Security Cameras RFB

Addendum #2 Questions and Answers

June 2, 2021

- 1.) Question: Answer 2 states Raid 5 and redundant power supplies, however I am showing the NVRs for Wyoming, Boone, and Lincoln (Speco N32WVRE24TB, N32WVRE24TB) do not appear to meet these specifications. Are these excluded from the server specification?

Answer: The NVR will not need raid 5.

- 2.) Question: Answer 4 does not list the quantities and locations of the existing cameras to remain. That information is crucial to calculate the required storage capacity.

Answer: Boone will have a total of 18 camera. We need room to add additional if needed so maybe 25 cameras as minimum. Lincoln will have 15 and need room to expand to 25 minimum. Logan will have 71 cameras and need room to expand to 100. Wyoming will have 16 and need room to expand to 25.

- 3.) Question: Lincoln Campus is not listed on Exhibit F price list. Is the Lincoln Campus part of the project?

Answer: Yes, Lincoln is part of the project. An updated Price List is attached with updates to the Boone Campus and the Lincoln Campus is added.

- 4.) Question: Logan Campus lists two servers for 50 cameras. Is that for 50 cameras each? (project shows 71 cameras)

Answer: The Logan Campus will have two servers one will host up to 50 cameras.

- 5.) Question: Both Logan campus and Williamson campus list two servers each. Is each server to be managed independently? Or are all the servers on the same campus to integrate into one server on each campus allowing easier management?

Answer: The Logan and Williamson Campus will have two servers and our IT staff will manage them independently.

Updated Price List

Quantity	Brand	Description	Unit Price	Line Total
