**SECTION 2: BACKGROUND INFORMATION**

The National Science Foundation (NSF) Established Program to Stimulate Competitive Research (EPSCoR) was started in 1978 to assist the NSF in its statutory function "to strengthen research and education in science and engineering throughout the United States and to avoid undue concentration of such research and education." EPSCoR goals are to provide strategic programs and opportunities for EPSCoR participants that stimulate sustainable improvements in

their R&D capacity and competitiveness, and to advance science and engineering capabilities in EPSCoR jurisdictions for discovery, innovation, and overall knowledge-based prosperity. West Virginia (WV) has been part of the EPSCoR program since 1979 and received its first award in 1980.

NSF EPSCoR Research Infrastructure Improvement (RII) Track-1 awards provide up to \$4 million per year for up to five years. They are intended to improve the research competitiveness of jurisdictions by improving their academic research infrastructure in areas of science and engineering supported by the NSF and critical to the particular jurisdiction's science and technology initiative or plan. In West Virginia, the Higher Education Policy Commission (HEPC)'s Division of Science and Research is the entity responsible for the management of the RII Track 1 award.

The Track 1 award will be entering Year 3 on June 1, 2025.

### **SECTION 3: SCOPE OF SERVICES**

The West Virginia higher education policy commission: West Virginia Network for Functional Neuroscience and Transcriptomics (WV-NFNT) project is a five-year project (2023-2028) funded by the National Science Foundation's (NSF) Established Program to Stimulate Competitive Research (EPSCoR) Track I program. The evaluation questions and purpose are described below (See **Exhibit F** for Project Summary).

#### Evaluation Questions

- **EQ 1 - (Project Goals 1 and 2 Advance research infrastructure and productivity):** To what extent has the project been successful in building institutional capabilities in functional neuroscience, including technologies and expertise needed for high resolution structure-function studies of synaptic and circuit plasticity?
- **EQ 2 - (Project Goal 3 Increase Participation):** To what extent has the project used effective strategies to increase participation in STEM among all citizens including first generation students?
- **EQ 3 - (Project Goal 4 Education and Workforce Development):** In what ways has the project improved preparation of students, teachers, and early career faculty to create a pipeline for the STEM workforce, specifically in data science and neuroscience?
- **EQ 4 - (Project Goal 5 Partnerships and Stakeholders):** To what extent has a cooperative, mutually beneficial relationship developed between researchers, stakeholder groups, and the community?
- **EQ 5 - (Project Goal 6 Management and Dissemination):** To what extent has the project used effective strategies to achieve project goals and communicate with stakeholders?

#### **3.1 Evaluation Purpose**

The evaluation of the WV-NFNT EPSCoR Track I project is intended to provide the project leadership team with information regarding project implementation and progress made towards project goals. This includes assessment of progress in improving the State's science and technology capabilities in order to promote research competitiveness in West Virginia. The evaluation will report on long- and short-term impacts, as well as system- and individual-level changes.

EPSCoR aims to improve West Virginia's science and technology capabilities in order to promote research competitiveness. The evaluation will focus on these project outcomes:

a. Impact on Research Infrastructure

Identify barriers that may prevent the successful implementation of research infrastructure at participating campuses.

Assess the project's success in implementing research infrastructure and its use by participants to perform cutting edge research.

b. Research Productivity

Evaluate changes in the level of competitiveness among Track-1 project researchers through the number of grant proposals, publications, and paper presentations submitted, and their rates of acceptance.

Assess trend data on the number and amount of extramural funding generated by Track-1 researchers.

c. Impact on Students

Track the number of students participating in project events such as workshops and internships and their perceptions of how these events may have influenced their interest in STEM education or STEM careers.

Gauge the impact that student participation in NSF EPSCoR activities may have on STEM enrollment, matriculation, and workforce preparedness in West Virginia.

d. Impact on Workforce

Monitor impacts on the STEM workforce by documenting the number of internships filled, and the number of graduates who find jobs, including faculty positions, in STEM fields in West Virginia and the nation.

Maintain a database on internships, graduates, faculty positions, and career paths of students who participate in the Track-1 project.

e. Impact on Stakeholders

Document the evolution of stakeholder engagement in research and education especially with respect to the development of integrated project research in West Virginia.

Document community engagement in the research process over time, paying special attention to describing the progress made in establishing a cooperative, mutually beneficial relationship between researchers and local, national, and international communities.

Collect data via observations at joint meetings, and interviews with research and community representatives.

### **3.2 Anticipated Evaluation Methods**

The evaluation of the WV-NFNT EPSCoR Track I project will include both formative (process) evaluation to monitor the implementation quality of activities and strategies and to provide ongoing feedback to the team and summative (outcome) evaluation to assess achievement of goals and objectives. The Research and Evaluation will continuously work with the leadership team to develop and refine the evaluation plan, logic model, and data collection instruments.

#### **Formative Evaluation and Analyses**

The research and evaluation firm and the project leadership team will finalize output targets and adjust them throughout the award period when necessary. The research and evaluation firm will ask for feedback on project activities using formative methods including participant surveys, document review, project tracking, and individual interviews. Evaluators will share and discuss feedback with leadership in project meetings.

Program implementation and activities will be assessed through surveys, which will include both scale and open-ended questions for comprehensive feedback. Evaluators will use an annual survey to assess participant satisfaction, perception of usefulness, and achievement of objectives for project components. Interviews will be used to obtain feedback regarding supports and barriers to program implementation. The evaluators will also request tracking data collected by program leaders regarding the number of participants recruited, percentage of participants who identify as underrepresented groups (e.g., females and underrepresented minorities), and participation in program activities. Evaluators will share formative evaluation findings with leaders and discuss recommendations for improving the program.

#### **Summative Evaluation and Analyses**

Multiple data sources, including surveys, focus groups, and interviews, will be used to monitor outputs and determine the extent to which project outcomes are being met. The summative evaluation will include a mixed-methods approach to analyze data sources, including descriptive and inferential statistics (e.g., ANOVA, t-test) for comparisons of baseline to post data and between group comparisons (e.g., students vs. faculty) as well as thematic analysis of qualitative data, where appropriate. The research and evaluation firm will also monitor feedback provided by NSF.

The specifics of the project's evaluation are detailed in an **Evaluation Plan** (To be made available to the winning bidder. This evaluation plan will be revised annually with the support of the PI and team members, to ensure that the evaluation efforts are in line with the goals and expectations of the project team. De-identified data exported by the research and evaluation firm will be made available to the PI and co-PIs upon request at any point during the project period for publication purposes (observing all IRB protocols).

#### **Logic Model**

Previous Evaluators and project leads worked together extensively to generate a comprehensive logic model that captures and categorizes all of the projects' components. The logic models will be reviewed and updated by the research and evaluation firm, with feedback project leadership.

Other novel approaches to evaluating will be considered.

Upon request, the vendor must provide all necessary releases to obtain information to enable the Commission/Institution to verify that the vendor is licensed and in good standing with the above entities.

**SUBCONTRACTOR COMPLIANCE:** Vendor shall notify all subcontractors providing commodities or services related to this Contract that as subcontractors, they too are required to be licensed, in good standing, and up to date on all state and local obligations as described in this section. Notification under this provision must occur prior to the performance of any work under the contract by the subcontractor.

**27. ANTITRUST:** In submitting a bid to, signing a contract with, or accepting a Purchase Order with the Commission or any Institution of the State of West Virginia, the vendor agrees to convey, sell, assign, or transfer to the institution all rights, title, and interest in and to all causes of action it may now or hereafter acquire under the antitrust laws of the United States and the State of West Virginia for price fixing and/or unreasonable restraints of trade relating to the particular commodities or services purchased or acquired by the Commission/Institution. Such assignment shall be made and become effective at the time the Commission/Institution tenders the initial payment to vendor.

**28. VENDOR CERTIFICATIONS:** By signing its bid or entering into this Contract, vendor certifies (1) that its bid or offer was made without prior understanding, agreement, or connection with any corporation, firm, limited liability company, partnership, person or entity submitting a bid or offer for the same material, supplies, equipment or services; (2) that its bid or offer is in all respects fair and without collusion or fraud; (3) that this Contract is accepted or entered into without any prior understanding, agreement, or connection to any other entity that could be considered a violation of law; and (4) that it has reviewed this RFP/RFB in its entirety; understands the requirements, terms and conditions, and other information contained herein.

Vendor's signature on its bid or offer also affirms that neither it nor its representatives have any interest, nor shall acquire any interest, direct or indirect, which would compromise the performance of its services hereunder. Any such interests shall be promptly presented in detail to the Commission/Institution. The individual signing this bid or offer on behalf of the vendor certifies that he or she is authorized by the vendor to execute this bid or offer, or any documents related thereto on vendor's behalf; and that he or she is authorized to bind the vendor in a

contractual relationship.

VENDOR RELATIONSHIP:** The relationship of the vendor to the Commission/Institution shall be that of an independent contractor and no principal-agent relationship or employer-employee relationship is contemplated or created by this Contract. The vendor as an independent contractor is solely liable for the acts and omissions of its employees and agents. Vendor shall be responsible for selecting, supervising, and compensating any and all individuals employed pursuant to the terms of this RFP/RFB and resulting contract. Neither the vendor, nor any employees or subcontractors of the vendor, shall be deemed to be employees of the State for any purpose whatsoever. Vendor shall be exclusively responsible for payment of employees and contractors for all wages and salaries, taxes, withholding payments, penalties, fees, fringe benefits, professional liability insurance premiums, contributions to insurance and pension, or other deferred compensation plans, including but not limited to, Workers' Compensation and Social Security obligations, licensing fees, etc. and the filing of all necessary documents, forms, and returns pertinent to all of the foregoing.

Vendor shall hold harmless the Commission/Institution and shall provide the State and Commission/Institution with a defense against any and all claims including, but not limited to, the foregoing payments, withholdings, contributions, taxes, Social Security taxes, and employer income tax returns.

**30. INDEMNIFICATION:** The Vendor agrees to indemnify, defend, and hold harmless the State and the Commission/Institution, their officers, and employees from and against: (1) Any claims or losses for services rendered by any subcontractor, person, or firm performing or supplying services, materials, or supplies in connection with the performance of the Contract; (2) Any claims or losses resulting to any person or entity injured or damaged by the vendor, its officers, employees, or subcontractors by the publication, translation, reproduction, delivery, performance, use, or disposition of any data used under the Contract in a manner not authorized by the Contract, or by Federal or State statutes or regulations; and (3) Any failure of the vendor, its officers, employees, or subcontractors to observe State and Federal laws including, but not limited to, labor and wage and hour laws.

**31. **32. CONFLICT OF INTEREST:** Vendor, its officers, members, or employees, shall not presently have or acquire an interest, direct or indirect, which would conflict with or compromise the performance of its obligations hereunder. Vendor shall periodically inquire of its officers, members, and employees to ensure that a conflict of interest does not arise. Any conflict of interest discovered shall be promptly presented in detail to the Commission/Institution.

**33. BACKGROUND CHECK:** In accordance with W. Va. Code §15-2D-3, the State reserves the right to prohibit a service provider's employees from accessing sensitive or critical

information or to be present at the Commission/Institution based upon results addressed from a criminal background check.

**34. INTERESTED PARTY SUPPLEMENTAL DISCLOSURE:** W. Va. Code § 6D-1-4 requires that for contracts with an actual or estimated value of at least \$100,000.00, the vendor must submit to the Commission/Institution a supplemental disclosure of interested parties reflecting any new or differing interested parties to the contract, which were not included in the original pre- award interested party disclosure, within 30 days following the completion or termination of the contract. A copy of that form will be provided to the successful bidder. This requirement does not apply to publicly traded companies listed on a national or international stock exchange. A more detailed definition of interested parties can be obtained from the form referenced above.

**35. PROHIBITION AGAINST USED OR REFURBISHED:** Unless expressly permitted in the RFP/RFB published by the Commission/Institution, vendor must provide new, unused commodities, and is prohibited from supplying used or refurbished commodities, in fulfilling its responsibilities under this Contract.

## GUIDELINES FOR VENDORS FOR BID SUBMISSIONS VIA EMAIL

**NOTE:** This document is specific to the competitive solicitation processes, where bid submissions must arrive at the closing location on time.

### 1. Purpose of These Guidelines

The Commission/Council may post opportunities that allow vendors to submit their bids / proposals / responses (known as submissions) electronically via email. This document is intended to assist vendors in understanding:

- the risks associated with submitting an emailed submission; and
- the pitfalls that should be avoided if emailing a submission.

**NOTE:** Vendors who deliver submissions via email do so at their own risk; the Commission/Council does not take any responsibility for any emailed submission that:

- does not arrive on time;
- is rejected; or
- contains corrupted electronic files.

### 2. Risks

Although emails are sent every day without incident, there are a number of risks that could occur and delay the receipt of an email. An email submission is deemed to have been received once it arrives in the Commission/Council's Electronic Mail System. Emailed submissions that arrive late will not be considered, regardless of the reason, and vendors will not have the option to resubmit after the closing date and time.

Following are some of the reasons that may delay an email, or cause an email to be rejected by the Commission/Council's email system:

- i. Delays can occur as an email moves from server to server between the sender and the recipient, meaning that the time when an email is received can be later – and sometimes considerably later – than the time when it was sent. The Commission/Council will consider the time that an email was received by the Commission/Council's email system as the official time for any emailed submission.
- ii. The Commission/Council's email system has technical and security limitations on the size and type of files that will be accepted. Emails containing attachments that exceed 30 MB cannot be accepted.
- iii. The Commission/Council's email system has protocols whereby an email may be investigated as potential spam or containing a virus / malware. Such protocols may result in an email being sent to the recipient's inbox late.
- iv. The Commission/Council's email system has protocols whereby an email may be

investigated as having Personally Identifiable Information (PII). An email determined by the system to contain PII or data of a similar appearance of PII will not be delivered.

- v. The Commission/Council's email system is designed to reject any email that is considered spam or that contains a virus or malware. On occasion, an email may be falsely flagged and rejected. Copies of rejected emails are not kept in the email system, and therefore no possibility exists to retrieve an emailed submission that has been rejected.
- vi. In addition, it is possible that one or more attachments to an email to become corrupted and therefore inaccessible to the Commission/Council's email system. Vendor will not have the option to resubmit after closing if the attachments cannot be opened. Further, the Commission/Council cannot open any submission prior to closing to confirm whether or not the files have been corrupted.

### **3. Vendor Guidance for Emailed Submissions**

1. Never assume that a solicitation allows for emailed submissions. Emails should only be used as a delivery mechanism when the opportunity expressly allows for it.
2. Never assume which email address is being used for submissions, when emailed submissions are permitted. Carefully read the instructions and ask questions well in advance of closing if the email address for submissions is not clear. Submissions that are emailed to any address other than the one expressly stated for the purpose may be rejected as missing a mandatory requirement of the solicitation.
3. Avoid using generic subject lines in the emailed submissions that do not clearly identify the solicitation name and / or number as well as the vendor organization name. The subject line of the email should be: BID FOR xxxxxxxxx DUE WEDNESDAY xxxxxxxxx AT 3:00PM. A sample email subject line for an open bid might be: BID FOR 21001 DUE WEDNESDAY, APRIL 7, 2021 AT 3:00PM.
4. Avoid multiple emails from the same vendor for the same opportunity wherever possible. If multiple emails cannot be avoided (e.g., the collective size of the emails exceeds the maximum size allowed), identify how many emails constitute the full submission and provide clear instructions on how to assemble the submission. Multiple submissions from the same vendor for the same opportunity may result in rejection if these instructions are unclear.
5. Vendors may update, change, or withdraw their submission at any time prior to the closing date and time. If emailing updates or changes, do not submit only the changes that then require collation with the previous submission. Instead, a complete revised package with clear instructions that it replaces the earlier submission should be sent. This will help to avoid any confusion as to what constitutes the complete submission.

6. Avoid emailing submissions in the last 60 minutes that the solicitation is open. Sufficient time should be left prior to closing to ensure that the email was received, and to resubmit before closing if a problem occurs.
7. Do not assume that the email has been received. If a confirmation email is not received shortly after sending the email, contact the named Contact on the solicitation to confirm whether or not their submission was received. In addition, send the emailed submission with a delivery receipt request. If unsure how to send an email with a delivery receipt request, contact the vendor's own system support personnel or search online for instructions specific to the vendor's email system (e.g., Outlook, Gmail, etc.)
8. If the confirmation email is not received, do not resubmit without first contacting the named Contact. Resending a submission should only occur once confirmation is received that the original email was not received, and enough time is left for receipt of the submission prior to the closing date and time.
9. Do not ignore any message from the Commission/Council regarding rejection of an emailed submission. If such a message is received prior to closing, contact the named Contact on the opportunity immediately.
10. If time permits prior to closing, possible remedies for a rejected or missing emailed submission include:
  - i. If the collective size of the emailed attachments exceeds 30 MB, resubmit it over multiple emails, clearly identify how many emails constitute the full submission and how to collate the files.
  - ii. If the emailed submission included zipped or executable files, unzip or remove the executable the files and resubmit over one or more emails (see previous bullet if the files collectively exceed 30 MB).
  - iii. Resend the submission from a different email account.
  - iv. If permitted in the opportunity, use an alternative method to deliver the submission (e.g., mailed or hand delivered).

Note: None of these remedies are applicable after the closing date and time.

## Project Summary

### Overview:

The West Virginia (WV) jurisdiction proposes to significantly build human and physical infrastructure capacity in neuroscience and data science which are identified in the state's Science & Technology Plan as areas of existing strengths with high potential for growth. New collaborations among neuroscientists and bioinformaticists from four institutions across the state will form the WV Network for Functional Neuroscience and Transcriptomics (WV-NFNT) and position WV as a center for one of the most impactful neuroscience research areas – circuit and synaptic plasticity. WV-NFNT will expand the capability and diversity of those working in the fields of neuroscience and data science by implementing specific education and workforce development activities that will engage students, especially rural, first-generation college students, and other underrepresented groups, in these research areas. In accomplishing these goals, the team will address four of NSF's Big Ideas: (i) Growing Convergence Research, (ii) Harnessing the Data Revolution, (iii) Understanding the Rules of Life, and (iv) NSF INCLUDES. This project includes researchers from a diversity of institutional types including a R1, a R2, and two PUIs (including a HBCU).

### Intellectual Merit:

All organisms are challenged by dynamic and unpredictable changes throughout life. The underlying flexibility in nervous system structure and function, broadly known as neural plasticity, is the basis for how organisms can adapt and survive when confronted by change. Under different conditions, developmental stages, stimuli, or chemical exposure, plasticity can be achieved through adding or removing neurons or by remodeling neurons or connections at different levels (spatial, molecular, or physiological). Despite the importance of plasticity, the mechanisms by which the brain changes are not fully understood. An obstacle to addressing current gaps in knowledge is that the changes during plasticity can be both extremely small, yet vastly complex. For example, single neuron synaptic remodeling occurs at the nanoscale but across entire brain regions. WV-NFNT is specifically designed to use advanced techniques including stimulated emission depletion (STED) microscopy and single-cell and/or spatial transcriptomics to understand neural plasticity of circuits, neurons, glia, and synapses in various animal models organized in two inter-related themes. **Theme 1:** *Circuit plasticity during development and adulthood.* We address plasticity under different developmental conditions, asking how circuits are remodeled through experience in different animal models. **Theme 2:** *Synaptic structure and plasticity associated with altered function.* We ask how ultrastructure and gene expression in neurons and glia contribute to synaptic functions in response to external stimuli or perturbations. We integrate existing expertise to address fundamental and relevant hypotheses about the mechanisms that drive neural plasticity and build jurisdictional physical and human infrastructure to expand neuroscience and bioinformatics in WV.

### Broader Impacts:

WV neuroscientists and bioinformaticists will leverage WV-NFNT to generate and foster collaborations and test fundamental hypotheses about neural plasticity that significantly expand their research programs. WV-NFNT will grow the neuroscience and bioinformatics community and provide necessary access to spatial transcriptomics and super-resolution microscopy instrumentation. With these approaches, we will make significant contributions to the field of neuroscience by testing hypotheses on nervous system function and synaptic plasticity. A significant portion of the research component of this project will be conducted by an undergraduate work force. Formalized training and mentorship of undergraduates in neuroscience and data science research, coupled with access to internships, will contribute to the goal of placing West Virginians in competitive post-graduate programs or employment in STEM industries. Broadening participation will be supported at the K-12 level through the equity focus of CodeWV and other programs. At the university level, the focus will be on retention of first-generation college students in STEM majors, targeted recruitment of URG for undergraduate research, the development of the WV STEM Alliance for URM thereby expanding WV's limited LSAMP reach, and by increasing diversity with proposed new faculty hires. Formative and summative assessment will measure the impact of these activities on the state.
