education staff have lived in fear of losing their jobs. This model would help to secure staff positions and allow Concord to invest in services that help both our staff and our students succeed. The Classified Staff Council fundraises annually to assist children of staff members to attend Concord and we look forward to being able to continue that tradition. As the rising costs of living, transportation, textbooks and tuition and fees grow, WV students are all too often faced with critical decisions that time and again result in their inability to attend college. This new formula would help to increase access for those students seeking a degree who currently cannot meet the financial challenges of attending. Thank you for the opportunity to express my support for the funding model.
Thank you for your time and consideration.

From: BILL CLARK <[redacted]
Sent: Thursday, April 26, 2018 10:56 AM
To: Chancellor's Office
Subject: Shepherd University

Hello Chancellor Hill:

I learned recently much as I had always suspected, that funding for higher education throughout the state has been a little unfair to some of the outlying areas. This is not just an issue in education as there are many sectors of State government that these discrepancies have broadened over time. The distance from our central government and the appearance of prosperity in our region has helped buffer many of the trepidations about funding inequalities especially in the eastern panhandle.

Using the current formulas Shepherd University has historically been underfunded when compared to the other state institutions. In the most recent fiscal year, Shepherd, received the lowest state appropriation of all the four-year West Virginia state institutions, dead-last among eleven institutions with only $2,960 allocated per student annualized FTE.

Based upon a newly proposed "Student Focused Funding for West Virginia Public Higher Education" model Shepherd University could benefit by adding to the university's operating budget. There may be concerns when folks elsewhere review the new allotments but Shepherd is so poorly funded right now that the model produces a higher proportionate increase for Shepherd than for any other institution.

The new funding model would greatly benefit Shepherd students and potentially help elevation populace living within known pockets of despair as well as recognize and reward Shepherd's efforts to train the next generation of leaders and model citizens. A demand and reward process seems to promote educational accountability. The model rewards those institutions that make good use of state taxpayer dollars to educate state residents.

I support efforts to provide training in high demand fields such as healthcare, education and engineering and support the proposed the new model.

Thank you for the opportunity to provide input into this important process and I hope this new balanced formula is positively considered and moved forward.

Sincerely,

Thanks,
Bill Clark

Chancellor Hill,

I am writing to ask for your support in voting for the Student-Focused Funding Model. For far too long funding for institutions of higher education has been inadequate for many institutions in the state, and West Virginia students have been short-changed. We need to try something different.

It was disappointing to discover West Virginia is one of the states which still does not have a funding model in place. I would strongly urge you to change that statistic.

Please vote in support of the Student-Focused Funding Model.

Sincerely,

This new funding model rightfully places emphasis of tax revenue to enhancing the lives of West Virginians. I was quite surprised to learn about the vast disparity in current higher education system funding and am excited that this new, formulaic-driven system will intelligently disburse money in ways that promote innovation, retention, and graduation of WV students. This is a no brainer.
Thanks.

Importance: High

Dear Chancellor Hill,

As a Shepherd employee, I support the new higher education funding model that would benefit Shepherd University by bringing fairness to the distribution of state funding to West Virginia colleges and universities.

I believe that Shepherd University should be rewarded for meeting the criteria established by the proposed funding model.

The $3.4 million addition to Shepherd's budget provided by the new funding model would greatly benefit Shepherd students by funding Shepherd at a fair and competitive rate.

Thank you for your consideration.

Best Regards,

Mitchell B. Woolley

Subject: Student-Focused Funding Model

Dear Chancellor Hill:

As a faculty member at Fairmont State University, I am emailing in support of the proposed Student-Focused Funding Model. I have carefully reviewed the WVHEPC PowerPoint information forwarded to faculty from our President, Dr. Mirta Martin. This is one of the most important proposed pieces of legislation that has been introduced in West Virginia on behalf of the higher education system in many years. This model will mark a new beginning for the reallocation of resources to public institutions in West Virginia in a more fair and equitable manner.

Thank you for supporting our university through the Student-Focused Funding Model. It will be transformational for our institution.

Sincerely,
Amanda Metcalf

Subject: Proposed Funding Formula

Dear Dr. Treadway,

I would like to thank you for attending Advisory Council of Faculty (ACF) Retreat meeting on Friday July 13, 2018, and presenting the Proposed Funding Formula. This gave the faculty representatives an opportunity for the first time to question and comment the funding formula. Per our conversation and your request, I am sending this email of explanation.

The Funding model is highly bias against WVU Tech/ WVU Beckley. As I mentioned the outcome of a funding model can be manipulated by what factor(s) are considered.

1. WVU Tech has the second fully ABET accredited engineering programs within WV. Moreover, important contribution in research is expectation and requirement from faculty members. Therefore, WVU Tech must not be compared with or included with colleges such as Bluefield State, Glenville State, and Potomac State College. WVU Tech should be in the university group and NOT in the college group. A history note, over 25 years ago, Governor Caperton divided WV Higher Education into two systems, university and college system, then WV Tech for a sole and wrong decision end up in the college system very much the same as the proposed Funding Formula without using any software and computer model. Consequence of that decision was again the same; funding for WV Tech was listed as a college not considering the uniqueness of this institution with engineering programs which was a disaster for Tech.
2. The model considers WVU and MU high in research with factor of 10 for each, and WVSU factor of 2.5 and completely ignored WVU Tech. A courtesy look at P&T policy reviles that important contribution in research is expected. Moreover, information regarding research activities and grants can be obtained from OSP of WVU.
   Note, WVU is a R1 institution while MU is not, but the model did not recognized that important factor. It is unfair treatment of WVU.

I am sure if WVU Tech/WVU Beckley is treated properly and fairly, the outcome of the Proposed Funding Formula will not be as devastating for WVU Tech.

Many Thanks
Asad Davari, PhD.
Professor ECE
WVU Tech/WVU Beckley ACF Representative

Proposal to Address Funding for WV Higher Education (Ver 2)

Recognizing the purpose of the Blue Ribbon Commission is to create a sustainable model for higher education in West Virginia, the approach below represents a compromise in addressing the needs of the regional institutions.

For the current budget year (FY19), a $10 million dollar infusion of money into the regional institutions will be allocated by the legislature acknowledging the budget surplus of $28M in FY18. The funding amounts are informed by the data from the student-based formula currently being considered. The additional recurring distributions below will be made to the base budgets of the institutions:

Bluefield State College	$568,000
Concord University	$1,822,000
Fairmont State University	$2,620,000
Glenville State College	$0.00
Marshall University	$0.00
Potomac State College of WVU	$302,000
Shepherd University	$2,840,000
West Liberty University	$1,364,000
West Virginia State University	$484,000
West Virginia University	$0.00
WVU Institute of Technology	$0.00

The above distribution will have a stabilizing effect on the regional institutions and will position the system to put in place objective measures to distribute existing and new funding dollars in the future. A funding model will be developed with the initial conditions:

- The medical school funding (the appropriated funds to Marshall University and West Virginia University and the soft drink tax) will be removed from consideration for the model.
- Special-purpose funding at West Virginia University, Marshall University, and West Virginia State University will be removed from consideration for the model.
- A base funding of $1.5M* will be assigned to each of the 11 institutions as an administrative critical mass as was proposed in the Texas funding model. This will take $16.5M out of the funds to be assigned.

The Blue Ribbon Commission will work with the HEPC to develop a new funding model that will be applied after the distribution of the revenue to the regional institutions. The formula will be developed with buy-in from all institutions. The new funding formula will go into effect as early as FY21.

**according to how you interpret the Texas model, this base could range from $750K to $1.5M*

Dr. Carolyn Long, Interim Chancellor
Michael J. Farrell, Esq., Chair
West Virginia Higher Education Policy Commission
1018 Kanawha Boulevard, East - Suite 700
Charleston, WV. 25301

Dear Chancellor Long and Chairman Farrell,
My name is Ergie R. Smith, Jr. I am a graduate of Bluefield State College, a Historically Black College Institution. I am proud to identify myself as an ardent, active supporter of Bluefield State College and its programs.

I recently read an article in the Charleston Gazette Mail where the Higher Education Policy Advisory Commission recommended increasing dollars for the state's smaller colleges. Ironically, WVSU ($484,000) and Bluefield State ($568,000) who proudly carries the label of a HBCU received the least amount respectively. I am aware that WVSU may receive additional funds ($602,000) based on the recommendation of Eric Lewis, President of Shepherd University Board of Governors.

It is my understanding that HBCU status serves as a historical identifying marker and earmarks the bearer as a recipient of additional funding to carry out their mission.

In the interest of fairness and the pressing need for additional funds, I am requesting that 1) the HEPAC include HBCU status as a component of the formula or funding model used to determine the amounts allocated and 2) amend the current funding recommendation to increase the allocation for Bluefield State College and West Virginia

State University respectively.

Thanking you for your consideration. I await your response.

Respectfully,
Ergie R. Smith, Jr.

Suite 700
Charleston, WV 25301

Dear Members of the Commission:

I am Dave Hauser, and I am fortunate to be Chair of the West Virginia University Faculty Senate this academic year. Representing the faculty at West Virginia University, I write in strong opposition to the proposed funding model that is being considered by the West Virginia State Legislature and the Higher Education Policy Commission. While there are issues with higher education in our state, the proposed model does nothing to address the problems West Virginia has and only hurts our state's ability to educate our population and create jobs and growth.

I have been teaching at West Virginia University since 2005, and have been active in faculty leadership for a long time. Faculty here recognize the unique place that WVU serves for our state, both in term of education, research, and economic growth. The proposed funding formula penalizes West Virginia University for the successes we have had, and makes it harder for us to continue to succeed in the future. That is not a winning formula for West Virginia.

As it stands now, the proposed funding formula rewards institutions for opening their doors and allowing West Virginia high school students to attend college. That is good; education is a sure driver of both individual and West Virginia success. However, just allowing students to begin college is not the same thing as educating them to succeed. Any new funding formula should reflect institutional achievement at graduating students, not just letting them in. West Virginia is poorly served if our students do not graduate.

Beyond tying the formula to metrics of graduation or academic achievement, the formula takes little account of research productivity. As you know, West Virginia University successfully achieved "R1" status some time ago. Just over a hundred institutions of higher learning across the country manage to achieve the highest research classification. While the research West Virginia University creates has impacts across the globe, the mission of the University remains focused on the state, and significant portions of WVU's research agenda directly and indirectly contribute to economic growth and productivity here at home. The funding formula, as it is currently drafted, makes little attempt to credit West Virginia University for our research activity.

Department of Political Science
Phone: 304-293-3811
Fax: 304-293-8644
PO Box 6317
Morgantown, WV 26506-6317

Equal Opportunity/Affirmative Action Institution

West Virginia University has a long and successful record of educating West Virginia citizens, and productively helping our state. The past few years have produced numerous budgetary problems across the higher education spectrum, for West Virginia University and other institutions of higher education in the state. Forcing West Virginia University to suffer another round of what amounts to budget cuts again will harm this institutions ability to educate students, produce research that helps the state of West Virginia, and economically benefit the state. I urge you to reconsider the proposed funding formula.

If you have any questions, or want to talk further, I would be happy to continue the conversation.

Sincerely,

Dave Hauser
